SUBJECT INDEX

KEY

In using this index the following should be borne in mind:

1. **Subjects**, not words, have been indexed.
2. **Abstracts**, not merely their titles, have been considered in indexing.
3. The small superior numeral which accompanies each page number designates the fraction of the page in which the subject being indexed is first considered. The printed matter only, exclusive of page headings, has been thus subdivided.
4. "P" before a page number indicates that the abstract is of a patent.
5. The **alphabetizing of index headings** has been done on the basis first of that part which comes before the comma in such headings as *Copper, metallurgy of* and *Phenol, p-nitro-*. E. g., these headings come before the headings *Copper compounds* and *Phenol condensation products*, respectively.
6. **Organic compounds** are indexed on the basis of "parent compounds," or more accurately "index compounds" (see Introduction), the names of substituent radicals following in alphabetical order. The system of naming organic compounds which has been used is outlined in the Introduction below. Esters and salts of organic acids are, in general, indexed under the names of the acids; notes in the index under the appropriate headings explain the few exceptions.
7. An **asterisk (*)** following the name of an organic compound entered in the index signifies that the name, or numbering, or both, is the author's own and may not conform to the system of nomenclature used in this index. This sign is used where it has seemed inadvisable, owing to incomplete information, to attempt to make the name conform to the system, or where the author's name, differing widely from the one given to the compound by the indexer, is given as an extra entry.
8. A **dagger (†)**, which follows the names of a few compounds, signifies that the entry is an extra one, the name being only slightly less favored than the one chosen for the other entry. The preferred name can be determined by reference to the Formula Index.

The desirability of making the index readily usable without the need of reference to an elaborate introduction has been held constantly in mind. Although an introduction seems desirable and should be helpful, nevertheless the index is dependent neither on the Key nor on the Introduction. Numerous cross-references are given throughout the index, and notes appear in connection with certain headings. An examination of the Introduction, which follows, should be especially helpful to those interested in looking up organic compounds.

INTRODUCTION.

General policy. The indexing of subjects, as opposed to word-indexing, has been emphasized. This avoids omissions, scattering and unnecessary entries; with the abundant cross-references used it means that one should be able to find all of the references on any subject with certainty and with a minimum of effort. The words used as subject headings or in modifying phrases are not necessarily to be found in the abstracts but an expression of the idea suggested will be found within or beginning in the ninth of the page designated by the small superior numeral following the page number. Chemical compounds have been named and entered systematically; the system used is outlined below. All new compounds and all elements, compounds and other substances for which new data are given have been indexed, with the single exception of new compounds for which no name or structure has been given. Such compounds are entered only in the Formula Index. The Subject Index is in no other respect altered because of the Formula Index.

Modifying phrases. In writing such phrases for the entries under any heading the words have been arranged so that the idea considered to be the most important is expressed at the beginning whenever feasible and this procedure, as well as the selection of the words for this purpose, has been governed by numerous formulated general principles and specific rules. *E. g.*, "detection of" has been used consistently whenever correct at the beginning of the modifications in indexing subjects treated from a qualitative analytical point of view, instead of permitting a scattering under such additional phrases as "test for," "reaction for," etc., regardless of what words may have been used in the text. In the case of appropriate headings the selection of first words for modifications has been made on the basis of a definite system of classification. Under a few large headings two or more entries have been made on indexing a subject in a single abstract in case two or more ideas could be used equally well to start the modifying phrase. In alphabetizing modifying phrases prepositions at the beginning have been ignored.

References to fractions of the page. One can readily estimate ninths of a page with considerable accuracy by placing the fore or middle finger one-third of the distance from the top of the printed matter on the page and the thumb one-third of the distance from the bottom, a procedure very easily carried out.

Inorganic compounds. Simple inorganic compounds are entered under the usual names. In indexing compounds of iron, gold, copper and tin such headings as *Iron sulfates*, under which both the "ous" and "ic" salts are entered, have been used rather than headings beginning with "ferric(ous)," "auric(ous)," "cupric(ous)," or "stannic(ous)." Acid salts, such as NaH_2PO_4 , are entered under such headings as "*Sodium phosphates*." With the exception of a few very common compounds, such as carbon dioxide and carbon monoxide, compounds of a given element with another or with a definite radical, which differ only in valence relations, are grouped. *E. g.*, the various oxides of nitrogen are grouped under the heading "*Nitrogen oxides*" and classified there. Complex inorganic compounds which cannot be given definite names satisfactory for indexing are usually indexed under the heading which represents the class of compounds concerned and under a heading of the type *Nickel compounds*, depending on what the significant element is. *E. g.*, dichlorotetraamminecobaltic chloride would be indexed under "*Ammino compounds*" and under "*Cobalt compounds*." The Formula Index, which follows this one, should be particularly helpful in locating complex compounds.

Organic compounds. The system used for naming and indexing organic compounds is the same as that in use starting with the 1916 volume. An explanation of it by

Austin M. Patterson and Carleton E. Curran, who are its originators, has appeared in another journal of the Society.¹ The system is based on existing usage and follows this as far as is practicable, so that a great many familiar names are unaffected. Only the general principles will be given here, but in the index itself will be found abundant cross-references and also notes under *Alcohols*, *Ketones*, etc., indicating how compounds of these classes are named.

1. The chief function of a compound is expressed in the main part of the name wherever possible, and not as a substituent, thus: Pyrrolecarboxylic acid, not carboxypyrrole; ethyl alcohol or ethanol, not hydroxyethane; pentanone, not ketopentane.

2. In compounds of mixed function, the chief function is determined from the following order of precedence: "onium" compounds,² acid (carboxylic first), acid halide, amide, imide, aldehyde, nitrile, ketone, alcohol, phenol, mercaptan, amine, imine, ether, sulfide (and sulfoxide and sulfone). Thus, hydroxybenzonitrile, not cyanophenol; aminophenol, not hydroxyaniline.

3. A multiple chief function is expressed where feasible as -diol, -dicarboxylic acid, etc., rather than as hydroxy—ol, carboxy—acid, etc. But amino and imino groups attached to cyclic bases are treated as substituents; as, aminopyridine.

4. The parent compound should be as large, and the substituents as small, as is practicable in conformity with the above rules; as, ethylbenzene, not phenylethane. But such names as diphenylethane and triphenylcarbinol are exceptions. When the chief function is in a side chain attached to a complex nucleus, "additive" names are preferred in order to harmonize 1 and 4; thus, naphthaleneacetic acid, not naphthylacetic acid (with the result that the compound is indexed with other naphthalene derivatives instead of under acetic acid; see 5).

5. The main part of the name with its functional ending, if any, is placed first in the index, the names of substituents following; thus, chloroacetic acid would appear in the index as *Acetic acid*, *chloro-* and dihydroxyanthraquinone as *Anthraquinone*, *dihydroxy-*. The part thus placed first is called the "index compound;" it may or may not be the "parent compound" (in the second example the parent compound is anthracene).

6. Names in which two functions are expressed in the index compound, as propanolone, cyclopentanonecarboxylic acid, are avoided, but a few very common ones, such as phenolsulfonic acid, are used (indicated by cross-references).

7. The names of the substituent radicals in the name of a compound are arranged in alphabetical order; as, benzylethylmethylphenylammonium chloride. The number of radicals of each kind does not affect the order (e. g., *benzyl* precedes *ethyl* no matter how many of each is present); but the compound name of a substituted radical is treated as a unit with its own alphabetic position; thus *dimethylamino*, Me₂N-, follows *benzyl* but precedes *ethyl*. When the complete name has been formed, it is alphabetized as any other word.

8. Parentheses, brackets and even braces are used where necessary to mark off complex radical names.

9. Familiar methods of numbering are employed (Greek letters for acids, alcohols, etc., and for side chains; arabic numerals for Geneva names and rings). The numbering of complex nuclei is shown in the index under the parent compounds; it is practically identical with that of Richter's "Lexikon" as far as that work goes.

10. When two or more numberings are possible that one is chosen which gives

¹ Patterson and Curran, *J. Am. Chem. Soc.* 39, 1623-38(1917).

² Though "onium" does not designate a function in the strict sense, compounds of this type are often, though not always, named as though it were a chief function.

the smallest number or numbers for the *chief function*, then for double bonds if these must be regarded, then for triple bonds, then for point of attachment (doubled molecules), then for substituents.

11. Unnecessary numbers are avoided: thus, in Δ^3 -1-cyclohexanol the 1 is not needed because by the rules in paragraph 10 the OH group is assumed to be in position 1.

12. Numbers in parentheses are used to indicate the position of entering hydrogen necessary to the existence of the compound; thus, 4(3)-quinolone is equivalent to 3,4-dihydro-4-ketoquinoline.

13. Doubled molecules or radicals are indicated by names commencing with *bi-* (as, *o,o'*-biphenol, biphenyl, $\Delta^{4,4'}$ -bipiperidine). *Bis-* is used for like molecules united by a bivalent radical; as, methylenebisphenol.

In using the *cross-references*, the *general* nature of many of them should be kept in mind; thus, the reference "*Benzene, ethoxy-*. See *Phenetole*" is applicable not only to this compound itself but to derivatives, which are indexed under it rather than under *Benzene*.

ORGANIC RADICALS

An extensive list of preferred names for organic radicals was given in the 1914 Index in a place corresponding to this and also in the Introduction of the Decennial Subject Index. With few exceptions they are the ones in common use. Attention is here called merely to the preferred names for some radicals having more than one name in the literature and to some radical names recently adopted.

RING INDEX

The following index of *ring complexes* is arranged as shown by the bold-face figures: Class I, with single figures indicating simple rings of 3, 5, etc., members; Class II, two figures denoting double rings of 3 and 4, 3 and 5, etc., members; then the triple and still more complex rings. Under each combination of figures the kind and number of atoms in the ring or rings are expressed in formulas. These formulas are arranged so that their initial rings are in the same order as in the Formula Index (see Key at the beginning of it). If the initial rings are alike the second rings of the formula are considered, and so on. By this means the reader will be able to learn the name used in the index for the simplest parent compound containing any particular ring or combination of rings and by turning to this name in the index he will find the compounds listed and, perhaps, cross-references to names of derivatives. Rings which are united but which have no atoms in common (*e. g.*, biphenyl) and "spiro" compounds¹ which are characterized by two rings having but one atom in common are not regarded as ring complexes nor included in this index.

To illustrate: **6,6,6**, $\text{C}_4\text{N}_2\text{-C}_6\text{-C}_6$ Benzoquinoxaline
Phenazine

(1) This designates a complex ring of three components, each of six members; (2) the first is heterocyclic, containing four carbon atoms and two nitrogen atoms and the other two are carbocyclic rings of six atoms each; (3) parent compounds of this configuration will be found in the index under the two names given. If derivatives are indexed a structural formula will be found with the proper numbering and also appropriate cross-references to derivs. having other common names, if any such are in the index.

It should be noted that the classification is made with reference to the smallest rings which, placed together, will constitute the plane formula. Thus hexamethylene-tetramine is treated as a 6,6,6 complex although a fourth six-membered ring (composed of atoms from the three six-membered rings) is also present.

Dehydrofluorocyclene⁴
 Fluorocyclene*

- Abderhalden reaction.** (See also "protective" under *Enzymes*.) 535¹, 2527¹, 2682¹.
in cornea affections, 336¹.
improvement and practical application of, 2079¹.
micro-, 2527¹.
- Abdominal cavity, tensions of CO₂ and O in gases injected into,** 99¹.
- Abies sibirica,** oil of, 2223¹ 4.
- Abietic acid,** book: Zur Kenntnis der, 1710¹.
constitution of, 8604¹.
decompn. of, 1264¹.
from resin of *Pinus longifolia*, 3349¹.
and salts, 2344¹, 2345¹.
—, **hydroxy-**, from resin of *Pinus longifolia*, 2387¹.
- Abortion,** prepn. for prevention and cure of, in cattle, P 2727¹.
- Abortion reaction,** in testicle of guinea pig with *B. abortus* infection, 327¹.
- Abrasive.** (See also *Grinding apparatus; Polishing materials*.) P 159², P 2116¹, P 2396¹, P 3006².
adhesives for manuf. of, P 565¹.
aluminous, P 1040², P 1481².
binder for use with, P 3576¹.
with binder of phenolic resin, P 2116¹.
bonded articles of, P 3576¹ 4.
in Canada, 1839¹.
cement for, P 713¹, P 2870¹.
disks, P 1763¹.
garnet, 2732¹.
grinding, P 567¹.
molded articles of, P 159².
resources of U. S. in 1923, 1039¹.
review, 3575¹.
silicon carbide, P 2870¹.
for valve (engine) seat grinding, P 2732¹.
for valve or bearing grinding, P 1763¹.
- Absidia,** storage-rot of rice caused by, 2839¹.
- Absolute zero.** See *Zero absolute*.
- Absorbents.** (See also *Sorbents*.)
for acetylene, etc., P 1933¹.
"ascarite," water absorption by, 2391¹.
for carbon dioxide, moisture-absorbing effects of, for metabolism expts., 2522¹.
cotton—see *Cotton*.
distg. absorbed vapors from solid, P 1464¹.
for nicotine, P 705¹.
oxides, P 3356¹.
from sulfonic acids and proteins, P 1932¹.
treating gases with, P 365¹.
- Absorption.** (See also *Absorption (of rays); Heat of absorption; Sorption*.)
of acids by wool, 1200¹.
of agglutinin in diphasic salmonella, 2357¹.
of agglutinins, 1892¹.
of alc. by gastric mucosa, influence of CO₂ on, 1591¹.
of ammonia and CHCl₃ by wool, rise in temp. during, 2285¹.
of ammonia in towers, 2728¹ 4.
of ammonium ions from solns. of NH₄ salts by soils, 1611¹.
of bases by soils, 1021¹.
of biogenic elements in soil, influence of bacteria on, 370¹.
of bismuth in digestive tube, 1908¹.
of bismuth prepus., 2710¹.
in body, mechanism of, 2843¹.
book: of Nitrous Gases, 929¹.
of calcium and P and their fixation in the skeleton, 1294¹.
of carbohydrate by blood, effect of fat on, 1895¹.
of carbohydrates, relation to blood sugar, 1299¹.
of carbon dioxide and NH₃ from gas bubbles, 593¹.
of carbon dioxide by leaf material, 2839¹.
of carbon dioxide in alk. solns., 593¹.
of carbon monoxide by hemoglobin in absence of O, 2615¹, 2792¹.
of cholesterol, effect of desoxycholic acid on, 99¹.
of cholesterol, relation to bile acid excretion, 316¹.
of cobra venom through the skin, prevention by adrenaline, 1312¹.
of copper by wheat seeds, 1149¹.
of dyes and inorg. salts by storage tissue, antagonism between, 313¹.
of electrons in gases, 2778¹.
of fat, cellular changes in, 3526¹.
fat, in man and animals, method of study of, 2840¹.
of fats, influence of carbohydrates on, 97¹.
of fat through channels other than the left thoracic duct, 2075¹.
of fogs (chem.), 595¹.
of gases and vapors by liquids, 3331¹.
of gases, comparative rates of, 757¹.
in liquid, 593¹ 3.
by porous substances, 388¹.
in water, 593¹.
of hydrochloric acid gas in H₂SO₄, 2894¹.
of hydrocyanic acid by solid Na₂CO₃, 3045¹.
of insulin administered orally, 1897¹.
of insulin, reducing speed of, 2080¹.
of insulin through the digestive tract, 1885¹.
intestinal—see *Intestines*.
of iodine by hyperplastic thyroid gland, 3128¹.
ion effect on, by plants, 2839¹.
of ions by plants, 2226¹.
of ions from soil through root system, 3284¹.
of iron by Al, 3242¹.
of iron by plants outside of their root system, 2840¹.
of lead in the organism, 135¹.
of medicinal substances in gaseous form through the nasopharyngeal mucous membranes, 1163¹.
of mercury from the skin, 353¹.
of mineral elements by plants, 2224¹.
through mucous membrane, action of vaso-motor agents on, 2088¹.
of nitrogen by C, 196¹.
of nitrogen in fertilization with urea and with NH₄Cl, 372¹.
of nitrogen oxides in chamber acid process, 1328¹.
of nitrous gases, P 1330¹.
of nourishment by young plants, influence of light on, 3514¹.
of oxygen by coal, influence of preheating on, 569¹.
parenteral, 99¹.
of pigments of biliary derivation from the intestine, 2233¹.
of potassium by plants, 2360¹.
of protein from digestive tract, study by precipitin test, 1152¹.
re-, fetal, 98¹.
of salts by plants, 1585¹.
of salts by storage tissues, 312¹.
in soil, lime action on, 3342¹.

- by solids, 3045².
 of stereoisomeric dyes by wool, 2936^{2,3}.
 from subcutaneous injection, 1162².
 system for purifying flue gases, P 2991².
 of toxin by kaolin, 2702².
 of urea by mushrooms, 666².
 of vapors by cotton, 757².
 of water by coal, etc., 2266⁴.
 by cotton mercerized without tension, 2749².
 by leaves of genus *Atriplex*, 2360⁴.
 by soda-boiled cotton, 898², 1631².
 by textile fibers, 1797².
 by varnish films, 1953², 1954².
- Absorption apparatus**, 2894².
 controlling, device for, P 589¹.
 fillers for, P 3572².
 for gases, P 422², P 1510², P 3391².
 for gases in solid absorbents, P 2579².
 gas pipet, 2761².
 Geissler bulbs, modification of, 2283⁴.
 for petroleum still gases, P 397².
 for selective recovery of hydrocarbons, etc., P 422².
- Absorption (of rays)**. (See also *Spectrum*; and the various specific kinds of rays, as *Light*, *infra-red*; *Light*, *ultra-violet*; α -*Rays*; *Rays*, *cathode*; *Rays*, *Röntgen*.)
 absorption maximums of, 1818⁴.
 by aluminium, Pb, Cd, Ca and Mg, 2298².
 by amines and amino acids, 1535².
 in ammonia, 1663².
 by arsenic sulfide sols, 919².
 by atom which emits radiation, 1371².
 chem. constitution and, 4907².
 by copper salt sols., 1095².
 by electrically luminescent K vapor, 2780².
 of fluorescent light in emitting substances, 1536².
 by glycerol, temp. coeff. of, 1653².
 in incandescent lamp, 932².
 J discontinuities, 2450².
 limit of K series, 437².
 by magnesium vapor, 438².
 measurement of, in ultra-violet spectrum, 2603².
 by mercury vapor at 54060.97 Å., 212².
 by multiply periodic orbits, 774².
 in neon (excited), 1226², 1660².
 in optically inhomogeneous mediums, 1654¹.
 by org. compds., influence of CH group on, 1376².
 by ozone, 934².
 in photoelec. conducting NaCl crystals, 3210².
 by reaction product of orcinol on pentoses, 212².
 relative absorbing powers of L-levels for radiation of varying wave length, 1094².
 by salts in soln., 1536¹.
 theory of, 211².
 by vapors of Pb, Sn, Bi, Sb and Mg, 3426².
 wave length of absorption limit and K-absorption limits of Ni and Zn, 1092².
- Absorption spectra**. See *Spectrum*.
- Absorption towers**. See *Absorption apparatus*.
- Abutilon tortuosum**, as paper-making material, 1051².
- Acacia**. (See also *Gum arabic*; *Wattle bark*.)
 benthiana, compn. of ground pod and seed meal of, 363¹.
 farnesiana, as host plant of lac, 1203².
 pennata, tanning materials from, 2757².
 yellow pigments of Australian, 313².
- Acanthias vulgaris**, arginine, betaine, choline and acanthine in embryos and liver of, 1004².
- Acanthine**, in embryos and liver of spiny dog-fish, 1004².
- Acanthite**, crystal structure of, 3447².
- Acarus**, effect of creosote on, and its egg, 1612².
- Accelerators**. See *Catalyzers*; *Enzymes*; and "vulcanization of" under *Rubber*.
- Acclimatization**, effect of ions carrying same charge on, 3046².
 theory of, 1517².
- Accumulators**. (All secondary cells are indexed under this heading. See also *Cathodes*; *Depolarizers*; *Electrodes*.) (*Patents*.) 141^{2,3}, 214², 443^{2,3}, 612^{2,3,4}, 784^{2,3}, 938², 1100^{2,3,7}, 1229², 1381², 1542², 1606², 1824², 1992², 1993², 2170², 2171², 2303², 2606², 2786², 2917², 3433^{2,7}.
 active material of, P 3224².
 alk., P 1542², P 2171².
 cadmium in, 1380².
 characteristics and operation of, 3433².
 condition register for, P 1381².
 containers for, P 141^{2,3}, P 1381^{2,3}.
 dielec. properties of, app. for testing, P 938².
 of hard rubber, P 909².
 rubber compns. for, P 1210².
 with density testing device, P 3433².
 electrode mounting for, P 141².
 electrolytes for, P 141², P 211², P 1100², 1379², P 1542².
 filling plugs for, P 1100².
 for flash-light, P 1542².
 hydrometer float for, P 1993².
 industry of, 2916².
 internal resistance of, measurement of, 1086².
 lead poisoning in manuf. and repair of, 3224².
 manuf. of, checking discharge of acid laden air in, P 612².
 paste for manuf. of, P 3433².
 plate connector for, P 1100².
 reactions in lead, 771².
 review, 2785¹.
 separators for, P 141², P 214^{2,3}, P 612^{2,3,7}, P 1100^{2,3}, P 1229^{2,3,7}, P 1542², P 2171², P 2786^{2,3,4}, P 3433².
 ebonite sheets for, P 2146^{2,3,7}.
 elec. resistance and mech. strength of, measurement of, 1539².
 treating wood for, P 141².
 sulfation in, prevention of, 1099², 1660².
 for telegraph offices, 2916².
 terminal posts for, P 1542².
 zinc, P 1666².
- 1-Acenaphthenamine**, and derivs., 3268².
 —, **2-(p-nitrophenylazo)-**, 3268².
2-Acenaphthenamine, and picrate, 651².
3-Acenaphthenamine, and picrate, 651².
Acenaphthene, addn. compd. with perchloro indone, 1258².
 hydrogenation and dehydrogenation of, 820².
 nitration of, 3268².
 reaction of, in detection of aldehydes, 821².
 reaction with PbO₂, 2198².
 spectrum of, 2300².
 sulfonation of, 274².
 system: *p,p'*-bis(dimethylamino)benzophenone-, 1265².
 systems: 9-fluorenone-, and 1,5-di-*p*-acetyl-3-pentadienone-, 1258².
 as wood preservative, 2870².
- Acenaphthene, 1-acetamido-**, 3268².
 —, **2-acetamido-**, 651².

- , **1-benzamido-**, 3268⁹.

 —, thio-, 471³.
***o*-Acetanilide**, thio-, 471³.
Acetates, films of, of higher alcs., 759².
 —, hydrates in aq. soln., 1365².
Acetic acid. (*Acetates of inorganic bases have their own vocabulary headings, as, Sodium acetate. The same is true for Ethyl acetate; other simple esters (benzyl, methyl, etc.) are indexed here, and the rest of the derivatives under the names of the corresponding hydroxy compounds. Acetates of organic bases are entered under the names of the bases.*)

- absorption of vapors of, by cotton, 757⁴.
acetone from, 466⁴.
addn. compd. with bipyridinium compds., 2053⁴.
addn. compd. with α -1-naphthyl-*p*-phenylbenzohydrol, 2045⁴.
adsorption of, from CS₂ by silica gel, 1216¹.
by charcoal, 760⁴, 919², 1976².
from gasoline soln. by SiO₂, 1516⁴.
from kerosene by silica gel, 1216¹.
adsorption of vapors of, by ThO₂ and Al₂O₃, 1518⁴.
anhydride with the acetate of maloloic acid, 842¹.
bacteria, varieties in Japan, 2357⁴.
benzyl ester, diuretic effect of, 1599⁴.
bromophenylhydrazides and their hydrobromides, 2936⁴.
calcium fluoride soly. in, 2292⁴.
as catalyst for oxidation of org. compds., 40⁴.
catalytic decompn. by means of charcoal, 2443⁴.
chlorination of, 440⁴.
from chloroacetic acid waste liquor, P 2830⁴.
concn. of, P 523¹, P 2057⁴, P 2113⁴, P 3272¹.
contraction on dissolving in C₆H₆, 3195⁴.
detn. in wine, 148⁴.
 β -(9,10-dihydro-9,10-diketo-1 (and 2)-anthryl)hydrazide†, 1275¹.
effect of odor of, on parotid secretion, 2847⁴.
effect of Na and, on reddening of flavones, 2513⁴.
effect on glue, 1638⁴.
on intestine of rabbits, 332⁴.
on osmotic pressure of hemoglobin, 1717⁴.
on O consumption of aquatic organisms, 3547⁴.
on temp. sensation, 855⁴.
elec. cond. of mixts. with aniline and water, 922⁴.
elec. resistance of thin layers of mixt. of Me₂CO and, on paper, 3056⁷.
esters, 2657^{2,4}.
ethyl ester—see *Ethyl acetate*.
in feces of calves fed whole milk or cereal gruel, 3303⁴.
fermentation, 2101⁴.
film between water and C₆H₆, 2765⁴.
formation by yeast fermentation in presence of CaCO₃, 3096⁴.
heat capacity and d. of solns. of, 2593⁷.
heats of soln. in H₂O and in org. solvents, 3203⁴.
hydrobromide perbromide*, 816⁴.
internal pressure of, 3394⁴.
ionization in H₂O-EtOH mixts., 922⁴.
lead chloride soly. in, 922¹.
manuf. of, P 832⁴, 1941¹, P 2057⁴, P 3552⁴.
from AcH, app. for, P 2346¹.
from corn cobs, P 385⁴.
by fermentation, P 1176⁴.
methyl ester, density and compressibility of, 2894⁴.
methyl ester, elec. resistance of thin layers of, on paper, 3056⁷.
oxidation of, 2844¹.
oxidation of, by Et₂O₂ and by thioglycine, 307⁴.
partition between H₂O and C₆H₆, 199¹.
partition between H₂O and Et₂O, 3405¹.
from peat, 872⁴.
from pectin hydrolysis, 1900⁷.
traction with BaO₂, 2195¹.
recovery and concn., P 2345⁴.
recovery from cellulose acetate solns., P 2878⁴.
reducing substances in, 1556⁴.
reduction of, and its derivs., 2473⁴.
sorption of, and of mixt. with toluene, by C, 760⁴.
specific heat and heat of fusion of, 2903³.
specific heat of, 2594¹.
from spruce wood, 1054⁴.
sucrose inversion by, and theory of ions, 430⁴.
synthesized from C₂H₂, 803⁷.
system: acetic anhydride-, phys. equil. in, 2444¹.
system: aniline-H₂O-, equil. between 2 liquid phases in, 3055⁴.
system: AcOEt-H₂O-, 3252⁷.
systems: C-H₂O-, C₆H₅NO₂-, and C-C₂H₄-Br-, S-form adsorption curve of, 2584^{4,5}.
system: H₂O-, 2438⁴.
titration curve of, 227⁴.
titration (electrometric) of, 1999⁴.
titration of, indicator for, 1999⁴.
triarylmethyl esters, 1704⁴.
in vinegar losses in generators, 700¹.
vinyl ester, P 3491⁴.
viscosity (relative internal) of, 2151⁴.

I no. of, 2326⁹, 2638⁷.
unsatd., distribution in anemia, 2237⁸.
extrn. from fish oils, 3606⁷.
tautomerism of, 1695⁸.
unsatd. monocarboxylic, sulfochromic oxidation of, 1851⁴.
 α, β -unsatd., reduction of, 1564².
in urine during pregnancy, 1011².
in urine in anxiety and depression, 1307².
vapors during concn. of black liquor, 2564².
in vegetable canning, 2711⁸.
viscometric neutralization of mono-, by alkalies, 2439⁹.
of whortleberry, 1149⁶.
Acid salts. See *Salts*.
Acipenser sturio, 3326².
Acne, uric acid content of blood in, 3111⁸.
Acconthefin, 1753¹.
Aconine, derivs., isomers, 2914³.
Aconite, alkaloid detn. in, 2105¹.
extrn. of root of, 2862⁴.
physiol. action of, 679⁴.
standardization and stabilization of preps. of, 2862⁹.
Aconitic acid, anil, and its esters, 3255⁹, 3256².

sodium salt, anticoagulating power for blood, 1907².
—, **a-bromo-**, triethyl ester, 470⁹.
Aconitine, aging of solns. of, 2389⁹.
anthorine antagonism to, 2088².
and derivs., isomers, 2914³.
poisoning by, 1801⁹.
toxicity of, effect of intraperitoneal or subcutaneous injection on, 1600².
Aconitum, alkaloids, 290².
anthora, alkaloids in, 1756².
hybrid of *A. anthora* and *A. napellus*, 2389⁹.
napellus, alkaloid from, 991¹.
Acorns, analyses of, 1291².
Acridan, optical properties of, 989².
—, **1-acetamido-**, 295⁴.
—, **1-amino-**, 295⁴.
—, **4-amino-1-methyl-**, 294⁴.
—, **1-chloro-**, 294¹.
—, **1 - [N - (β -chloroethyl) - p - tolylsulfonamido]-**, 295⁷.
—, **1-(formylmethyl)amino-**, dimethyl acetal, 295⁷.
—, **1 - [N - (formylmethyl) - p - tolylsulfonamido]-**, dimethylacetal, 295⁷.
—, **1-(β -hydroxyethylamino)-**, and acetyl derivs., 295⁴.
—, **1 - [N - (β -hydroxyethyl) - p - tolylsulfonamido]-**, 295⁷.
—, **10 - methyl - 3,7 - dinitro - 5,5 - diphenyl-**, 1280⁹.
—, **10-methyl-5,5-diphenyl-**, 1280⁹.
—, **10 - methyl - 3 - nitro - 5,5 - diphenyl-**, 1280⁹.
—, **10-methyl-1,3,7,9 - tetranitro - 5,5-diphenyl-**, 1280⁹.
—, **10 - methyl - 3,7,9 - trinitro - 5,5-diphenyl-**, 1280⁹.
—, **1 - p - tolylsulfonamido-**, 295⁷.
1-Acridanglycine, **5-keto-**, and esters, 291³.
—, **5-keto-N-nitroso-**, methyl ester, 294³.
3(?) - Acridansulfonic acid, **5 - keto - 9-nitro-**, 293⁷.
3(?) - Acridansulfonyl chloride, **5-keto-9-nitro-**, 293⁷.
Acridine,
alkyloxy derivs., P 380⁹.
constitution of, 2054⁴.
derivs., antiseptic and nutritive compounds from yeast and, P 3002².
optical properties of, 989⁹.
relation to dyes, 733².
spectrochemistry of derivs. of, 2911³.
—, **1-acetamido-**, 295⁴.
—, **1-amino-**, and -HCl , 295⁴.
—, **7 - amino - 1,2,3,4,4,5,10,10 - octahydro-**, and derivs., 521⁹.
—, **7 - amino - 1,2,3,4-tetrahydro-**, and derivs., 521⁹.
—, **1-chloro-**, 294¹.
—, **5-chloro-1,2,3,4-tetrahydro-**, 521⁹.
—, **diaminoethoxy-**, hydrochloride *Rivanol*.
—, **diaminofuryldimethyl-**, hydrochloride -ZnCl_2 salt, 501².
—, **5,10-dihydro-**. See *Acridan*.
—, **3,5 - dihydro - 3 - imino-**. See *basine*.
—, **dihydroketo-**. See *Acridone*.

- , 1-(*N*-ethylacetamido)-, 295⁴.
 —, 1-ethylamino-, 295⁴.
 —, 1-(*N*-ethyl-*p*-tolylsulfonamido)-, 295⁴.
 —, 1-(formylmethyl)amino-, dimethyl-acetal, 295⁴.
 —, 1-(β -hydroxyethylamino)-, 295⁴.
 —, 1,2,3,4,4i,5,10,10i-octahydro-, and derivs., 522¹.
 —, 1,2,3,4,4i,5,10,10i-octahydro-10-methyl-, and picrate, 522¹.
 —, 1,2,3,4,4i,5,10,10i-octahydro-7-nitro-, and -HCl, 522¹.
 —, 1,2,3,4-tetrahydro-, and derivs., 521⁴.
 —, 1,2,3,4-tetrahydro-7-nitro-, 521⁴.
 —, 1-*p*-tolylsulfonamido-, and -HCl, 295⁴.
 5-Acridinecarboxylic acid, 1,2,3,4,4i,5,10,10i-octahydro-, isomers, 522¹.
 1-Acridineglycine, and Et ester, 295⁴.
 —, *N*-nitroso-, Et ester, 295⁴.
 Acridinium compounds, benzyl-chloride, P 3567².
 2,8-diamino— acid sulfate— see *Proflavine*.
 2,8-diamino-10-methyl-chloride, monohydrochloride— see *Acriflavine*.
 3,6-dihydroxy-10-methyl-chloride, P 3567².
 3,6-dimethoxy-10-methyl-chloride, P 3567².
 ethyl-chloride, P 3567².
 hydroxy- and alkyloxy-, P 3567¹.
 hydroxyethyl-chloride, P 3567².
 Acridone, optical properties of, 989².
 3(5)-Acridone, 7(or 9)-acetamido-9 (or 7)-amino-5,5-diphenyl-, 1280⁴.
 —, 7-amino-5,5-diphenyl-, 1280⁴.
 —, 7,9-diamino-5,5-diphenyl-, 1280⁴.
 —, 7-hydroxy-5,5-diphenyl-, and acetate, 1280⁴.
 5(10)-Acridone, derivs. of, 521¹.
 7(8 and 9)-amino-1,2,3,4-tetrahydro-, and derivs., 521¹.
 —, 1,2,3,4,4i,5,6,7,8,9,10i-decahydro-, 521¹.
 —, 1-methyl-4-nitro-, 294¹.
 —, 10-methyl-1-nitro-, 987⁴.
 —, 1-nitrothio-, 291¹.
 —, 1,2,3,4-tetrahydro-, salts, 521¹.
 —, 1,2,3,4-tetrahydro-2 (or 4)-methyl-, 521¹.
 —, 1,2,3,4-tetrahydro-6 (7, 8 and 9)-nitro-, 521^{1,2}.
 Acridonediazole*, 293⁴.
 Acridoxaline. See *Pyrazinoacridone*, 3,7-dihydro-.
 Acriflavine, effect on blood and tissues, 1456⁴.
 effect on multiplication of infusoria, 2376⁴.
 effects of intravenous injections of, 127⁴.
 penetration into edematous tissues, 1013⁴.
 physiol. action of, effect of light on, 2985⁴.
 in wound infection treatment, 3113².
 Acridoline,
 —, 10,21-etheno-5,10,16,17,18,19-hexahydro-, 296².
 —, 13-ethyl-1,2,3,4,4i,5,6,7,12,12i,13i-dodecahydro-, 296⁴.
 —, 13-ethyl-1,2,3,4,4i,13i-hexahydro-, 296⁴.
 —, 13-ethyl-1,2,3,4,4i,7,12,12i-octahydro-, 296².
 —, 1,2,3,4,7,12-hexahydro-, 293⁴.
 —, 1,2,3,4-tetrahydro-, 293⁴.
 13-Acridolineacetic acid, 1,2,3,4,7,12-hexahydro-, inner anhydride, 296¹.
 —, 1,2,3,4-tetrahydro-, and ethyl ester, 296².
 13-Acridolineethanol, 12-acetyl-1,2,3,4,4i,7,12,13i-octahydro-, acetate, 296².
 —, 1,2,3,4,4i,7,12,13i-octahydro-, 296².
 7(12)-Acridolinone, 1,2,3,4-tetrahydro-, and salts, 293^{4,5}.
 Acrolein, autooxidation of, 11261^{4,5}, 1127², 3488⁴.
 —, cinnamenyl-, 2940⁴.
 —, piperonyl-, oxime, *N*-*p*-carbethoxyphenyl ether*, 47².
 Acromegaly, metabolism in, 2849⁴.
 Acropora, crystal structure of shell of, 2581⁴.
 Acrylaldehyde. See *Acrolein*.
 Acrylamide, β -phenyl-. See *Cinnamamide*.
 Acrylic acid, concn. of, P 2057⁴.
 phenyl ester, 267².
 —, β -benzoyl-, 982⁴.
 dyes from, 63⁴, 485⁴.
 —, β -benzoyl- α -bromo-, 982⁴.
 —, β -benzoyl- α -methyl-, 983¹.
 —, β , β -dimethyl-. See *Senecioid acid*.
 —, β -ethyl-. See *α -Pentenic acid*.
 —, β -*p*-hydroxybenzoyl-, 983¹.
 —, β -indyl-. See *Indoleacrylic acid*.
 —, β -methyl-. See *Crotonic acid*; *Isocrotonic acid*.
 —, β -1 (and 2)-naphthoyl-, 983².
 —, β -*m*-nitrobenzoyl-, 983¹.
 —, α -phenyl-. See *Atropic acid*.
 —, β -phenyl-. See *Cinnamic acid*.
 —, β -vinyl-. See *α,γ -Pentadienic acid*.
 Acrylonitrile, β -phenyl-. See *Cinnamionitrile*.
 Acrylophenone, β -carboxyoxo-, ethyl ester, 2049⁴.
 —, β , β -diphenyl-, 1261⁷.
 thermochemistry of, 984⁹.
 —, β -ethoxy-, 2049⁴.
 —, β -2-furyl-*p*-methoxy-, 823⁴.
 —, β -2-furyl-2,4,5-trimethoxy-, 823⁴.
 —, β -hydroxy-, benzoate, 2049⁴.
 —, β -hydroxy-*p*- α -dimethoxy-, and copper salt, 2342⁵.
 —, β -hydroxy- α -methoxy-, and copper salt, 2342^{4,5}.
 —, β -methyl-. See *Crotonophenone*.
 —, β , β' -methylhydrasonobis-, 2049⁴.
 —, β -phenyl-. See *Chalcone*.
 Actinine, constitution of, 1140¹.
 Actinism. See *Light*; *Photochemistry*.
 Actinium, active deposit ions, mobility of, 602⁴.
 prepn. of active, 1090⁴.
 relation to Ra in radioactive minerals, 2164².
 Actinium A, recoil atoms of, tracks of, 1813⁴.
 Actinium B, recoil atoms of, tracks of, 1813⁴.
 Actinoelectricity, of molybdenite, 1090⁴.
 Actinolite, 804⁷.
 Actinometers, 2761⁴.
 sensitivity of, with Hg electrodes, 1356⁴.
 —, 12-acetyl-13-ethyl-1,2,3,4,4i,4i,5,6,7,12,12i,13i-dodecahydro-, 296⁴.
 —, 12-acetyl-13-ethyl-1,2,3,4,4i,7,12,12i-octahydro-, 296⁴.
 —, 10,21-etheno-5,10,16,17,18,19,20-octahydro-, 296².

- Actinomyces**, decompn. of proteins and amino acids by, 2357⁵.
necrophorus, peroxide formation by, on exposure to air in relation to anaerobic plate cultures, 3510².
- Activated sludge**. See *Sewage; Waste*.
- Activation**. (See also *Heat of activation*.) chem. combination and, 8².
 optical—see *Optical rotation*.
- Active deposits**, actinium, mobility of ions of, 602⁴.
 of radium, long-range particles emitted by, 3061².
 of thorium, long-range particles emitted by, 2597¹.
- Activin**, detn. of, 3074⁷.
- Activity coefficients**, detn. of, 203⁸.
 osmotic coeff. and, 1080⁹.
 theory of, 3057².
- Acyamines**. See *Amides*.
- Acyl chlorides**. See *Chlorides*, acid.
- Acyl group**, migration from N to O, 1562³, 3254⁴.
- Acyloin**, biochem. synthesis of, 2674⁷.
- Aczol**, as wood preservative, 3577¹.
- Adamsia palliata**, poison of, autotomy in *Carcinus moenas* caused by, 3321⁴.
 poison of, effect of heat on, 3278⁵.
 poison of, effect on marine invertebrates, 3543³.
 poison of, effect on muscles of *Carcinus moenas*, 3321⁴.
 poisons from, 3309¹.
 poisons of, effect on heart of *Carcinus moenas*, 3543³.
- Adams-Stokes disease**, effects of BaCl₂ on, 2705⁵.
- Adaptation**, book: aux changements de salinité, 1459¹.
 of infusoria to increased concns. of NaCl, 359².
- Addison's disease**, blood sugar in, 3534².
- Addition compounds**. See *Chemical compounds*.
- Additivity**, atomic constns. of additive properties, 2889⁴.
- Adenine**, in alfalfa plant, 2063⁶.
 from *Arbutia pustulosa*, 3326².
 nucleotide, 834¹.
 nucleotide, isolation from blood, 1005⁹, 2059².
 from *Petromycon fluviatilis*, 1738⁷.
 —, methyl-, in *Geodia gigas*, 2090¹.
- Adenoma**, suprarenal, hyperproduction of cholesterol in, 118⁷.
- Adenylic acid**, salts of, 473⁷.
- Adhatoda vasica**, pharmacology and therapeutics of, 3323³.
 vasicine in, 2501².
- Adhesion**, 1328⁹.
 between metallic surfaces, 1645².
 between oxidic surfaces, 1645².
- Adhesions**, biol. treatment of, 1597².
- Adhesiveness**, of glue and gelatin, 1004⁴.
- Adhesive plasters**, rubber, 2576².
 rubber, testing of, 3386⁴.
- Adhesives**. (See also *Cement; Glue*.) P 384⁴, P 906⁴, 1328⁹, P 1619².
 from aldehydes, P 903⁴.
 bleaching, 381⁴.
 from blood, P 384⁴.
 book, 2552².
 from casein, P 1962², 3568⁹.
 casein manuf. for, 2551⁴.
 for catching rats, insects, etc., P 3150⁵.
 for celluloid, P 3356².
 from cellulose ethers, P 3592⁷.
 from cellulose thiourethans, P 3593¹.
 dextrin paste, 2278⁹.
 from dicyanodiamide and CH₂O, 502⁴.
 in dyeing cotton and making it waterproof, 3377².
 for floor coverings, P 157⁴.
 flour paste, distensibility of, testing, P 2901⁵.
 from linocyn, 407².
 for rubber and stone, concrete, glass or wood, P 2114³.
 from rubber latex, P 420⁶.
 for sandpaper manuf., etc., P 365¹.
 sodium silicate as, 3568⁷.
 sodium silicate-contg., P 157⁵, 1018⁹.
 from starch, P 878¹.
 starches as, 3590⁶.
 from sulfonic acids and proteins, P 1932².
 for textile threads, P 3004².
 theory of, 562⁹.
 vegetable, 2263².
- Adiabatics**, construction of, 207⁵.
- Adipic acid**, dimethyl ester, SnCl₄ and SnBr₄, addn. compds., 50⁹, 51².
 melting p. and esterification const. of, 3252².
 sodium salt, nephropathic action of, 1166¹.
 —, β,γ -dihydroxy-, prepn. of, 1219².
 —, β,γ -diketo-. See *Ketopuric acid*.
- Adipic anhydride**, β -methyl-, 1109⁴.
- Adipocere**, 1143⁹, 2215⁴.
- Adiponitrile**, β,γ -diphenyl-(?), 485¹.
- Adipyl chloride**, reaction with triethylamine, 1409¹.
 —, β -methyl- reaction with triethylamine, 1409¹.
- Adnephrine**. See *Adrenaline*.
- Adonis vernalis**, extn. of, 1930¹.
- Adrenalectomy**, effect on metabolism of the cat, 674⁷.
 effect on morphine tolerance in rats, 312⁴.
 insulin sensitivity following, 3528².
 metabolic changes after, 320¹.
- Adrenal extract**, deceptive effects of, 2705⁵.
 effect on exptl. tuberculosis, 3537¹.
- Adrenal glands**, adenoma of, cholesterol production in, 118⁷.
 adrenaline concn. of blood from, effect of stimulation of splanchnic nerve on, 1887¹.
 adrenaline content of, effect of hunger on, 3522².
 influence of ether anesthesia on, 2089⁴.
 seasonal variation of, 1591⁷.
 in unilaterally splanchnectomized rabbits, 2089⁴.
 adrenaline content of venous blood from, effect of stimulation of the splanchnic nerve on, 1297⁴.
 adrenaline detection and detn. in powders from, 1179⁴.
 adrenaline formation in isolated, and reaction toward adrenaline, 356².
 adrenaline in blood of, 1885⁴.
 adrenaline output of, effect of injection of foreign blood serum on, 3109².
 adrenaline production by, 3321².
 in arterial hypertension following stimulation of peripheral end of cut vagus nerve, 3528².
 blood vessels of, influence of various vital conditions and drugs on, 127².

- cholesterol and lecithin content of, under general anesthesia, 3542³.
 cholesterol content of, 1887¹.
 cholesterol metabolism and, 851³.
 effect of feeding, 2696⁷.
 effect of mixt. with novocaine on blood pressure, 137¹.
 effect on respiratory exchange, 3319⁴.
 in epilepsy, 3312².
 function of, 320¹.
 hemorrhagic infarction of, in sepsis, 1009⁶.
 histologic changes in, after injection of leucine or peptone, 121³.
 hydrogen-ion effect on function of isolated, 2075².
 hypertrophy of, follicular phase and, 3528⁷.
 hypertrophy of, in vitamin B deficiency, 1153⁴.
 lipoids in, in encephalitis, 1451³.
 lipoids in, of cattle, 1301².
 lipoids of, influence of infection on, 3534³.
 mammary gland ext. action on, 1902⁷, 1903².
 medulla, role in pseudodfective hyperglucemia, 2522⁹.
 oxygen utilization in, 855⁴.
 pepns. from, in treatment of infectious diseases, 1903³.
 pericury, 2697⁶.
 secretion of, anemia of cerebral nerve centers as cause of stimulation of, 1886⁹.
 secretion of cortex of, selective action on mesothelial tissues, 101⁴.
 skeletal growth and, 3301³.
 testicular tissue and, 121³.
 therapy, 860³.
 thyroid relation to, 3319³.
 water loss in, in dogs deprived of water, 2077⁴.
 weight of, effect of cooling power of atm. on, 3526¹.
- Adrenaline** (*adnephric; adrenic; adrinic; epinephric; suprarenaline; suprarenine; 3,4 - dihydroxy- α - (methylaminomethyl)-benzyl alcohol*).
 in adrenals, influence of ether anesthesia on, 2089².
 of adrenals in unilaterally splanchnectomized rabbit, 2089².
 in adrenals of rabbit, seasonal variation of, 1591⁷.
 adsorption by kaolin, 1576³.
 in angina pectoris treatment, 3127³.
 antagonism between insulin and, 317⁷, 3121⁴.
 antagonism of atropine to, on smooth muscle, 2086⁷.
 in blood from adrenal vein, effect of stimulation of the splanchnic nerve on, 1887¹.
 in blood from suprarenal glands, effect of stimulation of the splanchnic nerve on, 1297⁴.
 in blood in gangrene, 124⁴.
 in blood of suprarenal vein, 1885³.
 blood pressure curve in pregnancy and relation to cholesterol content of blood, 123³, 3115⁷.
 burn treatment with, 1880².
 calcium fixation by, 2704⁷.
 camphor action in combination with, 3544⁷.
 in carbohydrate metabolism, 3302³.
 cardiovascular action of, electrolytes and, 3117⁴.
 chloroform-, syncope, 3323³.
- combined action of ergotamine and, on guinea-pig intestine, 1602¹.
 death from injection of, 2707².
 detection and detn. in adrenal powders, 1179⁴.
 detection in urine, 2507².
 detn. of, 1031².
 effect in hyperventilation, 1305³.
 effect in insulin convulsions or coma, 2706².
 effect of chloroform and, on heart, 3320⁷.
 effect on absorption of cobra venom through the skin, 1312³.
 on absorption through the mucous membrane, 2088¹.
 on action of K salt on muscle, 138⁴.
 on alk. reserve of blood, 323¹.
 on bile secretion, 2243⁴.
 on blood concn. and leucocytic formula, 1296³.
 on blood phosphate and Ca, 351¹.
 on blood picture of new-born, 3318⁷.
 on blood pressure, 2370⁹.
 on blood pressure, influence of acids and bases on, 3117³.
 on blood pressure, influence of salts on, 2705⁹.
 on blood pressure, reversal by yohimbine, 3119³.
 on blood sugar, 349³, 1005³, 1161³.
 on blood sugar of fish, 2376².
 on blood vessels, 3112².
 on blood vessels and effect of eumydrine thereon, 1905¹.
 on blood vessels, effect of atropine on, 132⁴.
 on blood vessels of adrenal glands, 127¹.
 on blood vessels, reinforcement by creatine and creatinine, 3321³.
 on bone marrow, 2534².
 on bone marrow blood, 1602⁷.
 on calcium fixation, 2238².
 on circulatory system, 1903³.
 on coagulation time of blood, 3120⁷.
 on diazo reaction in bile contg. serum, 1452⁹.
 on edema production by local anesthetics, 1013⁴.
 on electrolytes in blood and tissues, 356⁴.
 on gastric muscle tonus, 2706¹.
 on gastric secretion, 1004⁷.
 on glycogen decompn. in liver, 2072⁷.
 on heart, 2534².
 on heart of frog, influence of Ca and K on, 1166².
 on hydrogen ion concn. of blood, 1730⁴.
 on hyperglucemia produced by morphine, 1297⁴.
 on insulin action on blood sugar, 3315⁴.
 on intestinal musculature, influence of mixts. of ions on, 3117³.
 on intestine and uterus in presence of Cu salts, 2536⁴.
 on intestine of rabbit, 3126³.
 on intestine of *Rana pipiens*, 3126³.
 on intestines, 2708⁹.
 on lactic acid content of blood tissues, 2242⁴.
 on lipin distribution in tissues, 1300⁷.
 on lungs, 136⁴.
 on man, 2240⁹.
 on melanophores of embryonic and larval *Pseudulus heteroclitus*, 1313³.
 on metabolism, 1906¹, 2514².
 on mineral balance of lymph, 3126³.

- of acids (org.) and their Na salts, 910¹.
- of adrenaline by kaolin, 1570^a.
- of alkalies by cellulose, 2273^a.
- by alumina of vapors, 759^a.
- of amino acids by red blood corpuscles, 3108^a.
- by aniline black, 1975^a, 2895^a.
- of anions, effect on coagulation of sols of As_2S_5 and of Sb_2S_5 , 1976⁷.
- of arsenic trioxide by a colloid, effect on oxidation rate, 870^a.
- of arsenious acid by hydrous Al_2O_3 , 427^a.

- by barium sulfate, 199^a.
 of benzophenone on Hg, 1974^a.
 by bleaching agents of oil in benzine soln., 3167^a.
 of blood serum protease by kaolin, 1287^a.
 of butane by silica gel, 1516^a.
 of calcium hydroxide by $\text{Ca}_3(\text{PO}_4)_2$, 2766^a.
 capacity of adsorbents, influence of adsorbed substances on, 2760^a.
 capillary, 199^a, 3045^a.
 of capillary-active substances on an air-water interface, 1799^a.
 catalysis and, 2634^a.
 of catalytically poisonous metals by Pt, 2290^a.
 cataphoresis and, 918^a.
 of cellulose and pulp fibers, 3017^a.
 by charcoal, 1110^a, 1640^a, 1974^a, 1976^a.
 on charcoal from viscous mediums, 1975^a.
 by charcoal, influence of salt content on, 3399^a.
 by charcoal in the intestine, 1161^a.
 charging of facultative colloids by, 3193^a.
 chem., 759^a.
 of chloride solns., 3047^a.
 of chrome alum by hide, 2432^a.
 in coagulation of hydrosols by mixed electrolytes, 1801^a.
 by colloids (hydrophile), 200^a.
 of colloids on water as function of time, 1872^a.
 of colloids (protective), 1079^a.
 of complement by dyes, 2239^a.
 complex between acids or alkalies and gelatin, 1518^a.
 compds., 1975^a.
 of Congo red by amyloid substance, 333^a.
 of constituent ion by an insol. salt, 1800^a.
 of cresol red by serum in spectrophotometric detn. of pH, 1437^a.
 near crit. temp., 3046^a.
 curve, shape of, 2431^a, 2584^a.
 detn. of, 1976^a.
 distinguishing between diff. kinds of, 760^a.
 of dyes by mordants, effect of H-ion concn. on, 733^a.
 by soils, 3341^a.
 by wool and cotton, 1497^a.
 effect of ions carrying same charge as sol on coagulation of sols of Fe, 3399^a.
 elec. nature of forces of, 595^a.
 of electrolytes on charcoal, 1976^a.
 of electrolytes on particles, measuring, 2768^a.
 electromotive force of, electrolytic dissoc. in theory of, 935^a.
 of enzymes, 1713^a.
 equil. of mixts. of 2 gases, 1975^a.
 exchange, 2896^a.
 films of gases, 595^a.
 filtration in colloidal capillaries, 3194^a.
 of gases and vapors by charcoal, 594^a, 1800^a.
 of gases by graphitic C, 3398^a.
 of gases by TiO_2 , 1246^a.
 from gas phase at liquid-gas interface, 2152^a.
 gas removal from an adsorbent, influence of temp. on, 760^a.
 in gels, 2435^a.
 by glass powders, 1800^a.
 of hemotoxin and agglutinin, effect of preliminary treatment of red blood cells with diff. agents on, 1010^a.
 heterogeneous distribution and, 198^a.
 of hydrogen and hydroxyl ions on animal charcoal, 2431^a.
 of hydrogen by Ce, mixed La metals and Ce-Mg alloys, 3046^a.
 of hydrogen iodide gas by glass, 3398^a.
 of hydroxyl ions by skin dried in the sun, 190^a.
 by ignited quartz, 202^a.
 at interfaces, 2765^a.
 of iodine from org. solvents by red P and charcoal, 918^a.
 of ions, 1365^a.
 of ions, mechanism of, 2153^a.
 of ions of same charge as that of the colloid, relation to coagulation and to acclimatization, 3046^a.
 isotherm, 3189^a.
 isotherm, derivation of, 3186^a.
 by kaolin, 2702^a.
 by lampblacks in org. liquids and in crude rubber mixts., 3398^a.
 life period of organisms in relation to, 3129^a.
 at liquid-liquid interface, 198^a.
 by manganese dioxide, effect on end point of reaction of KMnO_4 with H_3AsO_2 , 2584^a.
 by manganese dioxide hydrates, 1216^a.
 of manganese from soln. of $\text{Mn}(\text{HC}(\text{O})_2)_2$ by quartz, etc., 2623^a.
 of medicines, P 3002^a.
 by minerals, capacity of, 457^a.
 nature of, 918^a.
 negative, 2213^a.
 negative, and the oxidizing effect of suspended C, 2584^a.
 of nitrobenzene, influence of cathodic potential on, 1378^a.
 of nitrogen oxides from gas mixts. by silica gel, 2262^a.
 of nitrogen peroxide by silica gel, 1362^a.
 of nitrogen peroxide on Cu_2O , 941^a.
 of nitrous oxide and SO_2 by glass, 2290^a.
 of oil on micelles of soap, 2898^a.
 of oleic acid on minerals, 1077^a.
 oriented, of benzene derivs., 1974^a.
 of pancreatic amylase, 1711^a.
 of phenol in soln.-air interface, 3405^a.
 of phenol red on blood charcoal, casein and gelatin, 2212^a.
 of phosphoproteins of yeast by diff. adsorbents, 3102^a.
 photographic activity of methylene blue as, effect, 3437^a.
 of poisons on "supra norit," 2729^a.
 of polonium, 2597^a.

Alkaline earth metals. (See also *Barium*, etc.)
 book, 2461^a.
 effect on phosphorescent characteristics of rare earths, 935^a.
 quantum no. of, 2450^a.
 spectra of, 934¹, 1374¹, 1376¹, 1661³.
Alkaline earth nitrates, atom arrangement and size in, 2150^a.
 manuf. of, P 613^a.
Alkaline earth nitrites, manuf. of, P 613^a.
Alkaline earth oxides, electron emission and rectifying action of, 2165^a.
 manuf. of, P 3150¹.
Alkaline earth polysulfides, detn. of sulfide, polysulfide and thiosulfate S in, 1829^a.
Alkaline earth salts, effect on blood coagulation, 834^a.
 effect on heat coagulation of plasma of plasma, 1585¹.
Alkaline earth sulfides, prepn. of, 2391^a.
Alkalinity. (See also *Basicity*; *Hydroxide ion concentration*.)
 in cyanide solns., test for protective, 167^a.
 detn. of, of ash in foods, 2855^a.
 in boiler water, app. for, 1465^a.
 of filter press juices in carbonation factories, 1958^a.
 in milk, 864^a.
 of milk of magnesia, 2863⁷.
 expression of, 1218^a.
Alkali reserve. See *Blood*.
Alkali salts. See *Alkali metal salts*.
Alkaloids. (See also *Cinchona alkaloids*, *Cocaine*, etc.)
 in *Aconitum anthora*, 1756^a.
 from *Aconitum napellus*, 991¹.
 in *Aconitum* roots, 2389^a.
 from *Anona squamosa* leaves, 656^a.
 belladonna, detection and detn. of, 1179^a.
 binding power of serum for, 3122^a.
 bromine action on, in plants, 93^a.
 of calabar bean, 1426^a, 1866^a, 2957¹.
 of *Chelidonium majus*, 990^a.
 of colombo root, 2501¹.
 of *Corydalis cava*, 2959^a.
 in *Datura stramonium*, effect of fertilizers and chem. agents on, 1725¹.
 of *Delphinium*, 2500^a.
 detection in cadavers, 2004^a.
 detn., 2107¹.
 detn. in galenical preps. and drugs, 2107¹.
 in nux vomica and its preps., 1172^a.
 in nux vomica preps., 874^a.

- in opium, 2386⁷.
in tablets, 3146⁸.
Dragendorff reagent for, 223¹.
effect of alkali on action of, 539⁹.
effect on *Aldrovandia vesiculosa* leaves, 1292¹.
on hydrogen-ion concn. of pancreatic juice, 3303².
on rate of soln. of Fe in dil. HCl, 1522⁴.
on viscosity of serum, 3523⁴.
on vital staining, 2508¹.
excretion in urine, 1906⁸.
extn. of, P 3002⁷.
automatic devices for, 2106⁴.
from blood, urine or bile, 3280⁸.
from organs, 1876⁸.
formation in *Atropa belladonna* leaves, action of solar radiation on, 3289⁴.
formation in plants, 1441⁸.
hygrine, 1282¹.
of ipecac root, azo dyes from, 2550².
of larkspur seed, 874¹.
from lobelia, 2827⁴.
of *Lobelia inflata*, 702⁸.
of *Lupinus angustifolius* seeds, effect of moisture and of light on, 3292⁴.
in *Lupinus kingii*, 3271⁴.
mol. vol. and absorbability by protoplasm, 305⁷.
N-oxides of, of tropane group, 2670⁴.
of *Scopolia* rhizomes, 1614⁸.
in seeds, behavior during germination, 3286⁹.
stability of solns. of salts of, 870⁸.
sterile solns. of, 1325⁴.
susceptibility of young rabbits to, 3120⁸.
titration of, 702⁸, 2388⁸.
titration with silicoduodecitungstic acid, 792⁸.
vasicine, in *Adhatoda vasica*, 2501².
of yohimbe bark, 1141⁸.
- Alkalosis**, 3523⁷.
in Basedow's disease, 333⁸.
in carbohydrate metabolism, 2238⁴.
from heat radiation, 3319⁸.
of hyperventilation and action of adrenaline, 1305⁸.
ketosis and, 1157⁸.
ketosis assocd. with, 2369⁸.
in pathology, 3305⁴.
phosphate content of blood in, 1717⁸.
- Alkamines**. See "amino" under *Alcohols*.
Alkannin, plants contg., 2108⁸.
Alkaptonuria, 1159⁴.
Alkatan, 376⁷.
Alkoxides. See *Alcoholates*.

Amenorrhea, of war, cause of, 3497¹.
American Institute of Chemists, 2579⁹.
Amethyst, color in smoky, cause of, 3417⁴.
Amianthus. See *Asbestos*.
Amides. (See also *Alkali metal amide*.)
 acid, hydrolysis of, 3253³.
 acid, reaction with S_2Cl_2 , 815⁵.
 effect of homologous, on frog muscles, 351³.
 in *Hevea latex*, 3173⁷.
 of hydroxy acids, linkage reactions of, 470⁹.
 thio-, condensation with nitriles, 3087¹.
 reaction with nitriles, 2476⁴.
 reaction with S_2Cl_2 , 3087¹.
Amidines, tautomerism of, 1706⁴.
Amidogens. See *Amino groups*.
Amidol, oxidation on development, 1668⁹.
Amidopyrine. See *Pyramidone*.
Amines. (Individual amines are named in the
 usual way, as Ethylamine, Triethylamine,
 Benzylamine, etc., and as derivatives
 of these. Aliphatic amines are numbered
 with Greek letters commencing next to
 the amino group (primes and seconds
 being used where necessary with secondary
 and tertiary amines). Mixed amines are
 treated as derivatives of the largest simple
 amine present.)
 addn. compds. of, with hydroquinol, 258⁴.
 alkylation of aliphatic, with chlorosulfonate
 esters, 2814².
 alkylation of aromatic, 2647⁹.
 alkyl, sepn. of, P 523⁵.

- aromatic, thioureas from CS_2 and, P 2960⁷.
 benzylation of, velocity of, 766³.
 in blood, relation to mental disorders, 2983³.
 chlorination of aromatic, P 300³.
N-chloro-, reaction with aldehydes, 1133⁷.
 complex compds. of, with Cr and Co, 66³.
 condensation of aromatic, with $CHCl_3$ and CCl_4 , 645³.
 detection of abnormal, in urine, 2215³.
 di-, acylation of, P 523³.
 di-, nitration of stereoisomeric aromatic, 984¹.
 effect on double decompn. velocity of optically active substituted NH_4NO_3 , 2027³.
 effect on gastric secretion, 1733³, 2077³.
 from fish waste, P 1620¹.
 fluorescence spectra of, 1536³.
 hydrochlorides of, oxidation of solns. of, in liquid NH_3 , 3416¹.
 hydroquinol oxidation in presence of aliphatic, 259¹.

- Amygdalin**, acids from, 731^a.
 hexabiose of, constitution of, 2035^a.
 hydrolysis by takadiastase, 2218^a.
 hydrolysis of, 41^a.
- isometabolic point for, 2220^a.
 L-, synthesis of, 276^a.
 synthesis of, 501^a, 632^a.
- Amygdalinic acid**, L-, and heptaacetates, 731^a.
 L-, lactone, hexaacetate, 276^a.
 —, heptaacetyl-, d- and L-, Et esters, 501^a.
- Amyl acetate**, purification of, P 1867^a.
- Amyl alcohol**, dielec. const. of, in C_6H_6 , 3206^a.
 formaldehyde distribution between H_2O and, 1991^a.
 lithium chloride soln. in, activity coeff. of, 203^a.
 mixt. with water, distn. app. for, 3176^a.
 system: Am_2O-H_2O -, 1693^a.
 viscosity (relative internal) of, 2151^a.
tert-Amyl alcohol, detection of, 3562^a.
 esters, optical properties of, 1417^a, 1418^a.
- Amylases**, 1715^a.
 action of, 835^a.
 action of, effect of KI on, 996^a.
 action of, mechanism of, 3098^a, 3271^a.
 alpha- and beta-, 2678^a.
 from barley, analogy to ptyalin, 1286^a.
 in barley (germinated) preps., 1286^a.
 in cerebrospinal fluid in nervous diseases, 3305^a.
 complement for, 660^a.
 in duodenal contents, detn. of, 1437^a.
 excretion by kidneys, 2694^a.
 fixation by starch, 2505^a.
 malt, 2350^a.
 malt, of diff. grains, dextrinizing strength of, 557^a.
 malt, purification of, 2997^a.
 in milk and cheese, 3330^a.
 pancreatic, adsorption behavior of, 1711^a.
 pancreatic, influence of amino acids on, 2350^a.
 potato, 1716^a.
 in *Rhizopus tritici* and *R. nigricans* spores, 3280^a.
 salivary, activation of liquefying power of, 85^a.
 starch hydrolysis by, 1286^a.
 study of, method for, 2218^a.
 temp. coeffs. of enzymic activity and heat destruction of pancreatic and malt, 3276^a.
 temp. optimum for action on cooked and fresh starches, 1868^a.
 in urine after insulin treatment, 2087^a.
- Amylene**. See *i-Pentene*.
- Amyl ether**, system: $AmOH-H_2O$ -, 1693^a.
- Amyl nitrite**, camphor action in combination with, 3544^a.
 distn. test of, 152^a.
 effect on absorption through mucous membranes, 2088^a.
 on blood vessels of adrenal glands, 127^a.
 on cerebral vessels, 1457^a.
 on lungs, 136^a.
 on venous tension, 3323^a.
- Amylobiase**, 975^a.
- Amylobiose**, 974^a.
- Amylocoagulase**, in grain germs and its properties, 3094^a.
 relation to sugars which convert starch to sugar, 3095^a.
- Amylodextrin**. See *Starch*, sol.
- Amylodextrinic acid**, and salts, 1250^a.
- Amylogenesis**. See *Starch*.
- Amylohemiacellulose**, of starches, 1698^a.

- Amyloidosis**, adsorption of Congo red in, 333^a.
diagnosis of, 1009^a.
kidney, cholesterol concn. of blood in, 1305¹.
- Amylolysis**. (See also *Amylase*; *Starch*.)
by saliva in pathol. states, 117^a.
by saliva of dog, 322^a.
- Amylomucor** β , growth-promoting substance in, 2835^a.
- Amylopectins**. See *Pectins*.
- Amylopsin**, digestive action of, 1432¹.
- Amylopsinogen**, digestive action of, 1432¹.
- Amylose**, in *Aspergillus niger*, 3282^a.
constitution of polymerized, and derivs., 1698^a.
conversion into cryst. maltose, 3099².
halogen compds. of poly-, 974².
hydrolysis by amylase, 1286^a.
hydrolysis by enzymes, 304¹.
 β -maltose in, 3099^a.
from starch, P 416².
- Amylotriose**, 974^a.
- Amyrin**, β -, inactive, identity of α -paltreuhyllic alc. with, 2942².
- Anacardol**, 3607².
- Anacidity**, in old age, 1306^a.
- Anaerobes**. See *Bacteria*.
- Anaerobiosis**, indicators of, 2837⁷.
- Analcite**, from Greenland, 228^a.
water in, binding of, 2924².
- Analeptics**, constitution of, 2242¹.
coramine as, 3114².^a.
- Analgesics**, P 1615^a.
barbituric acid deriv. as, P 1615^a.
morphine and MgSO₄ as obstetrical, 680^a.
pyrazolone-barbituric acid compd. as, P 3566^a.
- Analysis**. (Under this heading are entered only analytical subjects of a general nature. See also Bromometry; Calibration; Calorimetry; Dissolution; Indicators; Iodometry; Reagents; Sampling; Standard solutions; Thermal analysis; Titration; Toxicology; also such headings as Blood, analysis; Food, analysis; Water, analysis.)
in agriculture, 1107^a.
amalgams (liquid) in volumetric, 224¹, 2614^a, 2791¹, 3229².
books: Course of Instruction in Instrumental Methods of, 950^a. Quant., 951¹; Quant. Org. Micro-, 951¹; Elementary Qual., 951¹; Volumetric, 951¹; Metalurgical, 951¹; for Dental Students, 997¹; Allen's Com.  ionization const. of, 1520², 1522².
 manuf. of, P 1825², 3022¹.
 mixts. with acetic acid and water, elec. cond. of, 922².
 with PhNO₂, spectrum of, 609⁷.
 with PhOH and with phenetole, viscosity of, 1362¹.
 with water, distn. app. for, 3176².
 1 and 2-naphthalenesulfonates, 650².
 nitration of, 2191².
 α -phosphonolactate, 2028⁷.
 phys. properties of, and its aq. solns., 310².
 poisoning by, and derivs., 3127⁴.
 pyknosis from injection of derivs. of, 3311².
 reaction with amino acids, 469².
 with BzOH and PhNO₂, catalysis of, 1981⁴.
 with PhCH₂Cl and with O₂NC₆H₄CH₂Cl, velocity of, 766².
 with bleaching powder, 1133².
 with CS₂, 3085².
 with chlorosulfonic esters, 2814².
 with ethylene oxide, 2037².
 with phthalonic anhydride, 265⁴.
 with K₂Cr₂O₇ and H₂SO₄, velocity of, 1778².
 with semicarbazide, 3485⁴.
 with S, 258².
 salts, 37², 2034¹, 3255².
 salts of weak acids in MeOH, alcoholysis of, 1519².
 salt solns., resistance of Havg to, 3659².
 soly. in H₂O—sucrose soln., 3194⁴.
 solns. in mixts. of CS₂ and MeOH, chiropt. detns. on, 3406².
 spectrum of, 2814⁴.
m-substituted derivs., detn. of, 257².
 superheating of, 758².
 surface tension of, 1646².
 system: AcOH—H₂O—, equil. between 2 liquid phases in, 3055².
 thionation of, 401².

Arsenic salts, electrolytic oxidation of, P 215⁴.
Arsenic selenide, 1231^o.
Arsenic sulfides, As(HS)₃, colloidal, protection by soap soln., 3397^o.
 As₂S₃, colloidal, acclimatization in, 3046^o.
 colloidal, adsorption during pptn. by electrolytes, 761¹.
 colloidal, adsorption of sugars by, 3187^o.
 colloidal, coagulation by KCl solns., 597².
 colloidal, coagulation of, 3048².
 colloidal, coagulation rate of mixt. with Sb₂S₃, 2585⁴.
 colloidal, ds. and viscosities of, 3191¹.
 colloidal, electrokinetic potential of, 1077^o.
 colloidal, flocculation of, 2292¹.
 colloidal, influence of diff. substances and significance of adsorption of anions on coagulation of, 1976^o.

- colloidal, influence of nonelectrolytes on coagulation of, 33997.
 colloidal, influence of stirring on coagulation of, 21517.
 colloidal, interaction with Ag sols, 16479.
 colloidal, organosols of, 21544.
 colloidal, ozone action on, 34044.
 colloidal, pptn. by mixts. of salts of univalent and bivalent bases, 18014.
 colloidal, pptn. by K and Na salts of cholesterol-sulfuric acid, 34979.
 colloidal, protection by LiCl, 22914.
 colloidal, protective action of soaps on, 15174.
 colloidal, stability of, 19772.
 colloidal, stabilization of, 27674.
 system: Tl_2S -, thermal analysis of, 30761.
 As_2S_5 , colloidal, 9194.
- Arsenious acid**, adsorption by blood charcoal or $Al(OH)_3$ gel, P 30021.
 adsorption by hydrous Al_2O_3 , 4278.
 detn. in cattle dips, 23854.
 oxidation by HNO_3 , 10828.
 oxidation in solns., 8707.
 permanganate reduction by, formation of colloidal MnO_2 in, 25844.
 permanganic acid reduction by, 19989.
 reaction with Br, 9437.
 reaction with $FeCl_3$, 15239.
 reaction with NO , 19808.
- Arsenious chloride**, *o,o'*-diphenylene-*, 11327.
Arsenious iodide, *o,o'*-diphenylene-*, 11327.
Arsenious oxide, bis(β -chlorovinyl)-*, 32504.
 —, (β -chlorovinyl)-*, 32504.
 —, *o,o*-diphenylene-*, 11327.
Arsenious sulfide, bis(β -chlorovinyl)-*, 32504.
 —, (β -chlorovinyl)-*, 32504.
- Arsenites**, effect on photographic plate, 15124.
 effect on photographic sensitivity, 614.
 oxidation (catalytic) of, 15232.
 oxidation (electrolytic) of, P 2157.
 reaction with permanganate in alk. soln., 4492.
 stability of solns. of, 18291.
 standard acid soln. of, 7939.
- Arsenoacetic acid***, sodium salt, 11654.
Arsenobenzene,

 assay of, value of the index DM in, 17564.
 derivs., analysis of, 21039.
 control of, 3757.
 pharmacol. and toxicol. studies on, 25312.
 toxicity of, 14552.
 elec. cond. of, effect of diln. on, 9201.
 purpura following, 1274.
- Arsenobenzene**, *m,m'*(*o,o'* and *p,p'*)-bis(sulfomethylamino)-†, and disodium salts, 28151.
 —, *m,m'*-diamino-, and di-HCl, 28151.
 —, 4,4'-dihydroxy-. See *p*-Arsenophenol.
- Arseno compounds**, prepn. of, 4784.
Arsenophenol, derivs., P 34923.
 —, diamino-, solns. of derivs. of, P 8752.
p-Arsenophenol, 3,3'-bis(glycylamino)-, di-HCl, 26463.
 —, 3,3'-diamino-, dihydrochloride—see *Arsphenamine*.
 drying, app. for, P 792.
- Arsenopyrite**, auriferous, on Black Mt., 8064.
 etching reactions of, 30769.
 in United States, 8004.
- Arsine**. (See also *Arsenic hydrides*.)
 adsorbent for, P 5647.
 electromotive behavior of, 7708.
 industrial poisoning by, 11704.
 relation to its alkyl derivs. in b. p., 23128.
 removal from gases, P 17598.
- Arsine**, (*o*-benzoylphenyl)chloromethyl-, 4794.
 —, (*o*-benzoylphenyl)dichloro-, 4797.
 —, bis(*o*-carboxyphenyl)chloro-†, dimethyl ester, 4802.
 —, bis(β -chlorovinyl)cyano-, 32507.
 —, bis(β -chlorovinyl)ethyl-, 32507.
 —, bis(β -chlorovinyl)methyl-, 32507.
 —, bis(β -chlorovinyl)-1-naphthyl-, 32507.
 —, bis(β -chlorovinyl)phenyl-, and silver nitrate addn. compd., 28237.8.
 —, bromobis(β -bromovinyl)-, 32504.
 —, (*o*-carboxydiphenyl)chloro-*, and acid chloride, 4794.
 —, (*o*-carboxyphenyl)chloromethyl-, 4801.
 —, chlorobis(β -chlorostyryl)-, 23239.
 —, chloro- β -chlorovinylphenyl-, 23237.
 —, chlorodi-1-naphthyl-, and dichloride, 30863.
 —, (β -chlorovinyl)dilodo-, 32504.
 —, (β -chlorovinyl)hydroxythiocyano-, 32504.
 —, dibromo(β -bromovinyl)-, 32504.
 —, dibromo(β -chlorovinyl)-, 32504.
 —, dichloro- β -chlorostyryl-, 23239.
 —, dichloro(*o*-phenoxyphenyl)-†, 16998.
 —, dichlorophenyl-, aluminum chloride addn. compd., 23238.
 —, dichloro(*o*-phenylphenyl)-, 11327.
 —, *o,o'*-diphenylene-*, derivs., 11324.7.8.
 —, diphenylenemethyl-*, and methiodide, 11328.
 —, methyl-di-1-naphthyl-, 30863.
 —, methyl-1-naphthylphenyl-, addn. compd. with bromoacetic acid, 20382.
 —, tribromo-, reaction with C_2H_2 , 32504.
- Arsines**, arsenic acids from, 4784.
- Arsinic acid**, (*o*-benzoylphenyl)methyl-, 4794.
 —, bis(β -chlorovinyl)-, 32504.
 —, (*o*-carboxyphenyl)methyl-†, 4801.
 —, (*o*-carboxyphenyl)phenyl-, 4799.
 —, dimethyl-. See *Carodylic acid*.
 —, diphenyl-, 4787.
 —, *o,o*-diphenylene-*, 11327.
 —, (*o*-nitrophenyl)phenyl-, 2573.
- Arsinic acids**, prepn. from chloroarsines, 4784.
- Arsinic anhydride**, *o*-carboxydiphenyl-*, 4794.
 —, *o,o'*-dicarboxydiphenyl-*, 4802.
- Arsinous anhydride**, *o*-carboxydiphenyl-*, 4799.
 —, *o*-carboxyphenylchloro-*, 4797.
 —, *o*-carboxyphenylmethyl-*, 4801.
 —, *o,o'*-dicarboxydiphenyl-*, 4802.
- Arsenic acids** ($RA_sO(OH)_3$). (*Individual compounds will be found under names derived from the names of the hydrocarbons of which they are derivatives; e. g., $C_6H_5AsO(OH)_2$ under Benzenearsonic acid.*)
 aromatic carboxylated, 4784.
 prepn. from chloroarsines, 4784.

- Arsonium compounds**, allylethyl-diisobutyl—iodide, and CHI_3 addn. compd., 1403².
 allylethylmethylphenyl—iodide, 1403³.
 allylmethyldiphenyl—iodide, and CHI_3 addn. compd., 1403³.
 allylmethylphenylpropyl—iodide, 1403³.
 benzylidimethylphenyl—iodide, CHI_3 addn. compd., 1403³.
 benzylethylpropyl—iodide, and CHI_3 addn. compd., 1403³.
 benzylmethyldiphenyl—iodide, CHI_3 addn. compd., 1403³.
 benzyltriphenyl—salts, 1403^{3,4}.
 bis(β -chlorovinyl)dimethyl—iodide, 3250⁷.
 bis(β -chlorovinyl)ethylmethyl—iodide, 3250⁷.
 o-carboxyphenylmethylphenyl—oxide, 2038².
 diethyldiphenyl—salts, 1403^{3,4}.
 dimethyldiphenyl—salts, 1403^{3,4}.
 effect on autonomic nervous system, 1912⁹.
 ethylmethyldiphenyl—bromide, 1403⁴.
 methyl-1-naphthylsulfophenyl—oxide, 2038².
 quaternary, resolution of, 2038¹.
 tris(β -chlorovinyl)hydroxy—nitrate, 3250⁷.
 tris(β -chlorovinyl)methyl—iodide, and salts, 3250⁸.
- Arsphenamine** (*salvarsan*; 3,3'-diamino-4,4'-dihydroxyarsenobenzene dihydrochloride). (See also *Arsenobenzene*; *Neoarsphenamine*; *Sulfarsphenamine*.)
 anaphylatoxin neutralization by, 1893⁸.
 arsenic detn. in, 871⁴.
 arsenic excretion through kidney after intravenous administration of, 680⁷.
 book: *Handbuch der Salvarsantherapie*, 1013⁸.
 -calcium therapy in non-tuberculous diseases of the lung, 2855¹.
 chem. and biol. properties of pure, 3147⁶.
 dermatitis, treatment of, 1312⁸.
 dialysis and diffusion of solns. of, and mixts. with serum, 2241⁶, 3117³.
 effect in living body, 1737⁸.
 effect of injection into rats of improperly alkalized solns. of, 862².
 effect on heart, 1907⁷.
 on immunity to recurrent fever, 107⁴.
 on spirochetal infections, 3324³.
 manuf. of, and derivs., 2549⁶.
 pharmacology of, 1906¹.
 phys. and colloidal chemistry of, 1454⁴.
 silver deriv.—see *Silver arsphenamine*.
 sodium deriv.—see *Sodium arsphenamine*.
 solns. of, P 1179⁶.
 in syphilis treatment, 2710⁹.
 toxicity of, 1601⁸.
- Artemia**, effect of HCl and H_3PO_4 on, 1912⁴.
salina, life period of, in its dependence on concn. and vol. of poisonous solns. and on d. of population, 3129².
- Artemisia**, *arborescens*, oil from, 2547³.
vulgaris, "Ai-Hao" from leaves of, 2258⁹.
- Artificial acid**, 2822⁸.
- Arteries**. (See also *Blood vessels*.)
 of umbilical cord, physiol. closure of, 2521⁹.
- Arterioles**, tone of, demonstrating changes in, 2507⁸.
- Arteriosclerosis**, pancreas in, 1309⁹.
 sodium nitrite injections in treatment of, 2708⁹.
- Arthritis**, lactic acid role in, 331¹.
 meaning of, and law of equil. and calories, 2236².
 uric acid content of blood plasma in, 3537⁸.
- Arthur phenomenon**, 1101^{3,5}.
 antigen relation in, 110⁴.
- Artichoke**, inulin in stalk of, 843¹.
 Jerusalem—see *Jerusalem artichoke*.
- Artinite**, crystal structure of, 424⁹.
- Artocarpus communis**. See *Breadfruit*.
- Arylmagnesium halides**. See *Magnesium compounds*.
- "**Asahi-Promoloid**," as fertilizer, 3139⁴.
 vegetation expt. with, 1027⁴.
- Asbestine**, in paper and chem. industries, 2263².
- Asbestos**, amianthus deposit of Monte Plebi, Gallura, 627².
 compn. for molded articles, P 398¹.
 effect on fermentation of lactose, 1321⁹.
 friction compn., P 2867².
 impregnation with rubber, etc., P 750⁴.
 industry in 1924, 809⁷, 3568⁸.
 insulating materials from, P 2858⁷.
 nickel sulfide in, 1676¹.
 paper, P 577¹, P 1055⁹.
 purification of, P 3356².
 purifying, P 2730⁸.
 resources of U. S. in 1923, 1617¹.
 sepn. from gang, P 3572⁸.
- Ascaridole**, hookworm disease treatment with mixt. of CCl_4 and, 1457⁸.
- Ascaris**, *lumbricoides*, metabolism in, 3326².
 Röntgen-ray action on eggs of, temp. coeff. of, 3326⁶.
- "**Ascarite**," water absorption by, 2391⁹.
- Asclepias syriaca**. See *Milkweed*.
- Ascoli reaction**. See *Mostagmin reaction*.
- Ash(es)**, coal, fusibility of, 884², 2266¹, 2735⁷.
 detn. in cereal products, 513⁷, 1459⁴.
 in coal, 3362⁹.
 in drugs, 2791⁴.
 in egg noodles, 547².
 in flour, 3327⁴.
 in foods, 682².
 in fruits and fruit products, 544².
 in fuels, 1041¹.
 in juices and finished products of beet sugar factories, 3612³.
 in spices, 1168⁸.
 in sugar solns., 1505⁴, 3040³.
 in sulfonated oils, 1785².
 in drugs and its detn., 3143⁷.
 ejecting app. for gas producers, P 1490⁸.
 of foods, alkyl. of, 864⁶, 2855⁴.
 fuel recovery from, P 166¹.
 washing, app. for, P 1068⁸.
 in wheat and flour, tables for converting crude, to a uniform moisture base, 546⁶.
- Asparaginase**, action on asparagine, 1436².
- Asparagine**, detection of, 1828⁸.
 disappearance of N-free C skeleton of, in protein regeneration of seed-bearing plants and in deamination of aspartic acid by yeast, 3096⁸.
 effect on mucus of frog eggs, 3546⁹.
 effect on N metabolism of ruminants, 1882⁷.
 enzymic deamidation of, 1436².
 formation in plants, 1149⁹.
 formation in plants, NH_3 consumption in, 3288⁷.
 prepn. by diffusion method, 3285⁴.
 rotatory power of solns. of, variation as function of H-ion concn., 3052².
- Asparaginic acid**. See *Aspartic acid*.
- Aspartamic acid**. See *Asparagine*.
- Aspartic acid** (*aminosuccinic acid*).
 anhydrides of, constitution of, 992².
 deamination by hydrolysis, 2502⁹.
 deamination by yeast, disappearance of N-free C skeleton of asparagine in, 3096⁸.

- hydrolysis in presence of charcoal, 1521³, 1522².
- L.*, metal complexes of, polarimetric investigation of, 1922³.
- optical properties of, 1128⁷.
- oxidation of, 38⁹.
- reaction with aniline, 469³.

 formulation of Bohr's correspondence principle, 1088^o.
 frequency of, 2782^o.
 hydrogen-like, simultaneous action of an elec. and a magnetic field on, 1371^o.
 hydrogen, stopping power for α -particles, 3212^o.
 hydrogen, with moving nucleus, circular orbits in, 3060^o.
 ionization (multiple X-ray) of light, 3216^o.
 isomorphism and, 2429^o.
 light emission from, excited by light absorption, 1658^o.
 magnetic, chem. combination and, 1810^o.
 in magnetic field, 1528^o.
 magnetic moment of, calcn. of, 775^o.
 magnetic moment of, detn. of, 1809^o.
 magnetic properties of, 2599^o.
 mass variations within, relation of spectral lines to, 2782^o.
 melting points in relation to degree of action of valence electrons of, 3392^o.
 mercury, duration of the quantic state 2p, of, 2775^o.

- moment, variation of, 1653⁶.
 motion of, heat and, 2798⁶.
 nuclear tubes of force and bonds of variable polarity in, 8¹.
 nucleus of—see *Atomic nucleus*.
 polarization of, influence on attractive and repulsive forces, 775¹.
 quantum mechanics and, 209¹.
 radiating, in a magnetic field, 2163⁹.
 radiation by, mechanism of, 209¹, 2165¹.
 radiation scattering by, 3222⁶.
 radii of, calcn. of, 1075¹, 2447⁹.
 radii of Se and Te, 3447⁶.
 radioactive decompn. of, in stars, 770².
 radioactive, recoil of, 1813².
 rays, 931².
 reactivity of, in org. compds., 1244¹.
 recoil, of Th X and Th Em, elec. charge carried by, in gases, 3420⁶.
 rectilinear diam. of He, 1799⁶.
 Röntgen rays scattered by oriented, intensity distribution of, 1797⁹.
 selection principle for, not acted on by any forces, 3419².
 series spectra of 2-valence-electron systems and of 3-valence-electron systems, 2782⁶.
 silver, mean free path in N, 2774¹.
 space quantization of, in a magnetic field, 1810⁴.
 spectra of lithium-like and sodium-like, 778⁶.
 stability of, 436¹, 1985⁴.
 stability of systems of, with uncompensated accelerations, 1986⁹.
 statistical equil. between atoms, electrons and radiation, 774¹.
 stripped, 2782⁹.
 structure of, 773⁹, 1656¹, 2580¹, 2774⁸, 2889⁴.
 advanced potentials and, 7¹.
 affinity and, 2580⁶.
 Bohr model and quantum theory, 435¹.
 Bohr model, quantum statistics of, 930¹.
 Bohr model, simultaneous jumping of 2 electrons in, 7².
 Bohr's stationary states, phys. interpretation of, 2908¹.
 Bohr theory of, 7¹, 1529⁴.
 Bohr theory of, and covalency, 7⁹.
 Bohr theory of, chem. properties according to, 435⁹.
 Bohr theory of, spectroscopy and, 7².
 of carbon, application in biol. chemistry, 2680².
 characteristics of chem. compds. and, 930⁴.
 chem. affinity and, 1814⁴.
 of Cl and of Na, 3217¹.
 controlled orbital transfers of electrons in optically excited Hg, 776¹.
 in coordinated compds., 912⁹.
 dynamide of Lenard and, 3212¹.
 electron distribution among atomic levels, 209⁴.
 electroq distribution in successive atoms of, in periodic table, 1810⁶.
 electron orbits, absorption of radiation by multiply periodic, 774¹.
 electron orbits in alkali, quantum nos. of, 774¹.
 electron orbits in Bohr, harmonic analysis of, 2781⁶.
 electrons with a unifrequent motion in, 3210⁴.
 of helium, 2775¹.
 interpretation of a dielectric in terms of, 7⁹.
 of Hg, 3042⁶.
 model of, 2286¹.
 octet theory of induced alternate polarities, 930⁴.
 of Pd and Pt black which absorb gases, 2596⁶.
 periodic system and, 3205¹.
 reconciliation of Bohr's interpenetration ideas with Sommerfeld's relativistic treatment of electron orbits, 2448¹.
 relations of *pp'* groups in, 3217⁶.
 relation to catalytic action of Fe, 3198⁶.
 relation to intensity of reflection of X-rays by crystals, 2910⁴.
 review, 1655².
 Rutherford-Bohr model, emission from, 3212⁶.
 of saline compds., 2150⁶.
 solar system and, 1811¹.
 in solid metals, 600⁴.
 spectrum theory and, 1371⁴.
 static and dynamic, 1089¹.
 theories of, 1811⁵.
 Weiss law of whole nos. and, 605¹.
 thermal equil. between electrons and, 1223⁹.
 thermal equil. between quantized, and black-body radiation, 3420⁶.
 transition from one stationary state to another, Bohr's frequency condition applied to, 2908⁶.
 valency electron in, perturbations of orbit of, 2164¹.
Atopens, of pollen, 1007¹.
 of pollen, house dust, horse dander and green pea, 2851⁹.
Atophan. See *Cinchophen*.
Atoxyl (*monosodium arsanilate*).
 effect on bile secretion, 2243⁴.
 effect on blood sugar, 349¹.
 hypersensitivity, 341¹.
 lipase sensitivity to, 85⁶.
Atractylis gummifera, bromine action on, 93⁴.
 detection in licorice ext., 1929⁶, 2862¹.
 in licorice adulteration, 2260².
 poisoning from, 2260⁶.
Atriplex, water absorption by leaves of, 2360⁶.
Atrolactic acid, glycols from, 1701⁴.
Atromentin, and derivs., 639¹, 4⁵.
Atropa belladonna. See *Belladonna*.
Atrophy, calcium metabolism of infants with, and its relationship to their fat metabolism, 315².
 of liver—see *Liver*.
 muscular—see *Muscles*.
Atropic acid, reaction with NH₂OH, 1134⁹.
Atropine. (See also *Belladonna*.)
 detection of, 3561⁴.
 effect in anaphylactic shock, 118⁶.
 effect on action of K salts on muscle, 138⁶.
 on adrenaline action on blood vessels, 132⁶.
 on adrenaline glucemia, 2242⁹.
 on auriculo-ventricular cond., 351¹.
 on bile secretion, 2243⁶.
 on blood vessels, 1904⁴.
 on cardio-inhibitory app., 3321¹.
 on heart, 355⁴.
 on heart, influence of temp. on, 2704⁹.
 on heart-nerve action, 862¹.
 on heart of amphibia, 540⁶.
 on histamine action on heart, 1455¹.

- on insulin action, 131⁹.
on intestine of *Rana pipiens*, 3126⁵.
on lungs, 136⁴.
on melanophores of embryonic and larval *Fundulus heteroclitus*, 1313⁹.
on muscle action of veratrine, 125⁹.
on organs of non-striated muscle, 2086⁶.
on pulse rate and systolic and diastolic pressures, 3325².
on secretion by intestine, 1909¹.
on sugar content of bile, 3120⁹.
on thrombocyte and leucocyte content of rabbit blood, 3322⁵.
on tissue respiration, 1901⁴.
on vagus nerve, 538¹.
on vestibular nystagmus, 356¹.
effect together with Ca on Ca content of blood, 340⁹.
hypovagotonia from, effect on resistance to poisons, 3542⁶.
ionization const. and indicator for, 2107¹.
N-oxide, -IICl, and *N*-sulfonated ether, 2670⁷.
physiol. action of, and derivs., 3315².
pupillary and ophthalmotonic effect of, in glaucoma, 3542⁴.
sepn. from scopalamine, 1614⁹.
silicoduodecitungstate, 792⁶.
spectrum of, 3219⁹.
sublimate of, 701⁹.
sulfate, spectrum of, 3219⁹.
susceptibility of young rabbits to, 3120⁶.
titration of, 702⁹, 2388⁵.
toxicity to rats, 344⁵.
- Attalea cohune.** See *Cohune nut*.
Attalea funifera. See *Brazil nut*.
Attraction, in atoms, 1529⁹.
inter-ionic, theory of ionized solutes, 3408⁴.
mol., 1214⁷.
and condition equation, 3042⁴.
effect on total pressure of a gas mixt., 915⁷.
at low temps. of unsatd. hydrocarbons, 766⁹.
measurement by thermal diffusion, 2582⁷.
nuclear charge and, 3211⁵.
polarization of atoms or ions and, 775³.
Attritus, carbonization of, 3364⁴.
Aucubin, in certain plants, 93².
from plantain seeds, pharmacol. action of, 1726⁴.
Auerbach, Friedrich, obituary, 2888⁹.
Augites, of Kamchatka, 4564³.
Aurin, 649².
—, tribenzoyl-*, 649⁹.
—, 3,3',3'-trimethyl-. See *o-Cresaurin*.
Aurin chloride, triacetyl-*, 649⁷.
—, tribenzoyl-*, 649⁹.
Aurin peroxide, triacetyl-*, 649⁷.
—, tribenzoyl-*, 649⁹.
Aurora borealis, cause of, 773², 3428⁷.
review, 3428⁶.
spectrum of, 1223⁷, 2672⁹.
luminescence of solid N and, 609².
origin of, 1818⁶.
- Austenite**, detection and detn. of, 3239⁴.
-martensite transformation, 958⁹.
persistence at elevated temps., 3236⁶.
retained, 3457².
structure of, 1120⁴.
tempering, in martenso-austenitic steel, 28⁹.
- Autocatalysis.** See *Catalysis*.
Autocatalytic grid, 3412¹.
- Autoclaves**, book: and High Pressure Work, 2761⁸.
Autohemolysins. See *Hemolysins*.
Autointoxication. See *Intoxication*.
Autolysis, 84⁷, 1867⁹.
of atrophied muscle, 319⁹.
bacterial, 2221⁸.
bacterial, production of β -hydroxybutyric acid and of acid phosphates in, 2221⁷.
degree of, detn. of, 1917¹.
iodine influence on, 527⁶.
kinetics of, 835⁶.
of liver, effect of Röntgen rays on, 307⁶.
in liver pulp, 3274³.
of muscle of the codfish, 1577¹.
in tissues, 1883⁷.
urea production in, influence of O on, 1717⁸.
- Automobile polish.** See *Polishing materials*.
Autotaxemia. See "auto-" under *Intoxication*.
Autoxidation. See *Oxidation*.
Auxochromism, halochromism, chromatic isomerism and, 3212⁹.
Auxourees, 3273⁹.
union with urease, 1431⁷.
- Avena sativa.** See *Oats*.
Avitaminosis, 671³, 1294⁵, 2227⁷.
blood in, glucose, non-protein N, uric acid and total P in, 2363⁶.
books, 1730¹, 2519¹.
C and cholesterolemia, 2694¹.
carbohydrate metabolism in, 2231⁷.
carbon balance in, 3104¹.
carbon excretion in urine in, 2517⁶.
chemistry of, 1727⁷, 2364⁴.
C, sensitization of guinea pig to, 96³.
effect on enzymes of tissues, 3521⁵.
effect on growth, 3521².
fat metabolism in, 3522¹.
internal secretions and, 1153⁴.
nitrogen metabolism in, 96⁵, 671⁵.
pathologic changes in, in white rats, 2065⁹.
phospholipoids and, 815¹.
in pigeons, 3104².
protein, carbohydrate or fat starvation in, 2974².
resistance to diphtheria toxin in, 2081⁹.
tissue respiration in, 2228¹.
toxicological studies in relation to, 848⁴.
vascular reactivity in, 854⁴.
- Avocado**, vitamin A content of, 2516⁹.
Avogadro law. See *Laws*.
Avogadro number, 2149².
calcn. of, 1654¹.
detn. of, 4237², 2889⁹.
review, 1810⁶.
- Axial gradient**, demonstration of, 1739¹.
Axinite, in Bohemia, 952².
from Ontario (Mcmeta mine, Timmins), 3078⁴.
- Azelaic acid**, dimethyl ester, SnCl₄ addn. compd., 50⁹.
sodium salt, nephropathic action of, 1166¹.
Azeotropes, 1556⁶.
Azetodiindole,

—, 5,10,10,11-tetrahydro-, 65⁶.
—, 5,10,10,11-tetrahydro-10,11-di-methyl-, and derivs., 65⁷.
Asides, aryl, 2341¹.

- Arido-carbon disulfide***, reaction with HN₃, 2460^a.
- Azido compounds**, analysis of, 2611¹.
- Azimuth effect**, 1528^a.
- Asino**. See *Pyridine*.
- Asine dyes**. See *Dyes*.
- Asines** (*acyclic*). (= Individual asines are entered—in light-face type—as derivatives of the corresponding aldehydes and ketones.) dyes and, 733^a.
hydrogenation of, 3478^a.
- Azoanilinesulfonic acids***, prepn. of, 1857².
- Azobenzene** (*benzenesobenzene*), reduction by org. Mg halides, 2936¹.
solns. in mixts. of CS₂ and MeOH, ebullioscopic detns. on, 3406³.
systems contg., 1703^a.
- , **amino-**. See *Aniline, phenylazo-*.

- Babassu**. See *Orbignya lydia*.
- Babbitt metal**, analysis of, 2791^a.
grinding, abrasive for, P 159^a.
impurities in, effect on compressive strength and hardness, 1687^a.
melting, furnace for, P 1243³.
- Bacillus**. (See also *Bacteria; Pneumococcus; Staphylococcus; Streptococcus*; etc.)
abortus, globulin and albumin fractions of blood plasma of young calves and a cow following injection of, 2236^a.
abortus, reaction in testicle of guinea pig infected with, 327⁷.
acetoethylicum, acetone formation from sugar by, 3282⁷.
acidophilus, effect on indican content of urine, 125^a.
inhibition of putrefactive spore-bearing anaerobes by, 2834^a.
milk, H-ion concn. of, 1444^a.
prepn.s., 3000^a.
surface tension as factor in growth of, 3511^a.
aërogenes, in water, 3136^a.
aërogenes, medium for differentiation from *B. coli*, 3509^a.
aertrycke, hydrogen sulfide production by, influence of carbohydrates on, 311^a.
alkaligenes, dehydrogenation by resting, 3510^a.
amylobacter in soils, 3556^a.
amyeloclasticus intestinalis, action on pancreatic internal secretion of enzyme produced by, 1867⁷.
anthracis, destruction in hides, 3385^a.
H-ion concn. and, 91^a.
virulence of spore-producing form of, attenuation of, 91^a.
botulinus, biochem. activities of types C and B, 3282^a.
growth in 30% peptone, 2511^a.
metabolism in various media, 2686^a.
toxico-immunologic and serologic relationships of, 2510^a.
toxin of, action of leucocytes and of brain tissue on, 108^a.
toxin treated with formol and with I, 1308².
bulgaricus, surface tension as factor in growth of, 3511^a.
cholera, H-ion concn. and, 91^a.
cloacae, in water, 3136^a.
coli, action of bile acids on, 1879^a.
in alimentary tract, 2229⁷.
bismuth action on, 999^a.
buffering capacity of, effect of electrolytes on, 530^a.
cholic acid cleavage by, 2683^a.
dehydrogenation by resting, 3510^a.
in detection of tryptophan, 1288^a.
detn. in milk, 1789^a.
elec. resistance of suspensions of, 2835¹.

- hydrogen-ion concn. action on, 91².
hydrogen-ion concn. "spectrum" of, detn. of, 1878¹.
hydrogen production by, 2222¹.
hydrolytic products formed by, at expense of glucose, 2968².
isolation in water analysis, 690², 2541².
lactose fermentation by, influence of paratyphoid group on, 2356¹.
medium for differentiation from *B. aerogenes*, 3509².
metabolism of, 1581¹.
platinum effect on, 1148².
products of, 2356⁷.
reactions of resting, in relation to anaerobic growth, 3103⁴.
test for, 1318¹.
toxins of, and anticolibacillic serotherapy, 2701².
vaccines of, N content in, 2837².
in water, 3136⁴.
whey effect on, 1446¹.
of Danysz and Moreszkowsky, intestinal infections of rodents with, 2686².
diphtheriae, alkylxyacridines for combating, P 380².
carbon of peptone as energy source for, 2835².
effect of peptone on phagocytosis of, 3511².
fermentative reactions of, 311⁷.
hydrogen-ion concn. and, 91².
hydrogen-ion concn. in cultures of, 2511².
and related organisms, 1582².
dysenteriae, dimethyl - p - phenylenediamine effect on, 2356².
effect of septic tanks on, 553².
heterogenetic antigen in, 1893⁴.
H-ion concn. and, 91².
of Friedländer—see *Diplococcus pneumoniae globigii*, red pigment produced by, 1440⁷.
influenzae, agglutinable antigens of, 2852².
growth stimulant for Koch-Weeks bacillus and its relationship to, 2686¹.
heat-labile substance required for growth of, 92².
Koch-Weeks, cultivation of, 2686⁴.
Koch-Weeks, growth stimulant for, and its relationship to Pfeiffer's influenza bacillus, 2686¹.
lactis aerogenes, uric acid destruction by, 2220².
leptosepticum, iron oxide as catalyst in growth of, 3198².
mesentericus, hydrolysis of inulin by, 2836⁷.
ozaenae, H-ion concn. and, 91².
paratyphosus A and B, anaphylaxis with nucleoproteins of, 3535⁴.
paratyphosus A, H-ion concn. and, 91².
paratyphosus B, H-ion concn. and, 91².
paratyphosus C, H-ion concn. and, 91².
pestis, growth of, H-ion concn. and, 1581¹, 2834².
Pfeiffer's—see "*influenzae*," above.
polymyxa, 1581².
prodigiosus, dehydrogenation by resting, 3510².
proteus, dehydrogenation by resting, 3510².
proteus, gelatinase production by, 2838².
proteus vulgaris—see *Proteus vulgaris*.
pseudodiphtheria, H-ion concn. and, 91².
pyocyaneus, effect of germicides on, 311².
metabolism of C compds. in, 1877².
metabolism of cyclic compds. by, 311².
metabolism of N compds. in, 1878¹.
pyocyanin from, 302², 1864¹.
reactions of resting, in relation to anaerobic growth, 3103⁴.
rhinoscleromatis, H-ion concn. and, 91².
subtilis, compn. of, influence of bile mediums on, 1288⁷.
suipetifier, agglutinin absorption in diphasic, 2357².
tuberculosis, agglutinins for, non-effect of irradiation with Hg arc on production of, 328⁴.
alanine and histidine metabolism of, 2967².
alc. ext. of, sp. substances in, 2853¹.
amino acid content of, 2967².
antibodies against alc. ext. of, production of, 327⁴.
antiseptic action of chaulmoogra and allied preps. for, 1878⁷.
autolysis products of, 107¹.
bacteriolysis of, 1879².
broth-culture filtrates of, sp. substances in, 3109².
complement fixation in leprosy with defatted antigen of, 106².
compn. and antigenic properties of, 2966².
concn. of, by use of Al(OH)₃ cream, 665⁷.
concn. of, use of volatile hydrocarbons in, 530⁴.
development of, 2836².
effect of holding method of pasteurization of milk on, 2538².
effect of sambol on, 1903⁷.
effect of steapsin and insulin on, 1303².
food requirements of avian, 2510¹.
gas requirements of, 530².
growth-stimulating properties of filtrates of cultures of, 2685².
intermediary metabolism of cold-blooded, 311².
medicinal prepn. from, P 1758¹.
metabolism of, 999².
nitrogen distribution in protein fraction of, after removal of tuberculinic acid, 2356².
oligaerobic cultures of, 1879².
production of local tuberculin sensitization in guinea pigs by injections of killed, 109².
respiration of, 2683².
skin-sensitizing property of, treated with oleic acid or olive oil, 327².
in sputum, disinfecting power of raw chloramine on, 2686¹.
staining with fat stains, 839².
tryptophan synthesis by, 1288².
utilizable metabolism of, 3283².
vitamin absence from, 530².
typhosus, action of bile acids on, 1879⁴.
anaphylaxis with nucleoproteins of, 3535⁴.
bactericidal effect of Hg derivs. of azo dyes on, 2482⁷.
bacteriolysin for, in serum after injection of various substances, 2849⁷.
detection in excreta, 839².
effect of septic tanks on, 553².
hydrogen-ion concn. and, 91².
hydrogen-ion concn. of culture mediums for, 1581¹.
hydrolytic products of, effect on staphylococci, 2222².
hypercholesterolemia following injection of, 535⁴.
platinum effect on, 1148².
products of, 2356⁷.

- soap action on, 2221³.
 viability of, 1020¹.
 Weizmann, 3340⁷.
 Y-dysentery, "physiol." agglutination of, 839¹.
- Bacon.** See *Meat*.
Bacteria. (See also *Ammonification*; *Bacillus*; *Culture mediums*; *Disinfectants*; *Micro-organisms*; *Nitrification*; *Nitrogen fixation*; *Pasteurization*; *Phagocytosis*; *Sewage*; *Toxins*; *Water, analysis*; *Water, purification* of.)
 acetic acid, heat disturbance and temp. optimum for, 3560².
 poisoning of, in vinegar plants, 700².
 varieties in Japan, 2357⁸.
 acid-fastness produced in non-acid-fast, 2967¹.
 acid-forming, in dental caries, 2837¹.
 action in tannery, 3170⁸.
 action on cotton and cellulose, 171¹.
 agglutination of—see *Agglutination*.
 in air, 2097⁴.
 air, action on citric acid, 2222³.
 alc. oxidation by, 2510⁸.
 anaerobic culture, technic of, 2356⁴.
 anaerobic destruction of org. materials in sewage sludge by, 2383⁹.
 anaerobic growth of, 3510⁸.
 anaerobic growth, reactions of resting, in relation to, 3103⁴.
 anaerobic, influence of artificial peroxidase on growth of, 1440¹.
 anaerobic, oxidation of hemoglobin and reduction of methemoglobin by, 1579².
 anaerobic plate cultures, formation of peroxide by *Achromyces necrophorus* on exposure to air in relation to, 3510².
 anaerobiosis, indicators of, 2837⁷.
 antagonism to yeasts, 2685⁷.
 antigenic properties of, giving complement fixation with tuberculous sera, 327².
 antigenic substance of, 3313⁹.
 antigens from acid-fast, relation to serum of tuberculous individuals, 2235¹.
 autolysis by, production of β -hydroxybutyric acid and of acid phosphates in, 2221⁷.
 bacteriophage and cells of, 3510⁸.
 in beer, control of, 2386⁴.
 behavior in films, 92¹.
 behavior of, chem. mechanism of, 311¹.
 bile pigment formation from hemoglobin by, 2836⁴.
 blood plasma action on, effect of salts on, 90⁸.
 blood serum and plasma action on, 338².
 carbon dioxide role in cultures of, 1580⁷.
 carbon disulfide action on, 3557¹.
 catalase of, 2221⁸.
 cataphoresis of, 2837⁴.
 cellulose destruction by aerobic, 2744⁸.
 cellulose disintegration by intestinal, 2229⁹.
 cellulose-dissolving, 2685⁴.
 in cheese (Kingston), 1016⁴.
 chromogenic, in eggs, 2685⁷.
 as colloids, 2960⁸.
 of colon-aerogenes group, citrate utilization of, 2510⁸.
 of colon-aerogenes group, differentiating, in water examn., 3553².
 colon group of, differential test for members of, 551⁸.
 of colon-typoid group, acid production by, 2968².
 differentiation by staining reactions, 2356².
 in milk, effect of heat on, 1314⁸.
 color sepn. of, by means of the Victoria-blue-pyromine method, 2686⁴.
 concn. of, by use of $\text{Al}(\text{OH})_3$ cream, 665⁷.
 in corn (sweet), 2711⁷.
 cultures contg. food accessory substances, shortening of lag period in, 3282².
 cultures, indole and skatole detn. in, 1581⁸.
 decompn. of proteins and amino acids by, 2357⁸.
 dehydrogenation by resting, 3283⁷, 3510⁴.
 denitrification by, 2969⁸.
 denitrifying, in Neva River, Russia, 1921¹.
 destruction in roller process of milk drying, 2092⁷.
 differentiation of, 810¹, 1440⁴.
 dimethyl-*p*-phenylenediamine in mediums for, 2356².
 dissimilation by, 2354⁸.
 in distd. water, 2221⁸.
 dye utilization in bacteriol. media, theory of, 2357⁸.
 ecto- and endoplasm, role for serum bacterial action and for phagocytosis, 536⁸.
 ectoplasm of, 2685⁹.
 effect of injection of killed, on blood sugar level, 2529⁸.
 effect of parenteral administration of, on N distribution in blood, 2080⁸.
 effect of radioactivity of eruptive gases on, 602¹.
 effect on absorption of biogenic elements in the soil, 370⁸.
 on action of oxidases, 2687⁸.
 on bile acids, 2355¹.
 on biol. test for vitamin B, 3297⁷.
 on buffering and amino N of some food substrates, 3511¹.
 on coagulation of milk by heat, 2856⁸.
 on hydrocarbons, 395¹.
 on phosphate dissoln. in soil, 3312⁴.
 on wool, 897⁴.
 elec. charges of, relation to agglutination, 2512⁸.
 enzymes of, 2685⁴.
 ethyl butyrate-producing, 2221⁸.
 fermentative sugar dissimilation processes of, 2967⁸.
 as food for ruminants, 2690⁹.
 fruitiness in whey from yeast and, 2512⁴.
 garlic action on, 90⁸.
 gastric secretion action on, 2523⁸.
 green coloration of blood agar by, 2835⁸.
 growth of, effect of bacteriophage on, 2837⁷.
 effect of dyes on, 2686⁸, 2836⁹.
 effect of neutral salts on, 1580⁷.
 effect of reaction of culture nutrient mediums on inhibition by chem. substances, 2220⁸.
 hydrogen-ion effect on, 1878².
 hydrogen peroxide and, 2836⁷.
 pyruvic acid role in, 3510⁴.
 growth-promoting factors, measurement of, 1002⁴.
 heredity of acquired characters in, 1582⁸.
 histolysis by, 2968².
 hydrocarbon assimilation by, in reference to mud formation, 2683⁷.
 hydrogen-ion concn. effect on, 91¹.
 hydrogen-ion concn. in cultures of, 1581⁴.
 hydrogen-ion concn. of living, 1580⁹.
 hydrogen sulfide formation by, class demonstration of, 2968⁴.

- hydrogen sulfide production by, of colon group, 2357^s.
 β -hydroxybutyric acid formation by, 2512¹.
 in Imhoff tank, 3554^s.
 immunological differences from blood and tissues of animals, 110⁷.
 as "inframicrobe" source, 3103^s.
 intestinal, action of *B. acidophilus* and *B. bifidus* on, 2834^s.
 carnosine cleavage by, and its relation to autointoxication, 2683^s.
 porphyrin formed by, 1451⁷.
 iron—see *Leptothrix ochracea*.
 isolation of pure cultures of, 2835^s.
 lactic acid, from cereals, 1440^s.
 effect of molds on coagulation of milk by, 1460⁷.
 formation of acetylmethylcarbinol and 2,3-butylene glycol in fermentation by, 3510^s.
 length of life of, in chalked milk and in soil cultures, 1289^s.
 relation to cheese ripening, 1016^s.
 respiration by, 2969^s.
 latex coagulation by, 419^s.
 leather imperfections caused by, 2423^s.
 in lettuce, 3330^s.
 light-sensitiveness of, influence of astringents on, 1440².
 luminous, influence of temp. on intensity of light of, 2908^s.
 luminous, light effect on, 2968^s.
 mannitol-forming, 2837^s, 3283¹.
 in meat products, 141².
 metabolism of acid-fast, 91^s, 311^s, 2510¹, 3283^s.
 metabolism of, amino N method for study of, 2511^s, 2837^s.
 metabolism of, cond. in studies of, 2837^s.
 metal action on, 2220⁷.
 methylene blue reduction by, 1871^s.
 in milk, 3133⁷.
 milk action on, 1440^s.
 in milk collected aseptically and held at low temps., 3133^s.
 in milk (sweetened condensed) which causes thickening, 2856⁷.
 nitrate-forming, 999¹, 2356⁷.
 nitrification in acid solns. by, 2508^s.
 nitrifying, influence on growth of barley, 1470¹.
 nitrifying, influence on nitrogenous substances in manure, 3140^s.
 nitrite-forming, 2684^s.
 nitrogen fixation by nodule, energy requirements for, 2509⁷.
 nitrogen fixation by soil, effect of protozoa on, 2718^s.
 nitrogen fixed by, development of corn on, 2360^s.
 nitrogen fixers in soil, predominance of activity of anaerobic, 3342¹.
 nitrogen-fixing, influence of Mn salts and graphite on action of, 839^s.
 nitrogen metabolism of, relation of d'Herelle phenomenon to, 1880¹.
 nitroprusside reaction of, 1879^s.
 nutrition of, 90^s.
 of paratyphoid-enteritidis group, relation to poisonings by food, 3130^s.
 of paratyphoid group, influence on fermentation of lactose by *B. coli*, 2356^s.
 pathogenic, synthetic ability and biol. reactions of, 2509^s.
 penetration through capillary spaces, 91⁷.
 peroxide formation by anaerobes in presence of O, 2356⁷.
 phytopathogenic, investigation by serol. and biochem. methods, 2357¹.
 in plants, control of, 2688^s.
 platinum action on, 1148^s.
 reducing power of, indicator for, 2835^s.
 reducing powers of, relation to their capacity for forming peroxide, 2356^s.
 saccharin activity on, 135^s.
 of sewage sludge, 692¹.
 in sewage treatment plant, 552^s.
 in soda water, 3330^s.
 in soils, 3556^s.
 effects of alkali salts on activities of, 2994⁷.
 of moorland, influence of humic acids on, 2720¹.
 in neighborhood of roots, 3284⁷.
 relation to fungi, 2100^s.
 of Texas, 2099^s.
 spores, resistance to triphenylmethane dyes, 1583^s.
 in sprinkling filter bed, 552⁷.
 stains for—see *Stains*.
 starch-decomposing, from soil, 2683⁷.
 sugar-fermenting, 2353⁷.
 sulfide fog caused by, in motion-picture developer, 785^s.
 sulfur, 3509^s.
 sulfur compds. produced in cultures of, 310^s.
 sulfur oxidation by, 3511^s.
 symbiosis of seeds and, 1441^s.
 typhoid-paratyphoid dysentery group, variants of, 1892^s.
 ultra-violet light and, 3284⁷, 2508^s.
 urea-splitting, metabolism below 0°, 2685¹.
 uric acid destruction by, 108^s.
 variation of, stimulants to, 1582^s.
 virulence of, relation to fixation capacity for antibodies, 1892^s.
 vitamin requirements for growth and reproduction of, 2969^s.
 vitamins in growth of, 3102^s.
 Voges-Proskauer reaction, 2353^s.
 in water, fecal pollution as source of, 3333⁷.
 zirconium effect on, 1289².
- Bacterial toxins.** See *Toxins*.
Bactericides. See *Disinfectants*.
Bacterins. See *Vaccines*.
Bacteriology, books: Quand doit-on consulter le laboratoire? Bactériologie, 1719^s; Lab. Diagnostic Methods, 2508^s; of Food, 2539^s.
 of hide soaking, 190⁷, 2572^s.
 oxygen indicators in, 2510^s.
 peptonization of plant materials applied to, 3511⁷.
 test tube for, 92^s.
 training of chemists in, 530^s.
Bacteriolytins, activation by colloidal system of serum, 3305^s.
 in blood serum after injection of various substances, 2849⁷.
Bacteriolysis, by blood serum, substance producing, 112^s.
Bacteriophages, 840^s, 3510^s.
 alc. effect on, 3512^s.
 bile effect on, 3511^s.
 desiccation of, 1304^s.
 electrolytes and H-ion concn. in relation to, 3511^s.
 heat resistance and volatility of, 2356^s.
 in Leguminosae root nodes, 665^s.

- lysin, volatility of, 2686^a.
 proliferative reaction to stimuli by, 2835^r.
 review, 1879^r.
 serologic studies with, 114^a.
 sodium chloride effect on, 3511^a.
- Bacteriophage**, relation to N metabolism of bacteria, 1880^l.
- Bacteriostasis**, 311^a.
- Bacteriotropins**, for *Staphylococcus aureus* in serum after injections of various substances, 2849^r.
- Bacterium**, *leptosepticum*, 1583^a.
- Badische Anilin- und Sodafabrik**, 3331^a.
- Bagasse**, "Celotex" from, 189^r.
 feeding stuff from, 1636^r.
 gas from, 885^r.
 molasses mixed with, as fuel, 415^a.
 ovens for, 745^a.
 polarization detn. in, 2140^a.
- Bags**, for cement, specifications for, 3332^l.
 salvaging explosive charges from, app. for, P 1778^a.
- "Bahia"**(wood. See *Mitragyna macrophylla*.
- Baillonia spicata**, glucoside hydrolyzable by emulsin in, 843^r.
- Baillonigenol**, 843^a.
- Baillonioside**, 843^a.
- Bakelite**. (See also *Phenol condensation products*.)
 in alc. vapors rising from bakelite varnish during drying, 3379^a.
 review, 1932^l.
 volatility of, with spirit vapors, 2277^l.
- Bakery products**. (See also *Bread*; *Shortening*.)
 benzoyl peroxide detection in, 1740^r.
 cracker-dough fermentation, 1015^a.
 digestibility of, made from patent flour, 1741^a.
 temp. control in manuf. of, 3327^a.
 test biscuits, production and vol. measurement of, 1914^a.
- Baking**. (See also *Bread*; *Flour*.)
 benzoyl peroxide detection in aids for, 1740^r.
 compds., As content of, 1605^a.
 food compn. for use in, P 1742^a.
 materials, testing, 2539^l.
 yeast prepn. for, P 2094^a.
- Baking powder**, analysis of, 544^r, 3132^a.
 fluoride detn. in, 544^a, 3133^a.
 lead detn. in, 2921^a.
 "neutralizing value" of Ca(H₂PO₄)₂ in, detn. of, 2379^a.
- Bakuchi**. See *Prunus macrophylla*.
- Balances**, 3175^a.
 hydrostatic compensation, 1355^a.
 for indicating % changes in wt., P 1357^a.
 innovations, 3389^a.
 micro-, 587^a, 2180^a, 2453^a.
 micro-, ultramicrometer application to, 1068^a.
 safety rider for, 588^a, 751^a.
 torsion, 1067^a.
 ultra-, 1356^a, 2285^a, 3389^a.
- Balata**, coagulated, aq. solns. of, 1207^r.
 detn. in mixts. with rubber, 1967^a.
 latex, colloid chemistry of, 2574^a.
 paste-like or sol. products from, P 749^a.
 phys. properties of, 1209^a.
 review, 908^r.
- Baldaufite**, from Bavaria, 2795^a.
- Ball bearings**. See *Bearings*.
- Ballistograph**, 732^r.
- Balloons**. (See also *Aircraft*.)
 fabric, removal of impregnating materials in, 1627^r.
- Balls**, golf, P 909^a, P 1794^a.
 golf, core for, P 1640^l.
 golf, material for, P 910^l, P 1066^a.
 of rubber and celluloid, P 2146^a.
- Balmer law**. See *Laws*.
- Balsamic acids**, detn. in balsam of tolu, 378^a.
- Balsams**. (See also *Wood*.)
 Canada, as adhesive, 1329^a.
 distn. app. for materials yielding, P 194^r.
 examn. of, 2104^r.
 odoriferous, 2137^a.
 of Peru, capillary analysis of, 151^a.
 prepn. for microscopic mounting medium, 1722^a.
 from Surinam, 2386^a.
 rosin detection in, 1326^a.
 of tolu, 378^a.
 tolu, from Java, 3348^a.
- Bamboo**, as paper-making material, 1051^r, 3590^a.
 polysulfide pulp, 1054^a.
 silage, 2989^a.
- Banana**, flour, digestible substances in, 1741^a.
 puffing, P 3550^r.
 ripening in, 666^a.
 vitamin A content of, 2516^a.
 vitamin content of, 1003^r.
- Bandages**. See *Surgical dressings*.
- Barberry**, leaves, sugar content of, effect of method of desiccation on, 1150^a.
- Barbital** (*veronal*; 5,5-diethylbarbituric acid).
 analysis of, 3146^a.
 anesthesia, effect on blood, 1455^a.
 color reactions of, 1176^a.
 compd. with pyrimidone, 3091^l.
 narcosis, 357^a.
 sodium—see *Sodium barbital*.
- Barbituric acid** (*malonylurea*).
 alkyl derivs. of, localization in the organism, 1600^r.
 compd. with pyrazolone, P 3566^a.
 deriv. of, with analgesic properties, P 1615^a.
 derivs., P 3566^a.
 disubstituted, P 1179^a.
 hypnotic derivs. of, P 3352^a.
 narcotic effect of derivs. of, 351^a.
- , allyl-, hypnotic activity of, 136^a.
 —, 5-allyl-5-Δ²-butenyl-, as hypnotic, prepn. of, P 153^r.
 —, 5-allyl-5-butyl-, as hypnotic, 2641^a.
 —, 5-allyl-5-sec-butyl-, as hypnotic, 2641^a.
 —, allyl-Δ²-cyclohexenyl-, P 3566^a.
 —, 5-allyl-5-ethyl-, as hypnotic, 2641^a.
 —, 5-allyl-5-isoamyl-, as hypnotic, 2641^a.
 —, 5-allyl-5-isobutyl-, as hypnotic, 2641^a.
 —, allylisopropyl-, manuf. of, P 2864^a.
 —, 5-allyl-5-isopropyl-, as hypnotic, 2641^a.
 —, 5-allyl-5-propyl-, as hypnotic, 2641^a.
 —, 1-benzyl-5-ethyl-5-phenethyl-, 471^a.
 —, bromophenyl-, 1560^a.

3,5,7 - trihydroxy - 2 - phenyl—salts, 2341^{7,8}, 2342⁸.

3,5,7 - trihydroxy - 2 - salicyl—chloride, 2342¹.

3,5,7 - trihydroxy - 2 - (3,4,5 - trihydroxyphenyl)—chloride, 1141⁸.

3,5,7 - trimethoxy - 2 - (3,4,5 - trimethoxyphenyl)—chloride, 1141⁷.

Benzoquinazol - 4 - one, 2,3 - dihydro-, and derivs., 1282^{4,8}.

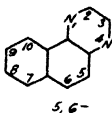

7,8 - Benzoquinoline,

prepn. of, 2662^a.

7,8 - Benzoquinoline - 6,7 - dicarboxylic acid, 2662^a.

Benzoquinone. See *Quinone*.

5,6 - Benzoquinoxaline (naphthopyrazine),

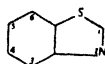

—, **7 - amino - 2,3 - diphenyl-,** 2661^a.

Benzoselenazole,

—, **1-phenyl-,** synthesis of, 1863^a.

Benzothiazole,

derivs., pharmacol. action of, 2052⁷.

prepn. of, and derivs., 662⁷.

relation to dyes, 733^a.

—, **1 - (p - acetamidophenyl) - 5 - methyl-,** 1411^a.

—, **1 - (6 - acetamido - m - tolyl) - 3,5 - dimethyl-,** 1412^a.

—, **1 - (N - acetyl - m - toluino) - 4 - methyl-,** 1411^a.

—, **1 - (p - aminophenyl)-,** 285¹.

—, **1 - (p - aminophenyl) - 4 (5 or 6) - methyl-,** and derivs., 1411^{7,8}, 1412¹.

—, **1 - (p - aminophenyl) - 5 - methyl-,** bromination of, 2666^a.

perbromide, 2666^a.

physiol. action of, 2052⁷.

prepn. of, 284¹.

—, **1 - [4 (and 6) - amino - m - tolyl] - 3,5 - dimethyl-,** constitution of, 1412^a.

—, **1-anilino-,** prepn. of, 66^a.

—, **1,1' - (azodi - p - phenylene)bis[5 - methyl-,** 284^a.

—, **1 - (p - benzamidophenyl) - 5 - methyl-,** 284^a.

—, **1 - chloro-,** dibromide, 2666^a.

—, **1,2-dihydro-. See Benzothiazoline.**

—, **5-dimethylamino-,** 513⁷.

—, **5 - dimethylamino - 1 - mercapto-,** and benzoyl deriv., 513^{a,8}.

—, **5 - dimethylamino - 1 - (methylmercapto)-,** methiodide, 513^a.

—, **1 - 3(,4 - dimethylanilino) - 5,5 - dimethyl-,** and picrate, 1411^a, 1412¹.

—, **1,1' - dithiobis[5 - dimethylamino-,** 513^a.

—, **mercapto-,** derivs., physiol. action of, 2052⁷.

—, **1 - mercapto-,** prepn. of, 66^a.

—, **1 - methyl, derivs.,** pseudo-bases from, oxidation of, 2339^a.

—, **5 - methyl - 1 - (p - nitrophenyl)-,** 284^a.

—, **4 - methyl - 1 - m - toluino-,** and derivs., 1411^{a,8}.

—, **1-phenyl-,** methiodide, 2339⁷.

Benzothiazole series, pseudo-bases of the quaternary salts, 2339^a.

Benzothiazolesulfonic acid, 5 - methyl-1-phenyl-, 284^a.

—, **5 - methyl - 1 - sulfophenyl-,** 284^a.

4 - Benzothiazolesulfonic acid, 1 - (p - hydroxyphenyl) - 5 - methyl-, 284^a.

5(?) - Benzothiazolesulfonic acid, 1 - (p - aminophenyl)-, 285¹.

Benzothiazoline, 5 - dimethylamino - 2-imino-, and benzoyl deriv., 513^{a,7}.

—, **2 - methyl - 1 - methylene-,** 2054^a.

Benzothiazolium compounds, 1,2 - dimethyl- bromide, 2054^a.

1(2) - Benzothiazolone, 5 - dimethylamino - 2 - methyl - 1 - thio-, methiodide, 513^a.

Benzothiofuran. See *Thionaphthene*.

Benzothiophene. See *Thionaphthene*.

m - Benztoluide, 5' - chloro - 6' - hydroxy-, and benzenesulfonate, 1562^{a,8}.

—, **5' - chloro - 6' - hydroxy - 3,5 - di-nitro-,** 1562⁷.

—, **5' - chloro - 6' - hydroxy - 2 - iodo-,** and *p*-iodobenzoate, 1562⁷.

—, **5' - chloro - 6' - hydroxy - 4 - iodo-,** and *o*-iodobenzoate, 1562⁷.

—, **5' - chloro - 6' - hydroxy - 2 - nitro-,** and *m* (and *p*)-nitrobenzoates, 1562^{a,7}.

—, **5' - chloro - 6' - hydroxy - 3 (and 4) - nitro-,** 1562⁷.

—, **2,5' - dichloro - 6' - hydroxy-,** and *p*-chlorobenzoate, 1562⁷.

—, **4,5' - dichloro - 6' - hydroxy-,** 1562⁷.

p - Benztoluide, α - (4 - cyano - 2 - nitrobenzal)-, 1420^a.

—, **3 (and 4) - hydroxy-,** and derivs., 1417^{a,8}.

—, **3,4,5 - trimethoxy-,** 2651⁷.

Benzotriazine,

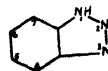

1,2,3 - Benzotriazine, 3 - p - anisyl - 4 - p - anisylimino - 3,4 - dihydro - 7 - methoxy-, 646¹.

—, **3,4 - dihydro - 7 - methyl - 3 - p - tolyl-4-p-tolylimino-,** 645^a.

—, **3,4 - dihydro - 3 - phenyl - 4 - phenylimino-,** 645⁷.

1,2,3 - Benzotriazine - 3 - p - benzenearsonic acid, 3,4 - dihydro - 4 - keto-, 979^a.

1,2,3 - Benzotriazole (asimidobenzene; benzisotriazole),

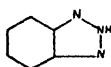

—, **7 - acetamido - 1 - phenyl-,** 282^a.

—, **7 - amino - 1 - phenyl-,** 282^a.

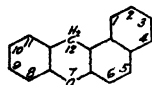

—, **5 (or 6) - chloro - 7 (or 4) - isopropyl-4 (or 7) - methyl-,** 42^a.

- , 4 (or 6) - methyl - 7 - nitro - 1 - phenyl-, 475⁴.
 —, 1-(4-pyridyl)-, and -HCl, 507³.
2,1,3 - Benzotriazole (*pseudoazimidobenzene*),

- silver salt, 514⁴.
 —, 2 - (5 - acetamido - 2 - phenetyl)-, 514⁴.
 —, 2 - (5 - acetamidosalicyl)-, 514⁴.

- excretion after *per* os administration, 2233^o.
- fluorescence and channeled absorption of, at high temps., 1989^o.
- fused, equil. Ba + 2KCl = BaCl₂ + 2K in, Ba + 2NaCl = BaCl₂ + 2Na in, and Ca + 2NaCl = CaCl₂ + 2Na in, 3410^o.
- Hall effect with, in weak fields, 1224^o.
- heat of soln. in Hg and in Au-Hg, 207^o.
- industry in 1924, 809^o, 3452^o.
- intoxication, resorption of Bi in relation to, 2704^o.
- isotopes of, 2597^o.
- lattice const. and d. of, 1798^o.
- light absorption by vapors of, 3426^o.
- magnetic field and, 1528^o.
- oligodynamic antibacterial effect of, 2220^o.
- in organs in humors after administration of sol. and insol. salts, 1456^o.
- photoelec. activity of, 131^o.
- photoelec. threshold of, 9^o.
- physiol. investigations of, 1154^o, 2218^o.
- resources of U. S. in 1923, 562^o.
- retention in animal organism, and its alimentary distribution, 126^o.
- sepn. from tin ores, 1552^o.
- single crystals of, 425^o.
- spectrum of, 600^o, 606^o, 777^o, 1375^o, 1658^o, 1819^o, 1819^o, 3914^o, 3426^o.
- Stark effect in arcs of, 1989^o.
- in syphilis therapy, 860^o, 1011^o, 1162^o, 1163^o, 1900^o, 2088^o, 2375^o, 3316^o.
- system: cadmium-, 2444^o.
- thermal cond. and elec. cond. of, 1086^o.
- thermal cond. of, in a transverse magnetic field, 768^o.
- thermal expansion of crystals of, 754^o.
- in urine in treatment of syphilis with preps. of, 2710^o.
- Bismuth**, analysis, detection, 223^o, 1108^o.
- detection in presence of Cu, Pb and Hg, 1233^o.
- detn., 529^o, 798^o, 1832^o, 3229^o.
- detn. in copper, 1112^o.
- in iron-V, 2616^o.
- in lead ores, 949^o.
- in org. material, 529^o, 3102^o.
- in organs, blood, urine and stools, 2216^o.
- in presence of other metals, 3073^o.
- in urine, 2218^o.
- sepn. from copper, 1833^o.
- sepn. from lead, 948^o, 1832^o, 2314^o.
- Bismuth alloys**. (See also "system" under *Bismuth*.)
- amalgams, electrolysis of, 611^o.
- in oxidimetric estn. of W, 3229^o.
- in volumetric analysis, 224^o.
- antimony-, equil. diagram of, 2321^o.
- cadmium-Pb-Sn-, for elec. conductors, P 12437.
- cadmium-Sn-, potential surface of, 2162^o.
- calcium-, electromotive behavior of, 2162^o.
- lead-, electrolysis of, 61.
- review, 811^o.
- silver-, voltage in Daniel cell, 9451^o.
- structural compn. of, 2626^o.
- thermal analyses of, with Pb, Zn and Sn, 3410^o.
- tin-, electrolysis of, 1086^o.
- Bismuth aluminium bromide**, 2902^o.
- Bismuth chloride**, detection of, 1673^o.
- Bismuth compounds**, 1545^o.
- absorption and therapeutic efficiency of, 2710^o.
- acetoxyaminophenylarsonate, effect on nagana and spirillosis in chickens, 3323^o.
- acetoxyaminophenylarsonate, effect on syphilis, 3323^o.
- alk. Bi tartrates, 2259^o.
- in cancer therapy, 341^o.
- double iodide of emetine and Bi, 1755^o.
- guaiaicolcarboxylate for syphilis treatment, P 7054.
- lipoid-sol., in syphilis therapy, 3116^o.
- mercury salts of complex org. Bi acids for syphilis treatment, P 380^o.
- β -nitroso- β -phenylhydrazylamine salt, 1232^o.
- pyrocatecholates, 2310^o.

- Bismuth ions**, effect on neoplasms, 533^o.
- Bismuth nitrate**, basic, analysis of, 1235^o.
- Bismuth ores**, book, 1393^o.
- Bismuth oxides**, Bi₂O₃, as catalyst, activity of, 1525^o.

- Bi_2O_3 , system: $\text{HCl-H}_2\text{O}$ -, 3200^a.
 Bi_2O_3 , elec. resistivity of, 1644⁷.
Bismuth phosphate, weighing, in glass crucibles, 795².
Bismuth preparations, effect on formed elements of blood and on scheme of Arneth, 1899^a.
 pharmacol. action of, 126^a.
Bismuth salts, biol. significance of complex, 526^a.
 diuretic action of, 2706^a.
 oily emulsions of, P 2864^a.
 reduction by Na in liquid NH_3 , 787^a.
Bismuth sulfides, colloidal, ozone action on, 3404^a.
 precipitation from acid medium, 3405^a.
 sulfur tension of, 1513^a.
Bismuth vanadate, as catalyst for oxidation of hydrocarbons, P 2830⁷.
Bistannyl. See *Distannane*.
Bisulfates, as liquid for baths, 2577⁷.
 org., constitution of, 2483².
 prepn. of, 3353^a.
 reaction with ethylenic hydrocarbons, 1402⁷.
Bisulacid, dibromohexamethyl-, 1249^a.
 —, hexamethyl-, 1249^a.
1,1'-Bithioindoxyl. See *Thioindigo white*.
 —, 6,6'-diethoxy-, derivs., 504^a.
 Δ^1, Δ^2 - Bi - 2(1) - thionaphthenone. See *Thioindigo*.
ar, ar'-Bitoluidine. See *Tolidine*.
 p, p' - Bitolyl, 3,3' - sulfonyl-(?), 1857^a.
 p, p' - Bitolyl - 3,3' - disulfonamide, 1857^a.
Bitumens. (See also *Pitch; Roads; Tar.*)
 breaking point of, machine for detn. of, 2207^a.
 in coal, 1767^a, 2872^a.
 of coal and their influence on caking and swelling, 717^a.
 emulsions of, P 893^a.
 extn. of, P 727^a.
 hydrogen sulfide emanations in beds of, 1551¹.
 of lignite (Rhenish), 1768¹.
 from oil shale residues, 570^a.
 purification by dialysis, P 1354².
 recovery from sand, etc., app. for, P 169^a.
 resources of U. S. in 1923, 574^a.
Bituminol, in lignite (Rhenish), 1768².
Bituminous materials. (See also *Shales*.)
 P 727^{1,2}.
 book, 1493^a.
 carbonization at low temp., 1341^a.
 coking, P 3583^a.
 coking liquefiable, app. for, P 573^a.
 concrete mixts., P 2872^a, P 3361^a.
 dispersing, in water, P 2410⁷.
 distn. in superheated steam and at a reduced pressure, 2268⁷.
 distn. of, retort for, P 2875².
 distn. or carbonization of, app. for, P 1945^a.
 emulsifying agent for, P 1182⁷.
 emulsions, P 727^{1,2}, P 1195^a, P 1625^a, P 2410^{a,7}, P 3159^a, P 3372^a.
 for flooring, etc., P 715⁷.
 limestones, 1047^a.
 oil from, P 1494⁷.
 paint, 3025^a.
 paving compns., P 3154^a.
 penetration test for, 3332².
 for roads, P 387^a, P 881^a.
 for roads, roofs, floors, etc., P 3580^a.
 sampling, 3332^a.
 sands of northern Alberta, 455¹, 1839^a.
 sands, oil recovery from, 2560^a.
 schists, distn. furnace for, 3584¹.
 distn. of, P 3587^a.
 of Italy, 1345^a.
 of Sicily, 3583^a.
 of Sicily, oils distd. from, 2740^a.
 slate, heating or drying, kiln for, P 2761^a.
 from Tyrol, Kirchbichl dist., 627^a.
 water detn. in, 2408⁷.
 for waterproofing, specifications for, 3332¹.
Biurea, β, β' -diamino-. See *Bicarbamic acid, dihydrazide*.

- coagulants, standardization of, 3350³.
- coagulation, anticoagulants and hemolysis, 658⁷.
- coagulation of, 84¹, 324¹, 1717¹, 2213³, 3302².
- action of Zn salts on, 2708³.
- without calcium, 1431⁴.
- calcium and, 2524¹.
- in cold-blooded animals, 3129¹.
- effect of Ca and related salts on, 834⁴.
- effect of chloral hydrate on, 351³.
- effect of pancreatic ext. on, 132⁷.
- effect on H-ion concn., 319⁷.
- fructose influence on, 3318³.
- influence of menotoxin on, 101⁴.
- influence of time of, on toxicity of serum, 3111².
- of insect, 140⁷.
- intravascular, 318⁴.
- prevention by nicotine, 82³.
- prevention by tissue prepn.s., 1296³.
- substances which prevent, 1907².
- thrombin in relation to, 3108⁴.
- coagulation time of, action of Ca salts on, 1285².
- during barbitol hypothermia, 357².
- effect of distd. water on, 2980³.
- influence of adrenaline on, 3120⁷.
- colloid action on, 2080³.
- colloidal reactions in, 3532⁴.
- colloid condition of, in pregnancy, 2981⁴.
- colloids in, 84³.
- colloids of, in hyperventilation tetany, 1159⁷.
- compn. and phys. properties of human, 101⁴.
- compn. of, during activity of digestive glands, 1883³.
- in chloride retention, 3310², 3.
- following discontinuance of insulin in depancreatized dogs, 3515⁷.
- effect of exposure of animal to light and to darkness on, 3273⁴.
- effect of intravenous injections of inorg. chlorides on, 2085⁴.
- effect of pharmacol. stimulation of the vagus on, 3317³.
- during fasting in women, cyclic variations in, 3525⁴.
- during labor, 1010⁴.
- of normal inhabitants of the tropics and of birds in avitaminosis, 2363³.
- relation to milk secretion, 2366⁷.
- concn. changes in, following administration of excessive quantities of water, 1718³.
- concn. in insulin hypoglycemia, 1730³.
- concn. of, action of secretions from plants on, 2075².
- condition of, in post-partum hemorrhage, 2982¹.
- cooling power of atm. and, 3525³.
- creatinine content in babies, 1299².
- creatinine in, of healthy and diseased children, 3535³.
- decompn. of, urobilin formation and, 3523¹.
- defibrinated, effect on glycogen decompn. in liver, 2072².
- in demonstration of fetal and maternal correlation of organs, 2982².
- desiccation of, app. for, P 194³.
- destruction and restoration, 1884².
- in diabetic acidosis, 3310⁴, 4.
- diagnosis in lead workers, 354⁴.
- dialysis of circulating, in living animal, 2352⁴.
- diastase content of, 2058³.
- diastase of, in diabetic animals treated with insulin, 325⁴.
- diastatic activity of, 330³, 3.
- diln. in man, 1591⁴.
- diln. of, streak phenomenon in, 1295².
- diseases, buffering possibility of serum in, 1730².
- Donnan equil. between, and aq. humor and the spinal fluid, 856³.
- drug effect on, 679³.
- drying by spraying, P 865³.
- ebonite-like compn. from, P 157³.
- edema, 340¹.
- in edema, 1007².
- effect of change of relations between tissues and, on N and Cl excretion in urine, 2368³.
- effect of perfusion of defibrinated, on lung, 136⁴.
- effect on growth, dissoc. and virulence of *Bacterium leprosepticum*, 1583³.
- effect on surface tension of water of monomol. layer of, 3504³.
- elec. cond. of dog, 596¹.
- electrolyte changes in ether acidosis, 345³.
- electrolyte distribution between tissues and, 3307⁴.
- of embryo in hen egg, reaction of, 3327⁴.
- enzyme content of, 661¹.
- enzymes of, effect of various agents on, 2085².
- influence of various agents on mobilization of, 2849³.
- in polyneuritis, 2363⁷.
- in scurvy, 1727³.
- eosinophile granule substance of, 665⁴, 993³.
- in epilepsy, physico-chem. equil. of, 325².
- equil. between cerebrospinal fluid and, 1576³.
- equil. in, during respiration, 853¹.
- erythrophagocytosis in circulating, after splenectomy, 332².

- estrus-inducing substances in, of females, 2975.
 exchange between ocular fluids and, effect of Donnan membrane-equil. on, 1144.
 exchange of fluids between, and tissues in disease accompanied by edema, 335.
 exchange of liquid between tissues and, effect of high blood pressure on, 100.
 exercise effect on sugar and residual N in, 2520.
 exts. of, effect on action of adrenaline on uterus and intestine, 3541.
 of fasting dogs, 1588.
 fat absorption by, 2075.
 fat and cholesterol content of, after feeding polished rice to rabbits, 2364.
 fat and sugar in, of animals deprived of vitamins, effect of ultra-violet light on, 1446.
 fat, cholesterol and cholesterol ester content of, of normal, starved, avitaminotic and P-poisoned rats, 3522.
 fat in, destruction by lung tissue, 2977.
 fat in, insulin effect on, 3319.
 fat in, pathol. variations of, 2373.
 fats and lipoids of, 2517.
 as fertilizer, influence of P_2O_5 -K ratio on, 694.
 fetal and maternal, 2845.
 fetal, diastase content of, 2058.
 fetal, K, Na and amino acids in, 3530.
 fibrin, 1451.
 fibrin in diseases, 1303.
 fibrinogen content of, of hematomporphyrin rabbits, 3541.
 fibrinogen content of, relation to anemia in hematomporphyrin rabbits, 3541.
 flow of morphinized dogs, effects of H-ion concn. on, 3319.
 formic acid in, effect of insulin on, 2367.
 -forming tissue, effect of secretin on, 1897.
 gaseous content of, relation to blood flow and metabolism, 3498.
 gaseous exchange of, influence of circulatory disturbance on, 1310.
 gases in fresh, putrified and frozen, 837.
 gases of, effect of local temp. on, 3498.
 in gastrointestinal obstruction, 1309.
 glucemia effect on vol. and Cl of, 2530.
 glycolysis *in vitro* by, 3276.
 glycolysis rate in diff., 116.
 glucolytic action of, kinetics of, 324.
 glucolytic capacity of, 3526.
 glucolytic power of, in diabetes, 1895.
 grouping, 332, 1005, 2983.
 groups of races of East Indian Archipelago, 111.
 group specific antibodies and antigens, 115.
 heat radiation and, 3319.
 hematin in, during fetal period and in newborn, 1295.
 after hematomporphyrin injection, 3111.
 Hemoglobin in, in anemia, 2850.
 hemophilic, blood platelets of, 1734.
 heparin in, 1870.
 heterogenetic sheep, -hemolysin flocculation reaction, 113.
 during hibernation, 2077.
 at high altitudes, 3530.
 in histamine intoxication, 2375, 3536.
 horn substitutes from, P 1182.
 hydration of, plasma proteins in relation to, 2369, 2529.
 hydrogen-ion concn. and alkali reserve in pathol. conditions, 3305.
 hydrogen-ion concn. of, changes during exptl. anaphylactic shock, 337.
 effect of colloidal metals on, 351.
 effect of thyroid ext. on, 318.
 influence of light on, 328.
 influence of ultra-violet light on, 1432.
 influence of X-rays on, 1296, 1432.
 of insects, 2537, 2966.
 in invertebrates, 1167.
 lowering of, 1730.
 normal, 3523.
 of normal males and of cancer patients, 1449.
 of Orthoptera, 1603.
 regulation of, 1734, 3523.
 in scurvy, 3298.
 in hyperpnea, 3527.
 immunological differences from bacteria and plants, 110.
 of Indonesians, 3504.
 insulin action on, 3319.
 insulin effect on alk. reserve and pH of, 3543.
 insulin effect on cellular equil. of, 350.
 insulin effect on compn. of, 131.
 insulin effect on concn. of, 357.
 insulin effect on glucolysis and inorg. P of, 3541.
 insulin effect on, in depancreatized animals, 3515.
 insulin effect on lactic acid content and H no. of, 1900.
 insulin effect on morphological picture of, 3315.
 from insulin-treated animal, effect on blood sugar of injections of, 3542.
 in intestinal obstruction, 859, 2850.
 iodine content of, goiter and, 102.
 iodine content of, of guinea pigs, 3302.
 iodine in, 2985.
 iodine in venous, of thyroid, 675.
 ion concns. in, dependence of excitability of respiratory center on relative, 1591.
 ionic equil. of, during serum and peptone shock, 118.
 ionic exchange between tissues and, role of NaCl in, 3528.
 ions in, dependence of stimulation of respiratory center on equil. between, 3277.
 iron content of, in splenic anemias and infantile leishmaniosis, 2236.
 iron in, in scurvy, 1159.
 iron in, of new-born, 3529.
 isoagglutinins in, of dogs, 1718.
 ketone bodies in, in alkalosis, 2369.
 lactic acid and sugar of, influence of some aliphatic substances on, 1589.
 lactic acid of, 1885, 1890, 2079, 3305.
 in anaphylaxis, 3536.
 in arthritis and rheumatoid conditions, 331.
 effect of insulin on, 1905, 2084, 2242, 3316.
 influence of insulin and adrenaline on, 2242.
 of liver and muscles, 3529.
 under normal and pathol. conditions, 2370.
 after violent exercise, 675.
 in lead poisoning, 135.
 of lepers, complement fixation and globulin content of, 2700.

- leucocyte content of, effect of lipid substances on, 340^a.
- light effect on Ca and P equil. in, 660^a.
- lipase detns. in tuberculosis, colloid lability of serum combined with, 330^a.
- lipase of, effect of secretin and pilocarpine on, 3541¹.
- lipase of, in pulmonary tuberculosis, 326².
- lipase, role of salts in action of, 2062⁹.
- lipoid compn. of, in relation to resistance of cells, 3528⁹.
- lipoid curve directly after ingestion of fat with and without insulin, 341².
- melanogens, independence with respect to chlorophyll of nutrient plant, 2536¹.
- in mental disorders, 2983³.
- methanol in, after injection, 539^a.
- mineral compn. of, in osteomalacia, 337².
- of morphine and heroine addicts, absence of transferable immunizing substances in, 2078⁹.
- morphine effect on compn. of, 130^a.
- in nephritis, 2698³, 3310⁷.
- in nephritis, cholesterol, and bicarbonate content of, 123⁹.
- nitrogen content of, of gastropods, 3326⁹.
- nitrogen curve in pregnancy, 1595¹.
- nitrogen distribution in, influence of parenteral administration of bacteria and bacterial products on, 2080⁹.
- nitrogen in, in hypertrophy of the prostate, 1160¹.
- nitrogen (non-coagulable) of, effect of muscular work on, 1004².
- nitrogen (non-protein) and cholesterol of, parallelism between, role of parathyroid in, 120⁷.
- nitrogen (non-protein and urea) in, after protein diet, 2079².
- nitrogen (non-protein and urea) of, in acute intestinal obstruction, 331².
- nitrogen (non-protein) of, influence of intravenous administration of urea on, 1162².
- of mother and child, 1595².
- relation to amt. of N metabolized, 3310⁹.
- nitrogen of, relation to toxicity to *Lupinus albus* seedlings, 3535².
- nitrogen (residual) in, 1009⁹.
- effect of intravenous injections of urea on, 2706⁷.
- in labor and puerperium, 2982⁹.
- relation to uremia, 1736².

536².
 diameters of, measurement of, 2696².
 elec. cond. of interior of, 3496².
 elec. cond. of suspensions of, effect of
hemolysis on, 3301².
 formation in avitaminosis, 1154¹.
 formation of, effect of cinnamic radical on,
134².
 glucolysis by, effect of insulin on, 3526².
 glucose distribution between blood plasma
and, 2845².
 granular, prepn. of, 135².
 growth-promoting substance of, for bacilli,
2686¹.
 after hematoporphyrin injection, 3111².
 ion action on, effect of valency on, 1433².
 membrane of, 2372².
 oxygen consumption by, Fe therapy and,
1901².
 oxygen consumption by, relation to glucoly-
sis, 3526².
 in peptone shock, 1307².
 penetration of membrane of, by ions, 323².
 permeability of, 3279².
 permeability of, action of insulin and of
guanidine salts on, 3541².
 phagocytosis of, after splenectomy, 332².
 photodynamic action of eosin on, inhibition
of, 1716².
 potassium chloride effect on, 355².
 resistance in phys. work, 2520¹.
 resistance of, 1737².
 resistance of, effect of free CO₂ on, 1895².
 resistance of immature, to heat, 2369¹.
 resistance of, lipid compn. of blood in rela-
tion to, 3528².
 resistance to hypotonic saline solns., 2505²,
3544¹.
 resistance to hypotonic saline solns., effect of
administration of desiccated red bone
marrow and spleen on, 2234².
 sedimentation velocity of, 307², 2230⁴.
 in cerebrospinal fluid, 1307².
 cholesterol, albumin and globulin in cases
with diminishing rate of, 2849².
 effect of administration of iodides on,
3317².
 effect of cholesterol on, 3115², 3529².
 effect of insulin on, 3320².
 effect of narcotics on, 1430².
 in flowing blood, 2231².
 in Gruber-Widal reaction, 3533².
 in pneumothorax, 2978².
 relation to surface tension in shock,
3309².
 tuberculin injection and, 1157².
 in tuberculosis, 330², 534¹, 1159², 2978².
 serological studies of, 1894².
 surface of, nature of, and mechanism of
suspension stability, 3098¹.

- suspension stability of, during pregnancy and the puerperium, 331^a.
 thyroedin action on, 347^a.
 toxicity of foreign, 2853^a.
 treatment with diff. agents and its effect on adsorption of hemotoxin and agglutinin, 1010^a.
 uranium acetate action on, 2215^a.
 urea content of, 3421.
 in urine, CaC_2O_4 crystals resembling, 3277^a.
 volume and hemoglobin content of, 2372^a.
 volume in tuberculous guinea pigs, 320^a.
 volume of, detn. of, 3504^a.
- Blood corpuscles, white.** See *Leucocytes*.
- Blood pigments.** (See also *Hemoglobin*.)
 in anemia (pernicious), 1735^a.
 catalysis of oxido-reduction by, 2831^a.
 cleavage products of, synthesis of, 1429^a.
 constitution of, 833^a.
 from coproporphyrin, 526^a.
 detn. in duodenal contents, 3505^a.
 oxygen-binding capacity of, detn. of, 2680^a.
 porphyrin formation from, 80^a, 2674^a.
 prosthetic group of, 2664^a.
 starch hydrolysis by, 3093^a.
 synthesis of, 2347^a.
 transformation into bile pigments, 99^a.
 transformation products of, 3493^a.
- Blood plasma.** (See also *Blood, analysis*.)
 albumoses of, in catarrhal icterus, 3310^a.
 amino N concn. of, during fever, 1735^a.
 bactericidal property of, effect of salts on, 90^a.
 bicarbonate of, in scurvy, 3298^a.
 calcium and, inorg. P content of, effect of hemolysis on, 1448^a.
 calcium and Mg in, 3107^a.
 calcium content of, of cows with milk fever, 2699^a.
 calcium distribution between cells and, 1431^a.
 carbonic acid equil. in, influence of respiration and kidney function on, 3301^a.
 carbon dioxide and chloride distribution in, in tetany following thyroparathyroidectomy, 1593^a.
 carbon dioxide-combining power of, effect of distd. water on, 2980^a.
 carbon dioxide content of, regulation of, 2851^a.
 chloride distribution between corpuscles and, 1005^a.
 coagulation of, when divested of corpuscles, 3526^a.
 colloidal structure of, 2072^a.
 colloidal structure of, meaning of changes in, in puerperal septic conditions, 3109^a.
 contg. chyle obtained soon after meals, irritating local effect of, 1807^a.
 in convulsions in children, 858^a.
 in disease, 1308^a, 17.
 distribution of PO_4 , Ca, Na and uric acid between red cells and, effect of CO_2 on, 3279^a.
 effect on bacteria, 338^a.
 fetal and maternal, 2845^a.
 flocculation reaction of, and its relation to sedimentation reaction, 1889^a.
 globulin and albumin fractions of, of young calves and a cow following injection of *B. abortus* and protein fractions of, of pregnant and non-pregnant cows or of cows which have aborted, 2236^a.
 glucose distribution between corpuscles and, 284^a, 3530^a.
 in histamine shock, 3536^a.
 hydrating action of, from edematous subjects, 3309^a, 3537^a.
 iodine distribution in, 2985^a.
 in kidney disease, Na, K, Ca and Mg in, 1595^a.
 lipids of, in anemia, 1304^a.
 mineral compn. of, following administration of CaCl_2 and MgCl_2 , 322^a.
 in narcosis, 355^a.
 phosphate in, effect on rate of phosphate excretion, 3526^a.
 phosphorus in, 339^a.
 phosphorus (inorg.) and Ca in, during development of callus in fractures, 1896^a.
 physicochem. consts. of, relation to ionic antagonism, 1719^a.
 potassium chloride concn. of, effect on autonomic rhythm of turtle heart, 3529^a.
 proteins of, change of erythrocyte protein to, 536^a.
 in infancy, 1005^a.
 in pregnancy, 1449^a, 1595^a.
 in relation to blood hydration, 2369^a, 2529^a.
 stability of, 2212^a.
 in pyloric obstruction, 3535^a.
 of rabbit, 3280^a.
 sugar content of, 1155^a.
 sugar partition between corpuscles and, 676^a.
 surface tension of, during anaphylactic shock, 1895^a.
 in cancer, 1009^a.
 after injecting into guinea pigs serum globulin from normal guinea pigs, 3311^a.
 in normal man and in syphilis, 533^a.
 in spontaneous incoagulable shock, 3311^a.
 in tetany of hyperpnea, 2082^a.
 thrombin in oxalated, 3302^a.
 toxicity of human, for guinea pigs, 1891^a.
 ultra-filtration of, 322^a.
 uric acid content of, 3529^a.
 uric acid content of, in pathol. conditions, 3537^a.
 vasoconstrictor substances in, of pregnant women and eclamptics, 677^a.
- Blood platelets, agglutination by, effect of asphyxia on, 2367^a.
 anaphylactic shock and, 3309^a.
 antiplatelet serum, immunity to, 335^a.
 conservation of, 1722^a.
 dissoln. by saponin, 3498^a.
 effect of aq. exts. of, on blood pressure and on vascular caliber, 350^a, 4.
 of hemophilic blood, 1734^a.
 number of, effect of various substances on, 3322^a, 4.
 preëxistence in circulating blood, 2367^a.**
- Blood poisoning.** See *Septicemia; Toxemia*.
- Blood pressure, adrenaline effect on, 3111^a, 3117^a.
 adrenaline effect on, action of K and Ca ions on, 2241^a.
 in diabetes mellitus, 139^a.
 effect of yohimbine on, 3119^a.
 influence of acids and bases on, 3117^a.
 in pregnancy and relation to cholesterol content of blood, 123^a, 3115^a.
 arterial, in tuberculin reaction, 2700^a.
 benzyl benzoate effect on, 128^a.
 calcium injections and, 3370^a.
 control of, with liver exts., 3118^a.**

- cyanosis produced by increased peripheral venous, 3498¹.
 decrease of, by carotid blood collected during vagus stimulation, 132³.
 depressor principle of hepatic tissue, 3499⁷.
 diphtheria toxin and, in avitaminosis, 2081⁸.
 effect of acute anemic anoxemia caused by hemorrhage on, 1164⁴.
 effect of certain substances on, 131².
 ethylene influence on, 1455⁴.
 guanidine bases and, 2983⁸.
 guanidine relation to, 3530⁸.
 high, effect on exchange of liquid between blood and tissues, 100⁹.
 effect on general circulation of serum from, 336¹.
 exptl. production of, 2079¹.
 osmotic pressure of serum protein in relation to, 118².
 uric acid in blood in, 330⁸.
 increase by stimulation of peripheral end of cut vagus nerve, importance of suprarenal bodies in, 3528².
 insulin effect on, 323⁴.
 liver extractives reducing, 3113⁸.
 low, effect on blood alkali, 3497⁸.
 in lumbar anesthesia, 130⁴.
 nitrite action on, effect on water excretion, 128¹.
 nitrous oxide effect on, 324².
 novocaine-suprarenal mixt. and, 137¹.
 phenobarbital effect on, 1911², 3317⁷.
 pituitary ext. action on, 1031⁸.
 platelet ext. and, 350⁸.
 reaction in normal and in parathyroidectomized dogs, 2705².
 reducing remedies, 1163².
 Röntgen-ray effect on, 2240⁷.
 sodium phenobarbital effect on, 1911².
 sparteine effect on, 3323^{1,2}.
 tobacco action on, 1899¹.
 venous, effect of nitroglycerin and of amyl nitrite on, 3323¹.
Blood serum. (See also *Antitoxins; Blood, analysis; Blood sugar; Hemolysis; Syphilis; Wassermann reaction.*)
 acid-combining power of, 2528².
 in acidosis, physico-chem. properties of, 3100⁹.
 action on catalase, effect of fats and lipoids on, 1577⁹.
 action on cell respiration, diagnostic value of, 2080¹.
 activation of yeast-absorbed sera with heated, 1449⁷.
 adsorption of indicator by, in spectrophotometric detn. of pH , 1437⁹.
 agglutinating and phagocytosis-favoring substances of normal, 535⁹.
 agglutinating power of, 3535⁸.
 agglutinating power of immune, variations under influence of the continuous current, 2080⁹.
 agglutinating power of, influence of direct current on, 1582⁹.
 albumin, acid, combinations, 3094¹.
 albumin coeff. of, 1006⁷.
 albumin, mol. wt. of, 2059⁸.
 albumin of, 1580⁴.
 albumin of, compd. with protein, 2348⁹.
 albumins and globulins of, effect of dil. acids and alkalis on, 1870⁹.
 alc.-contg., phys. properties of, 307⁸.
 amino-acid content in malaria and leucemia, 1448⁹.
 amino-acid, use in nutritive troubles of nurslings, 2070⁸.
 in anaphylactic shock, 105⁴.
 anaphylaxis, mechanism of, 1451².
 anion deficit of, 2369⁴.
 antibacterial, serological relations obtained with, 3314⁸.
 antibacteriophage, 114².
 antibotulinus, 1308².
 anticobra, 106⁹, 2707⁸.
 anticolibacillic serotherapy, 2701⁸.
 antidiphtheria, effect of MnCl_2 on antitoxin content of, 1308¹.
 antidiphtheric, pptn. by electrodialysis, 3538⁸.
 anti-fibrinogen, action on red blood corpuscles, 3308².
 antigenic properties of, after heat coagulation, 1891⁷.
 antigenic properties of bacteria giving complement fixation with tuberculous, 327².
 antigen injection and, 3537⁸.
 antigen of heated, 1010².
 antihemolytic property of heated, 1599².
 anti-hog cholera, clarification of, 1449⁹.
 antimeningococcus, effect of Mn on titer of complement fixation in, 1308¹.
 antimeningococcus, flocculation in presence of alc. exts. of meningococci, 3307⁹.
 antinucleoprotein, reactions obtained with, 3314⁸.
 antipeptic action of, 660⁸.
 autophenolase immune, specificity of, 1010².
 antiplatelet, immunity to, 385⁸.
 antipneumococcus, effect of intraspinal injections in pneumococcal meningitis, 2081⁴.
 antipneumococcus, protective substance in, 3536².
 antiscarlet fever, 114².
 antiscorpion venom, 3321⁸.
 antitetan, 114².
 antitetanic, action on strychnine and on tetanus toxin, 105⁴.
 anti-thyroidin, 1307⁸.
 antitoxic, P 3566².
 antitoxic, titration of, 2372².
 antitryptic action of, detn. of, 2850⁹.
 anti-urine, specificity of, 2853⁸.
 atoxyl-resistant lipase in, in diseases of pancreas, 1890⁸.
 bactericidal action of, 1890⁴.
 bactericidal action, role of bacterial ecto- and endoplasm for, 536².
 bacteriolytic substance of, 112⁹.
 bilirubin content of, 105², 858⁹, 2702⁹.
 bilirubin detn. in bile and, as functional test of liver, 102⁴.
 bilirubin of, in infancy, 1008⁹.
 bilirubin reaction in, 1452⁹.
 biol. activity of, relation of physico-chem. state to, 1890⁴.
 bone-forming elements in, 1008⁹.
 books: Quand doit-on consulter le laboratoire? *Bactériologie Sérologie*, 1719⁸; *Lab. Diagnostic Methods*, 2508⁸.
 brain changes due to injection of foreign, 3109⁴.
 from cadavers, formol-gelification and refractometry of, 36².
 calcium and inorg. P content of, effect of hemolysis on, 1448⁹.

- calcium and inorg. P content of, in tuberculosis, 2848^o.
- calcium and K in, effect of light on, 2213^o.
- calcium and Mg in pathol., 2373^o.
- calcium content of, 2520^o, 3275^o.
- in diagnosis and as a gage of progress in sprue, 2703^o.
- effect of phosphate on, 2238^o.
- effect of thyroidectomy on, 103^o.
- effect of ultra-violet irradiation on, 2844^o.
- in epilepsy, etc., 3309^o.
- exptl. alterations in, 98^o.
- in gout, 334^o, 336^o.
- in infantile tetany, 3538^o.
- from mother and fetus, 2073^o.
- in surgical tuberculosis, 326^o.
- in tuberculosis, 2849^o.
- in vegetative neuroses, 1894^o.
- calcium content of protein fractions of, 993^o.
- calcium phosphate soly. product in, 3275^o.
- calcium (ultrafiltrable) in cancerous, 2848^o.
- in cancer, hemolytic reaction toward foreign blood cells, 678^o.
- in cancer, inorg. constituents of, 677^o.
- centrifugal separator for, P 2262^o, P 3566^o.
- changes after castration and after extirpation of uterus, 331^o.
- changes in, after injecting small quantities of crystalloids, 347^o.
- chlorides in, in pathol. conditions, 116^o.
- chlorine content of, relation to gastric secretion, 1001^o.
- cholesterol, albumin and globulin in, in cases with diminishing blood sedimentation rate, 2849^o.
- cholesterol and bile acid concn. of, 105^o.
- cholesterol and fibrinogen content of, effect of primula acid on, 3117^o.
- cholesterol and lipid content of, 2523^o.
- cholesterol concn. of, in cardiac decompensation and kidney amyloidosis, 1305^o.
- cholesterol content of infant, 323^o.
- cholesterol in, in tuberculosis, 3310^o.
- chondroitinsulfuric acid in, 1157^o.
- coagulation of, at low temps., 2058^o.
- colloid lability of, combined with blood lipase detns. in tuberculosis, 3304^o.
- dependence of non-sp. complement fixation on, 1893^o.
- in tuberculosis, 534^o.
- colloid sepn. from, P 3552^o.
- color reactions of, 2372^o.
- complement in, of diabetic and uremic patients, 108^o.
- complements in, recognition of, 1892^o.
- compn. of normal and luetic, 2371^o.
- constituent affecting plain muscle, 1591^o.
- contg. chyle obtained soon after meals, irritating local effect of, 1897^o.
- diagnosis of malignant tumors by, 1890^o.
- dialysis and diffusion of mixts. of arspenamine with, 2241^o.
- diastase and lipase in, uranium acetate action on, 2215^o.
- dried, as complement, 107^o.
- drug-binding power of, 3122^o.
- eclamptic, immunization of guinea pigs with injections of, 3308^o.
- of eel, toxicity of, effect of intraperitoneal or subcutaneous injection on, 1600^o.
- effect of horse, on proteolytic activity of human and rabbit serum, 2849^o.
- effect of horse, on tissue respiration of guinea pig, 2089^o.
- effect of intracutaneous injections on, 1164^o.
- effect of intravenous injection of, on body temp. and leucocyte count, 2085^o.
- effect on bacteria, 338^o.
- on cell respiration, 1890^o.
- on cream formation, 301^o.
- on general circulation of, from patients suffering from hypertension, 336^o.
- on hemolysis, 2235^o.
- on hemolytic photodynamic action, 1716^o.
- on intraocular pressure of, from animal killed by various convulsants, 1453^o.
- on isolated heart, 1901^o.
- on mobilization of blood antibodies, 2849^o.
- on mobilization of blood enzymes, 2849^o.
- on tuberculin in cutaneous reaction of children, 2236^o.
- elec. cond. of, effect of diln. on, 920^o.
- electrodialysis of, 1078^o, 1431^o.
- electrolytic soln. tensions of system: Ag-sheep serum, 1929^o.
- enzymes in pregnancy, 342^o.
- from epileptics, 2701^o.
- euglobulin in syphilitic, 325^o.
- fat-sol. dye soly. in, 306^o.
- flocculation in presence of alc. exts. from corresponding microorganisms, 90^o, 120^o.
- flocculation reaction in tuberculosis, 2848^o.
- flocculation reactions with alc. exts. of erythrocytes, 2854^o.
- flocculation reactions with immune, produced by injections of organ emulsions, 2853^o.
- formalin, 119^o.
- gastrotoxic, 121^o.
- globulin—see *Globulins*.
- glucose, effect on anthrax development, 3537^o.
- glucose, microbial alteration in ampules, 2258^o.
- growth-inhibiting factor in, lipoids as, 2964^o.
- hemokonia in, after various diets, 97^o.
- hemolysis by, electrolyte-lipoid relationships in, 3500^o.
- hemolysis of sheep corpuscles by rabbit, 1803^o.
- hemolytic action of, of cold-blooded animals, 2062^o.
- heterogenetic flocculation occurring on mixt. of immune, and organ lipoids, 113^o.
- human sensitization after large amts. of horse, 111^o.
- hydrogen-ion concn. of, after repeated injections of foreign proteins, 104^o.
- hydrogen-ion concn. of, effect of gelose on, 1895^o.
- hydrogen-ion concn. of, effect of thyroid ext. on, 1298^o.
- identification of heated, 119^o.
- immune, against human erythrocytes, prepn. of, 1894^o.
- immune, behavior in some "lability" reactions, 536^o.
- inactivation of, by yeast or zymen prepn., 3281^o.
- inorg. substances in, compared with those in spinal fluid, 3534^o.
- insulin effect on components of, 1904^o.
- interferometric investigation of, 114^o.
- ion distribution in, 2214^o, 2.
- ionic equil. of blood during serum shock, 119^o.

- ions in, in kidney diseases and in pneumonia, 2984^o.
- iron content of, 3529^o.
- in kidney disease, 1158^o.
- lecithin flocculation test, 2854^o.
- lipase, effect of I on, 1868^o.
- lipase inactivation as tuberculin test, 329^o.
- lipase of, 1717^o, 1870^o.
- lipoid equil. in, 1450^o.
- lipoids in, of nervous patients, 1450^o.
- lipoids, relation to protein fractions, 2853^o.
- lipolytic power of, demonstration of, 3524^o.
- magnesium content of, 3109^o.
- mixts. of arsphenamine and, dialysis and diffusion of, 3117^o.
- non-protein substances contg. N in, toxicity of, 3317^o.
- osmotic pressure of protein of, in relation to edema and arterial hypertension, 118^o.
- oxidative enzymes in, 1297^o.
- oxygen consumption by coagulated sheep, effect of bacteria on, 3511^o.
- peptidase in, 2527^o.
- photochem. reactions of, 2371^o.
- phys. chemistry of, 1736^o.
- physicochem. consts. of, 2527^o.
- porphyrin in, 303^o.
- potassium content of, after ingestion of KCl, 1297^o.
- potassium in ultrafiltrates of, 322^o.
- precipitating action of beef, 1892^o.
- precipitating anti-, preservation of, 2701^o.
- precipitating, decrease of potency of, 2372^o.
- precipitation in active tuberculosis, 2849^o.
- precipitation of, 661^o.
- precipitogen of heated, 119^o.
- in pregnancy, carbon dioxide and alkali in, 1011^o.
- in pregnancy, labor and childbed, 1888^o.
- pregnancy reaction, 2079^o.
- protease of, adsorption by kaolin, 1287^o.
- protein concn. of, effect of method of sampling on, 2218^o.
- protein concn. of, in tuberculous guinea pigs, 326^o.
- protein formation in immune, 341^o.
- protein fractions of, 3531^o.
- protein pptn. from, 2213^o.
- proteins of, 665^o.
- action of chloral hydrate on, 3315^o.
- in cancer, 1451^o.
- effect of albumin-globulin ratio on osmotic pressure of, 3279^o.
- effect of incubation fever and reconvalescence of acute infections on, 1595^o.
- influence of H-ion concn. on salt flocculation of, 3277^o.
- in malignant tumors, 1158^o.
- modification in immunization, 1896^o.
- pptn. curve of, 1430^o.
- reaction with CH₃O, 2678^o.
- protein therapy effect on, 2234^o.
- quinine-fast lipase in, of malaria patients, 2528^o.
- of rabbits immunized against globulins from human, 112^o.
- of rachitic chicks, P, Ca and alk. reserve of, 1292^o.
- reaction of, of birds, 2367^o.

xanthate, 2459².
- Cadmium hydroxide,** soly. of, 3408⁴.
- Cadmium iodide,** adsorption by active charcoal, 1646².
coloration by X-rays, 777².
compd. with KI, 1979².
entropy of, 3204².
heat of soln. of, 196¹.
ionization of solid, 1213².
soly. in pyridine, 1801².
specific heat of solns. of, 769², 2160¹.
spectrographic study of complex, 1818².
- Cadmium lanthanum nitrate,** 2309².
- Cadmium neodymium nitrate,** 2309².
- Cadmium oxide,** as catalyst, activity of, 1525⁷.
elec. resistivity of, 1644⁷.
reaction with B₂O₃, 1107¹.
soly. of, 1519², 1835⁴.
- Cadmium permanganate,** decompn. by heat, 3413².
- Cadmium salts,** reduction by Na in liquid NH₃, 787².
- Cadmium silicates,** 619¹.
- Cadmium sulfate,** detn. of, 2465².
dissoc. of, 3201².
recovery from flue dust, etc., P 3570^{2,4}.
- Cadmium sulfide,** analytical behavior of, 622^{2,2}.
as catalyzer for C₂H₂-H₂S reaction, 463².
Cd(HS)₂ as adsorbent in study of protection of colloidal solns. by soap soln., 3397².
colloidal, adsorption of sugars by, 3187².
manuf. of, 2728².
oleate sols of, ultrafiltration tests on, 3050².
prepn. of, electrolytically, 3415².
review, 1998².
- Caesalpinia coriaria.** See *Divi-divi*.
- Caesium.** See *Cesium*.
- Caffeic acid** (3,4 - dihydroxycinnamic acid), prepn. of, 2475².
- Caffeine** (1,3,7 - trimethylxanthine). (See also *Coffee; Tea*.)
acid formation in muscle induced by, 127².
alkaluria after administration of, 3306².
compd. with resorcinol, 2104².
detection of, 150².
detn. in coffee exts., 1917⁴.
distinguishing from theobromine, 223².
diuretic action of, 1906².
effect on action of anesthetics, 3123².
on cerebral function, 1164².
on chloride and water distribution in the body, 1908².
on heart, 2534¹, 2534², 3128².

Carbon disulfides. See *Carbon disulfide*; *Carbon subsulfide*.
Carbon tetrabromide, crystal structure of, 754².
 dissolution in liquid H_2S , 3226¹.
 reaction with $\text{N}_2\text{H}_4 \cdot \text{H}_2\text{O}$, 2027².
Carbon tetrachloride, absorption and excretion of, 1912².
 adsorption by silica gel, 2290⁸.
 as anthelmintic, 539², 2709².
 chlorine soly. in, 2437².
 chloroform from, P 1866⁹, P 3272².
 condensation with aromatic amines, 645².
 condensation with phenol, 649².
 corrosion of metals by, 3214².
 dielec. const. of, 2594².
 dielec. const. of, and of mixt. with CS_2 and with CHCl_3 , 7².
 dielec. const. of, pressure coeff. of, 3058², 3058².
 dissolution in liquid H_2S , 3226².
 effect on inflammability of Cl_2 -air mixts., 178².
 on limits of inflammability of mixts. of inflammable gases and air, 2274².
 on smooth muscle of blood vessels, 8112⁴.
 emulsification with wool fat, P 2393².
 equation of state for, 1073².
 ethyl acetate in combination with, as fumigant, 2544⁴.
 evapn. of, calcn. of speed of, 757².
 heat of dissoc. of, 1814².
 heat of soln. of Cl_2 and HCl in, 1982².
 hookworm disease treatment with mixt. of ascaridole and, 1457².
 internal pressure of, 3394².
 liver injury produced by, effect of diet on, 1003².
 mixt. with EtOH , compn. of vapors from distn. of, 594².
 mixt. with EtOH , const. evapg. mixt., vapor pressure and d. of, 758¹.
 mixt. with EtOAc for fumigation against grain weevil, 1173².
 photochlorination of aliphatic compds. in, 440², 1376⁴.
 poisoning, effect on blood fibrin, 1451².
 polarization of light scattered by vapors of, 2600².
 purification of, 1690².
 reaction with dibenzoyl peroxide, 1259⁴.
 reaction with resorcinol, 2487¹.
 refractive index of, in elec. field, 772².
 resistance of H_2veg to, 3039².
 specific heats of mixts. with CHCl_3 and with C_6H_6 , 2445².
 surface tension of water dropping into satd. vapors of, 2895².
 system: EtOAc -thymol-, b. p. vs. vapor compn. of, 2588^{2, 4}.
 systems: PhOMe -, and PhOH -, 1702².
 system: $\text{C}_6\text{H}_5\text{CH}_2$ -rice starch-, viscosity of, 3193².
 toxicity of, 355².
 toxicity to cats, 3544².
 viscosity of mixt. with C_6H_6 , 1361².
 viscosity of SO_2 and of Cl_2 solns. in, 1215².

- Carbon tetraiodide**, crystal structure of, 754⁶.
Carbon trichloride. See *Ethane, hexachloro-*.
Carbonyl azide, 245².
Carbonyl chloride. See *Phosgene*.
Carbonyl compounds, hydrogenation of, 58².
 metal compds. of enol forms of, and use in syntheses, 2816².
 reaction with azomethines, 2335².
 from tertiary amino alcs., 636².
Carbonyl group, effect on long-chain compds., as detd. by Röntgen-ray reflection, 1693¹.
 effect on reactivity of the halogen atom, 2027⁷.
 —, *dithio-*, name for, 2145³.
Carbonylhemochromogen, dissoc. curve for, 3098⁴.
Carbonylhemoglobin, dissoc. curve for, 3098⁴.
 reaction with O, 659¹.
 ultra-violet light effect on, 3278⁷.
Carbonyl sulfide, addn. compd. with dimethylketene, 2189¹.
Carbopropoxyhydroxamic acid*, and derivs., 969².
 —, *N*-benzyl-, benzoyl ester, 969².
 —, *N*-ethyl-, derivs., 969², 970¹.
Carboraffin. (See also *Sugar manufacture*.)
 filtration consts. for, detn. of, 364².
Carborundum. (See also *Silicon carbide*.)
 crystal structure of, 1212², 3393⁷.
 elec. cond. of electrolyte solns. in powdered, 923⁷.
 electro-endosmosis through diaphragm of, 771².
 electro-osmosis through, effect of anions and cations on, 1984².
 lining for gas generator, 2405⁷.
 manuf. of, 12², 3224⁴.
 refractories, thermal cond. of, 1934².
 thermal cond. of, 1934².
Carbostyryl, prepn. of, 1572⁴.
 —, 4 - (3-hydroxy - 4 - methoxystyryl)-, 1278².
 —, 4-(*o*-hydroxystyryl)-, 1278².
 —, 7-methoxy-4-methyl-, 292².
 —, 4-(*p*-methoxystyryl)-, 1278².
 —, 4-methyl-, reaction with aromatic aldehydes, 1278².

 radium action on, 3512¹.
 sap of, importance of maintaining certain differences between external medium and, 2513².
 sap of, relations of compn. of, to that of its exterior medium, 2506².
 sap of valonias, 2513².
 secretion, fatty substance in, 2223¹.
 starch formation in, effect of turgor on, 83².
 vital coagulation in, 1585².
Cells, voltaic. (*Under this heading all primary cells are indexed. For secondary cells see Accumulators; see also Depolarizers; Electrodes; Polarization, electric.*) (Patents) 14²; 214²; 611²; 1541^{2,3}; 1824²; 2170²; 2606^{2,3}; 2786²; 3224².
 amalgam, manipulation of, 3204¹.
 battery compd., elec. heat used for, 3223².
 calomel half-, for H-ion measurements, 2147².
 case and connectors for, P 1101¹.
 chloride, development in, 3065².
 concn., e. m. f. of, contg. BaCl₂, 2900¹.
 e. m. f. of, contg. 1 electrolyte distributed between 2 solvents, 3204².
 e. m. f. of, with K-Hg electrodes in KOEt solns. in EtOH, 3206².
 with concentric chambers, P 1381¹.
 Daniel, at higher temps., 2161¹.
 diffusion potential in concn., influence of activity coeff. on, 1222².
 dry (Patents), 14², 214^{2,3}, 443², 612^{2,3,7}, 784^{2,3}, 938², 1101¹, 1229^{2,4}, 1381¹, 1542^{1,2,3}, 1666¹, 1824², 1993², 2171², 2303^{2,7}, 2786², 2917^{1,2,3}, 3224^{2,3}, 3433^{2,3}.
 dry, assembling, filling and packing, P 214².
 assembly of, P 1666².
 carbon pencils for, P 1381¹.
 coating zinc cans of, P 214².
 effect of superposed a. c. on Zn-H₂SO₄-C, 1069².
 electrode, contact and electro-kinetic potentials of, 1652².

- electromotive force of chem., contg. 2 diff. electrolytes in same pair of solvents in 2 halves of the cell, 3204⁴.
 electromotive force seat in, 6117.
 for flash lights, P 214⁴.
 for hydrogen-ion detn., P 6137.
 industry of, 2916⁴.
 internal resistance of, measurement of, 1086⁵.
 of layer compression type, P 2917⁴.
 Leclanché, P 2917³.
 Leclanché, for pocket flashlights, 2605⁴.
 for miners' lamps, etc., P 784³.
 mixt. for dissolving in electrolyte of, P 1992⁹.
 Nyberg, 1086⁴.
 photoelec., 13², P 212³.
 contg. fluorescent liquids, role of ionization in, 935⁴.
 electrodes for, P 2304².
 in photometry, 10877.
 silver iodide behavior in, 1377³, 2167³.
 from radioactive materials, 13¹.
 review, 2785².
 selenium, P 194³.
 standard Cd, decrease in e. m. f. of unsatd., 2772⁴.
 reproducibility and constancy of, 1983⁷.
 unsatd., 2169⁷.
 terminals for, P 611³.
 thermodynamics and kinetics of liquid chains, 2773¹.
 thermoelec., P 443⁷.
- Celluloid**, adhesive for, P 3356³.
 balls of rubber and, P 2146⁸.
 camphor in, optimum content of, 1626³.
 cellulose nitrate from wood as material for, 1055².
 cellulose nitrate in, acetanilide and urea as plasticizer and stabilizer of, 1626⁴.
 coating, with metal, P 1331³.
 collodion, evolution of, 3590¹.
 decolorizing dyed, P 2867⁴.
 decompn. by heat, 894¹.
 double refraction in, 763³.
 fire hazard and shipping of, 895².
 manuf. of, 172³.
 mol. dimensions of, 753².
 nitrates of oxycelluloses, hydrocelluloses and cellulose hydrates in relation to, 727⁷.
 optimum working condition of, from standpoint of stability, 2411².
 paint or stain for, P 739⁴.
 porous articles of, P 3018⁹.
 stability of, 1055⁴.
 stability of, effect of Zn white on, 1026³.
 tips on shoe laces, P 157⁷.
- Celluloid substitutes**, P 3593¹.
 noninflammable, P 177⁴.
- Cellulose**. (See also *Copper-ammonia cellulose*; *Hydrocellulose*; *Lignocellulose*; *Oxycellulose*; *Paper pulp*; *Silk, artificial*; *Sulfite liquor*; *Threads*; *Viscose*.)
 ability to react in solid state or in soln., 893³.
 acetolysis of, 3161³.
 acetylation of—see *Cellulose acetates*.
 acid effect on, 2128¹.
 adsorption and swelling of fibers of, 3017³.
 adsorption of alkalies by, 2152³, 2273³, 3188¹.
 age of, effect on nitrocellulose from, 893³.
 alkali, 1051^{1,3}, 1945⁷, 2272³, 3016⁹, P 3163⁴.
 alk., liquors, purification of, P 382⁹.
 alpha-, detn. of, 170³, 2127³.
 bacteria (aerobic) dissolving, 2685⁴.
 bacterial destruction of, 2744³.
 bacterial disintegration of, by intestinal and fecal organisms, 2229⁹.
 bases and, 1050³.
 boilers, conserving heat from, P 399¹.
 direct heating of, P 1348².
 heat utilization from, P 2564⁴.
 books: Cotton, 1055³; Die Cellulosefabrikation, 1496³, 2564⁷; Textbook of, Chemistry, 1629¹.
 carbohydrates (sol.) from, P 2745⁵.
 carbonization of, 1043².
 chem. products of, 575⁷.
 chemistry of, 2417².
 chlorination in manuf. of, P 2273⁷.
 chlorination of, P 1347³.
 from *Cladium mariscus*, 1051⁴.
 colloidal Fe action on, 171¹.
 color removal from dyed, P 1196⁷.
 compds. with metallic bases, 1946¹.
 constitution and spontaneous inflammation of, 171³.
 constitution of, 79³, 170⁴, 727⁴, 2272¹, 2811⁴.
 cooking sulfite, 1495¹.
 copper no. of, detn. of, 727³.
 copper nos. of materials contg., detn. of, 3016².
 in cotton, alteration by chem. agents used in tech. processes, 2879⁹.
 crystal structure of, 575³.
 cutting device for sheets of, P 729⁹.
 decompn. of, by aerobic microorganism, stimulating action of org. compds. on, 2512².
 in mixt. with CO and H₂O, 390⁴.
 in soil, organism responsible for, 2859⁴.
 in tilled soil, action of manure in, 1469⁴.
 definition of, 170³.
 degradation by formic acid, 3016³.
 derivs., P 3163³.
 derivs., etc., P 3592^{2,7}.
 detn. in oxycellulose, 3373³.
 detn. in wood, 3162⁴.
 detn. of incrusts, in soil, 3336⁹.
 diacid carbonate, dimethyl ester, 251³.
 differentiation of wood, from cotton, 172³.
 from diff. sources and made by diff. processes, 1947².
 digesting expts. with sulfite, 172².
 digestion in man, 1720³.
 dispersion and aggregation of, 3588¹.
 dispersion in aq. solns. of Ca(CNS)₂, 3589⁹.
 dispersing of, 2897⁴.
 dispersoidology of, 2897².
 distn. of, 41⁴.
 drying app. for, P 729⁹.
 effect on N content of soil, 373³.
 elec. gas purification in manuf. of, 3224³.
 enzymic degradation of, 3278^{3,4}.
 esterifying—see *Cellulose esters*.
 fiber, fine structure of, and its significance in purification processes, 2128⁴.
 fibers, 3373¹.
 fibers and fabrics, treatment of, P 3163³.
 fibers, gliding plane of, 2877⁷.
 fiber X-ray diagrams of, changes in, due to swelling in concd. aq. solns., 2890⁹.
 framework of the plant, synthesis and degradation of, 2363².
 heat action on cotton, 1351³.
 heat distribution in manuf. of, 170⁴.
 heat effect on, 893³.
 heat of combustion of, 2553⁴.
 humin formation from, by fungi, 2508⁷.

- hydrate and its reversion products, X-ray diffraction patterns of, 1773⁹.
hydrate, bottle caps, etc., of, P 1348².
hydrates, dehydrating, P 2745⁷.
hydrates, nitrates of, 727⁹.
hydrolysis of, effect of $MgCl_2$ on, 2789².
hydrolysis products of, treating, P 3018².
identity of, in all plants, 3014⁵.
indicators for, industry, 2743².
jute, 1494⁹.
ketonic chlorides in, pulp, solubilizing, P 3091¹.
lichenin and, 1583³.
lye removal from fibers, P 1055⁷.
manuf. of, kinetics of, 3162³.
phys. chemistry of, 1704⁷.
by Rinman process, 1053⁹.
nitration—see *Nitrocellulose*.
oxidation of, 7281¹.
oxygen no. of, 3373².
plasticity of, in cuprammonium hydroxide, 1945⁹.
polymerization of, 2271⁹.
prepn. and nitration of, P 1347⁷.
prepn. for esterification, P 2411².
purity of wood, 894².
reddening of sulfite, 2563¹.
reduction capacity of prepn. of, detn. of, 1346⁹.
from redwood tree waste, 1501¹.
regenerating, from viscose, P 1496⁷.
reinforced sheets of, P 3592².
research on, 11961¹.
reserve, 661⁵, 1196⁵.
residues in coal, 807².
resin by-products of sulfate, refining alkali salts of, 1497¹.
from seaweed, P 398⁸.
sodium hydroxide absorption from solns. by, 1050².
sodium hydroxide action on, 1050³.
soln. in ammoniacal Cu oxide, 25624².
solns. and derivs., P 177¹.
solns. and their derivs. and products, P 3987⁸.
in spruce (red), effect of light during growth on content of, 3162⁴.
in spruce wood, 3014⁵.
standard, prepn. of, 575⁵.
from straw, use of soda and Cl in isolation of, 171⁷.
swelling of cotton, 2416³.
swelling of, in aq. and alc.-aq. NaOH, relation between the X-ray diffraction pattern and the alkali content during, 1774².
as termite food, 2090⁷.
thiourethans, articles from, P 3593¹.
treatment with H_2SO_4 and $AcOH$, P 2878⁹.
viscosity of cotton, 2272².
viscosity of solns. of, detn. of, P 1629².
waste gases from cookers, utilization of, P 3592¹.
waste liquors, alkali recovery from, P 399¹.
waste water from plants for, 2131⁹.
water detn. in, 2128⁵.
from wood, P 1496⁷.
Cellulose, heptamethyl-, 894¹.
——, **nitro**. See *Nitrocellulose*.
——, **trimethyl-**, 1410².
Cellulose acetates. (See also *Dopes; Threads; Varnish*.)
acetic acid recovery from solns. of, P 2878⁹.
acetylated solns. of, P 3373⁵.
articles of, P 1497¹.
artificial silk, etc., from, P 404⁸.
caps for sealing bottles, etc., P 729⁵.
for coating and impregnating compns., P 2878⁹.
colloidized, P 3018⁴.
compns., P 1629², P 1948⁹.
dissoln. in mixed liquids, 762².
dyeing, P 404², P 579⁷, P 736⁷, P 1059³, P 1351⁹, P 1352², P 1632⁹, P 1781⁷, P 1952⁹, P 2136², P 2751¹, P 2880⁴, P 3021⁸, P 3599⁴.
dyeing mixed fabrics contg., P 403⁹.
dyeing, purple, P 3379¹.
dyeing, with anthraquinone colors, 2413⁹.
dyes for, P 1632⁹, P 3598⁹.
fabrics contg., P 2136⁴.
filaments from, P 398⁹.
film of cellulose nitrate and, P 1776².
manuf. of, 171², P 177², P 399⁴, P 729⁹, P 1497¹, P 1948⁹, P 2131⁹, P 2745⁹, P 2878⁹.
for photographic and cinematographic films, 2788¹.
printing, P 3599².
for sealing receptacles, P 1776⁴.
solvent for, P 894².
stability of, 1195⁵.
stabilizing solns. of, P 2751².
tri-, 3162¹.
as ultrafiltration membrane, 3050².
ultrafiltration through, 1977².
Cellulose acetate nitrate, 1626¹.
Cellulose esters, P 729⁴, P 3163⁷, P 3593².
alc. as solvent and gelatinizing medium for, P 1629².
of carbonic acid, 251².
compns., P 3593⁷.
from corn cobs, P 894².
dissolving, P 2745⁴.
dyeing, P 183¹.
dyeing properties of, 2749¹.
fibers, crinkling and "delustering" of, P 3593⁵.
films from, P 1948⁸.
fire-resisting compns. of, P 2131⁵.
laminated film contg. cellulose ether and, P 576⁹.
manuf. of, prepn. of cellulose for, P 2411⁵.
metal-coating sheets of, P 1529⁹.
sheet material from, P 1055⁴.
solvents for, P 3593⁹.
stability of, 1495⁴.
threads and films from, P 1352⁴.
threads, filaments, films, etc., from, P 3018¹.
viscosity of, reduction of, P 1948⁷.
Cellulose ethers. (See also *Photographic films*.)
P 176⁹, P 2411¹, P 3163⁷, P 3592⁴, P 3593².
alc. as solvent and gelatinizing medium for, P 1629².
colloidized, P 3018⁴.
for films, P 576⁹, P 3593².
for films, etc., P 3593².
films from, P 1948⁸.
laminated film contg. cellulose ester and, P 576⁹.
solvent for, P 3018².
threads and films from, P 1352⁴.
Cellulose nitrates. See *Nitrocellulose*.

 oxidation of, P 1182^a.
 of quinequivalent Cr, 1385^a.
 sodium tetrathiocyanodiaminochromate, pharmacol. action of, 137⁷.
 tartrates, 1521^a.
 tri- γ -bromoacetylacetonato-Cr and tri- α , γ -dibromoacetylacetonato-Cr, 2450^a.
- Chromium formate**, violet chromous, 3071¹.
- Chromium hydroxide** (Cr(OH)₃), colloidal, coagulation of negatively charged, by electrolytes, 3046^a.
 colloidal, physico-chem. analysis of, 3192^a.
 colloidal, stability of, 1517^a.
 system: chromite-NaOH-, 762^a.
- Chromium ions**, magneton nos. of, 2775^a.
- Chromium oxides**, infra-red emissivity of, 3220¹.
 reaction with B₂O₃, 1107⁷.
 Cr₂O₃, soly. in liquid SO₂, 3416^a.
 Cr₂O₃, addn. to silica bricks, 566¹.
 allotropy of, 1799¹.
 catalysis of decompn. of H₂O₂ by, 1525^a.
 colloidal, adsorption during pptn. by electrolytes, 761¹.
 colloidal, reciprocal pptn. of gelatin and, dependence on equiv. aggregation of micelle of, 3614^a.
 decompn. by fusion, 450⁷.
 dissoc. of, 3201^a.
 from leather scrap, 1206^a, P 3614^a.
 magnetic susceptibility of, 1653^a.
 solid solus. of, in Fe₂O₃, 2293^a.
 Cr₂O₃, effect on sensitivity and latent image of the photographic plate, 16^a.
 system: H₂BO₃-H₂O-, 3055⁷.
- Chromium potassium fluoride**, 3071¹, 3440^a.
- Chromium potassium sulfate**. See *Alums*.
- Chromium salts**, effect on hide substance, 3614¹.
 on leather fiber, detn. of basicity of, 585¹.
 purification of, P 563⁷.
- Chromometer**, in color development, 3208^a.
- Chromogens**, function in dye formation, 3599^a.
 in *Mercurialis*, 2224^a.
 of methylene blue in diagnosis, 3306^a.
 pharmacognosy and, 1930^a.
- Chromoisomerism**. See *Isomerism*.
- Chromol**, paints and preps., 1056^a, 2136^a.
- Chromone** (1,4-benzopyrone; γ -benzopyrone).
- Chromone**, 3-acetyl-2,8-dimethyl-, reaction with NH₃, 1423^a.
 —, 2,8-dihydro-. See *4-Chromanone*.
 —, 2,8-dihydro-2-phenyl-. See *Flavanone*.

- Coconut**. (See also *Copra*.)
 charcoal, as catalyst, P 78^a.
 press cake, vitamin A content of, 2517¹.
 sugars in, water, 547⁴.
 tryptophan and cystine content of proteins of, 2062¹.
- Coconut oil**, analysis of mixts. contg. palm kernel fats and, 2004¹.
 compn. of, 1204¹, 1503^a, 1633^a.
 detection of traces of alkali or soap in, 582^a.
 detn. in margarine, 3134¹.
 fatty acids in, 1503¹.
 neutralization no. of, 1504¹.
 sapon. velocity of, 1785^a.
 soaps contg., examn. of, 410^a.
 soaps, detn. of fatty acid content of, 410^a.
- Cocoons**, coloring matter of Yamamai, 541¹.
- Coctoimmunogen**, of variola vaccine virus, 857¹.
- Codeine**. (See also *Opium alkaloids*.)
 $N, N' - (2,3 - \text{butylene})\text{bis}[p - (p - \text{sulfo-phenylazo})\text{-aniline}] \text{ salt}$, 2936¹.
 color reaction of, 2999¹.
 detn. in tablets, 3146¹.
 effect of morphine and, on gastro-intestinal tract, 3325¹.
 effect on action of morphine on gastro-intestinal tract, 2086¹.
 effect on respiration, 1598^a.
 excipient for pills of terpinol and, 2259¹.
 hydrochloride, melting point of, 1930^a.
 identification of, 3144^a.
 phosphate, ionization const. and indicator for, 2107¹.
 reaction with SOCl_2 , 2828^a.
 silicoduodecitungstate, 792^a.
 sublimate of, 701^a.
 titration of, 702^a, 2388^a.
- Codeine**, bromo-, prepn. and catalytic reduction of, 2828^a.
 —, bromodihydro-, 2828^a.
 —, chloro-, prepn. and catalytic reduction of, 2828^a.
 —, chlorodihydro-, 2828^a.
 —, dihydro-, 2828^a.
 —, dihydrodesoxy-, derivs., 297^a.
 —, dihydro-*des-N-methyl*dihydro-, derivs., 2827¹.
 —, dihydro-*des-N-methyl*dihydro-nitro-, nitrate, 2827¹.
- Codeinone**, allylnordihydrohydroxy-, -HBr, 299¹.
 —, allylnorhydroxy-, -HI, 299^a.
 —, bromo-, reaction with $\text{Na}_2\text{S}_2\text{O}_4$, 2828^a.
 reduction of, 297¹.
 —, bromodihydrohydroxy-, and derivs., 297¹, 298¹.
 —, bromodihydrotrihydroxy-, and monoacetate, 298^a.
 —, bromohydroxy-, and derivs., 298^a ^a.
 —, cyanononacetaldihydrohydroxy-, 299^a.
 —, dibromohydroxy-, and derivs., 298^a ^a.
 —, dihydro-, manu. of, P 1576¹.
 —, dihydrohydroxy-, azine with acetone, 299^a.
 hydrazone, 299¹ ^a.

- reaction with cyanogen bromide, 299^g.
 —, **dihydro - des - N - methylidihydro-***, and derivs., 2827¹.
 —, **dihydrotrihydroxy-**, 298^g.
 —, **dihydroxy-**, 297^g.
 —, **hydroxy-**, azine with acetone, 299^g.
 hydrozone, 299^{1,2}.
 reaction with bromine, 297^g.
 reaction with cyanogen bromide, 299^g.
 —, **des - N - methylidihydro-***, oxime, 2827¹.
 —, **nitrosonordihydrohydroxy-***, 299^g.
 —, **nitrosonorhydroxy-***, 299^g.
 —, **nordihydrohydroxy-***, -HI, 299^g.
 —, **norhydroxy-***, and -HBr, 299^g.
 —, **tribromodihydrohydroxy-**, and derivs., 2987².
Codeinone ketimine, dihydrohydroxy-*, 299^g.
Codeinonesulfonic acid, hydroxy-*, 298^g.
Codfish, muscle of, autolysis of, 1577¹.
Codide, α (and β)-chloro-, 2828^g.
Codling moth, arsenical requirements for control of, 1750^g.
Cod-liver oil, antiophthalmic and antirachitic properties of, non-precipitability by digitonin, 2691³.
 antirachitic action of, 354³.
 antirachitic active principle of, pharmacol action of, 1586^g.
 antirachitic activity of, effect of irradiation on, 2691².
 antirachitic effect of, fed to mother during pregnancy or lactation on offspring, 3295^g.
 antirachitic substance in, resistance to re-
 . agents, 2971⁷.
 antirachitic therapy with, 1002^{2,3}.
 and by-products, 2550².
 color reactions of, 1474².
 concentrate possessing therapeutic properties of, 2863^g.
 effect of feeding excess of, 2515³.
 effect of feeding to cow on vitamin A in milk fat, 532^g.
 effect on calcium and P metabolism in tetany, 1006^g.
 on dogs convalescing from distemper, 2708¹.
 on gastric secretion, 851^g.
 emulsions of, water-in-oil, 2767^g.
 emulsions, vitamins in, 1150^g.
 growth-promoting and antirachitic value of, when injected intraperitoneally, 1882^g.
 improvement of flavor and odor of, P 380^g.
 iodine in, 1466^g.
 manuf. of, P 560², P 2754⁴.
 oxidation of, 2366².
 oxidation of, ultra-violet light and, 3499^g.
 photochemistry of, 2964^{2,3}.
 radiation effect on, 2533¹.
 reviews, 316^g, 2259².
 tablets, P 3586^g.
 tasteless, manuf. of, 2365².
 vitamin-A content of, 94², 316^g, 2516^g.
 vitamin A of, durability of, 315¹.
 vitamin A of, stability towards hydrogenation, 95^g.
 vitamin potency of, 670^g, 2365^{1,2}, 3520¹.
 vitamins of, 1726^g.
Coenzymes, in muscle, 3497^g.
 reactivation with artificial, 3497^g.
Coffee. (See also *Caffeine*.)
 book: Resources of the [Brit.] Empire, 1464².
 caffeine detn. in exts. of, 1917⁴.
 effect on cerebral vessels, 1457^g.
 on globulin fraction of protein body when given intravenously, 1452^g.
 on nervous system, 539¹.
 from Sierra Leone, 362^g.
 sol. powder, P 145^g.
Coffee substitutes. (See also *Beverages*.)
 P 1323², P 2714⁴.
 from figs, 1917².
Cognacs, ester coeff. of, 2257^g.
Cohesion, detn. of, of soils, 2097⁷.
 in dielectrics (solid), 775².
 forces of liquids, 3185^g.
 of liquids, 1810^g.
 of metals, calcn. of, 600⁴.
Cohune nut, tryptophan, and cystine content of proteins of, 2062¹.
Coins, Wu-chu, compn. of, 3209¹.
Coke, ash, effect on quality, 3010².
 from ash-free materials, 1043².
 blast-furnace, 3236¹.
 combustibility of, 1939^g.
 economy in consumption of, 3452^g.
 influence of temp. of coking on properties of, 1045².
 from blended coal, 886⁷.
 blending coal for, 720⁴.
 breeze, firing, 3370¹.
 steam generation from, 3369^g.
 washing app. for, P 1068^g.
 briquets—see *Briquets, fuel*.
 charging, to gas generators, 2405^g.
 classification of, 2269^g.
 coal for, testing, 720⁷.
 coal washing for, 570⁴.
 coke-oven, manuf. of, 2122^g.
 combustibility of, 1045¹.
 combustion of, at tuyère level of the blast furnace, 2469⁴.
 combustion of, in one stage, 2122^g.
 constitution of, 2123².
 cooling app. for, P 1623^g, P 2558^g.
 cooling, with inert gas, 721^g.
 degasification and reactivity of, 1038^g.
 density of, detn. of apparent, 721^g.
 from Derbyshire coal, 822⁷.
 formation of, 1191⁴.
 foundry, 956^g.
 foundry, examn. of, 629^g.
 fuel compn. from, P 723⁴.
 gasification in steam, 3368^g.
 in gas industry, 1937^g.
 for gas manuf., analyses of, 2404⁷.
 gas, moisture absorption by, 2266^g.
 grain size of coal and, 162⁷.
 grinding, for analysis, 1770⁴.
 heat per l. of O used in combustion of, 3040^g.
 as household fuel in central Canada, 1838^g.
 hydrogenation of semi, oil obtained by, 2739¹.
 incandescent, app. for handling and feeding to producers, P 394⁴.
 industry in Middle Germany in 1924, 1936⁵.
 industry in 1924, 3580^g.
 from lignite, 1485¹, 3009^g.
 lignite, reactivity of, 3155².
 lignite semi-, hydrogenation of, 1768^g.
 from low-temp. carbonization, 1042^g, P 3157⁴.
 increasing density of, 721⁴.
 prepn. of dense, 2738⁴.
 manuf. in Roumania, 280^g.
 metal-contg., P 1046⁴.

- metallurgical, P 1193^a.
 in metallurgy, effect of purity of, 1480^a.
 nitrogen detn. in, 2465¹.
 from peat, 572².
 from peat, etc., P 2558⁷.
 peat, physicochem. properties of, 2122^a.
 photomicrographs of, 2118^a.
 production and uses of, 2122^a.
 as product of carbonization and fuel for gasification, 2122^a.
 products from horizontal retorts, improving quality of, 2407⁴.
 properties and utilization of, 3155¹.
 properties desirable in, for various purposes, 2120^a.
 quenching, P 1193^a.
 reactivity of, 721¹, 3368⁷.
 resources of U.S. in 1922, 1622^a.
 retort battery, P 1490⁹.
 review, 1191⁷.
 screening device for, 2556¹.
 in smoke abatement, 1486^a.
 solidification of, detn. of temp. of, 884².
 specific heat of, 3011².
 standards, 3009⁴.
 structure of, 883¹, 3011¹.
 sulfur content of, effect on cost of Fe, 629¹.
 sulfur in, and its elimination or neutralization, 1119^a.
 sulfur in, from Canadian Maritime Provinces, 1936¹.
 sulfurous-carbon compds. in, 431².
 tech. progress in study of, 2269⁴.
 testing, 3368^a.
 utilization of fines in gas producers, 2405^a.
 value of fuels, detn. of, 1041².
 water content of, 718².
 yields by high- and low-temp. carbonization, 2407².
- Coke ovens.** (See also *Gas, illuminating and fuel.*) (Patents.) 167³, 394³, 573⁹, 722⁹, 723⁷, 1046⁵, 1193⁹, 1623^a, 2123^a, 2761¹, 3370⁹, 3583⁴.
 by-product, P 1490⁹, P 1491¹.
 by-product practice, 3369⁹.
 charging, P 2740¹.
 coal testing in, P 888².
 decarbonization of, P 1046⁵.
 development and operation of Smet-Solvay and Coppée, 2407^a.
 European, 2556¹.
 gas flow in, 1342^a, 3369^a.
 gas main valve, P 2407^a.
 gas works, 2406^a.

2,5-Cresotamide, 52¹.
 derivs., rearrangement of, 1416⁸.
 —, ***N*-acetyl-**, rearrangement of, 1416⁸.
 —, ***N*-benzoyl-**, rearrangement of, 1416⁸.
2,3-Cresotic acid, derivs., 51⁹.
 ester with the benzyl ester of ecgonine, and picrate, 2343⁹.
2,4-Cresotic acid, acetate, medicinal tablets of, P 1179⁹.
 derivs., 51⁹, 52¹.
 ester with the benzyl ester of ecgonine, and picrate, 2343⁹.
2,5-Cresotic acid, derivs., 521⁹.
2,6-Cresotic acid, **5-isopropyl-**, as antirheumatic and analgesic, P 1615⁴.
Cresotinamide. See *Cresotinamide*.
Cresotinic acid. See *Cresotic acid*.
Cresylic acid. See *Cresol*.
Cresyl phosphate, as lacquer plasticizer, 3604².
Cretinism, effect of thyroid therapy on neuromuscular activity in, 2529⁶.
Crime, detection of, chemistry in, 912⁸.
Crioceris asparagi, metabolism during embryonic and metamorphic development of, 2536⁹.
Cristobalite, crystal structure of, 1213¹.
 crystal structure of high-temp. form of, 2287².
 formation in Martin furnace, 2621⁴.
 Röntgen-ray diffraction by α - and β -, 3181¹⁷.
 transformations of, 2794⁹, 3447⁷.
Crithmene, 1614⁴.
Crithum maritimum, essence of, 1614⁴.
 oil of, from Sardinia, 1929⁶.
Critical constants, of hydrocyanic acid, 3394⁸.
 internal pressure and, 3394⁸.
 of osmium tetroxide, 943¹.
 pressure ratio of gases as affected by variable sp. heat, 432⁹.
 ratio of sum of normal b. p. and m. p. to, 913⁸.
 temp., adsorption phenomena in vicinity of, 3046¹.
 expansion coeff. and, 1645⁷.
 of neon, 2149⁶.
 of org. liquids of equal viscosities, 3392⁴.
 ratio to m. p., 1806⁸.
 relation to abs. b. p. and m. p., 2593³.
 relation to expansion of liquids, 3185⁴.
 zero-point vol. and, 913⁸, 1214².
 vol., relation to vol. at 0° abs. and at abs. m. p. and b. p., 2582⁸.
Critical increment, in reactions, 3409⁸.
Critical solution temperature, of ternary mixts., 768⁹.
Crocus. See *Saffron*.
Crookes tube, expts. with H in, 3424⁸.
Crops. See *Plants*.
Croqalin, effect of intravenous injection of, on body temp. and leucocyte count, 2085⁴.
 effect on mobilization of blood antibodies, 2849⁷.
 effect on proteolytic activity of serum, 2849⁹.
Crotin, isolation and hydrolysis of, 2813⁴.
Crotolaria, as green manure, 1611⁷.
Crotonaldehyde, autooxidation of, 634⁷.
 benzoylhydrazone, 2953⁷.
 hydrogenation of, P 657⁹.
 —, α -bromo-, benzoylhydrazone, 2953⁷.
Crotonamide, hydrolysis of, 3253⁴.
 —, α -ethyl-, 1129⁸.
 —, α -hydroxy- γ -phenyl-, reaction with NaOH, 3265².
Crotonanilide, β -amino-, reaction with PhCCl, 245².
 —, β -amino- α -chloro-, 43⁶.
 —, β -butylamino-, 43⁶.

 detn. of, in blood, 1874¹.
Cyanic acid, reaction with pyrazolines, 2666².
Cyanide ion, reaction with halogens, 3195⁸.
Cyanide process. (See also *Gold, metallurgy of*; *Silver, metallurgy of*.)
 alkali in, 457⁹, 809⁹.
 app. for, P 2631⁴.
 calcined dolomite in, 458².
 cyanide recovery from waste solns. by Halvorsen process, 3079⁸.
 intermittent agitation and decantation system for, 3450⁹.
 in metallurgical problems of the Southwest, 2797⁷.
 soln. meter for, P 29⁴.
 "superthickener" and clarifier for, 2468².
 vacuum filters in, 458².
Cyanides. (*Organic cyanides are indexed either as nitriles or (as in the case of acids and aldehydes) as cyano derivs. See also Alkali metal cyanides; Nitrogen fixation, Nitriles; Sodium cyanide; etc.*)
 anoxemia from, 1154⁸.
 book: L'industrie des, 3149².
 detection in iodides, 1674².
 detection in poisoning cases, 3540⁹.
 detn. of, 1388¹, 2315⁸, 2791⁴.
 detn. of, in presence of iodide, 1830⁹.
 effect on acid-forming action of caffeine in muscle, 127².
 electrolysis of complex, with dropping Hg cathode, 2906².
 injury in greenhouse plants, 2996⁸.
 manuf. of, 1180¹, P 1759⁴, P 3354⁴.
 oxygen detn. in solns. of, 1674⁴.
 physiol. action of, 134¹.
 recovery from waste solns. by Halvorsen process, 3079⁸.
 titration of mixts. with halides, 796¹.
Cyanidin, 654², 1141¹.
Cyanidin chloride*, pentamethyl ether*, and salts, 1141¹.
 synthesis of, 1141².
 3,3',4'-trimethyl ether*, 2342².
Cyanine dyes. See *Dyes*.
Cyanite, high temp. effect on, 3151².
 mullite formation from, 3151⁴.
 Röntgen-ray study of, 3574⁹.
Cyanogen, detn. in blood, 604⁷.
 electronic states of, 774⁷.
 spectrum, 1348⁷.
Cyanogen bromide, distn. app. for, 2147⁴.
 reaction with dihydrohydroxycodone and with hydroxycodone, 299⁴.
 reaction with thebaine, 2829⁸.

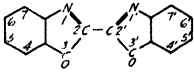

- nogen chloride**, destruction of cockroaches and devitalization of their eggs by, 3336².
 prepn. of, 3195⁷.
nogen compounds. (See also *Nitrogen fixation*.)
 detection of org., in "alliol," 2619⁸.
 letn. of, 3442⁹.
 effect on floatability of pure sulfide minerals, 3450⁸.
nnogen halides, reaction with phenylhydrazine, 45⁸.
anosis, produced by increased peripheral venous pressure, 3498¹.
anuric triazide, 1853³.
 explosive properties of, 1197^{2,3,4}.
clene, methyl-, 269².
clic bases. See *Bases*.
clic compounds. (See also *Heterocyclic compounds*.)
 bi-, from 2-aminopyridine, 69⁸.
 book: Lehrbuch der organischen Chemie. Vol. 2. Cyclische Verbindungen. Part 4. Naturstoffe von unbekannter oder nur teilweise bekannter Struktur, 1429⁸.
 from halogenated open-chain derivs., 2643⁴.
 phys. const. of, 3266⁸.
 poly-membered, of tin halides, 50³, 3251^{1,2}.
 poly-, nomenclature of, 825⁹, 826¹.
 prepn. from halogenated open-chain derivs., 1408⁷.
 stereochemistry of bi-, 1269⁸.
 synthesis of γ -chloroallyl derivs. of, 2644², 3248².
yclic ketones. See *Ketones*.
yclic structure. See *Ring*.
ycloacetals. See *Acetals*.
3 - Cyclobutanediacylonitrile, $\alpha, \alpha', 2, 4$ -tetraphenyl-, isomers, 1416³.
2 - Cyclobutanedicarboxylic acid, *trans*-, *d*-, and *l*-, and derivs., 474⁸.
3 - Cyclobutanedione, 2,2,4,4 - tetramethyl-, 2188⁸.
yclodecane, 2949⁷.
yclodecanebiscyclobutanedione*, and phenylhydrazones, 1409^{1,2}.
 and β -Cyclogeranic acid, melting p. and esterification const. of, 3252².
ycloheptane, ring, multiplanar configuration of, 2934⁴.
ycloheptaneacetic acid, 1-carboxy-, 268⁸.
 —, $\alpha, 1$ -dicyano-, ethyl ester, 268⁷.
 —, α -Cycloheptaneacetic acid, α -cyano-, 268⁷.
ycloheptaneacetonitrile, 1 - cyano-, 268⁷.
ycloheptanecarboxylic acid, boiling p. and esterification const. of, 3252¹.
1 - Cycloheptanediacetic acid, ionization const. and keto-enol equil. of, 1802⁴.
 —, α, α -dihydroxy-, and silver salt, 2934⁵.
 —, α -keto-, semicarbazone, Na salts of, 2934⁵.
2-Cycloheptanediol, boric acid complexes with, 2178⁶.
yclodecanespirocyclopropane. See 3,7 - *Spirodecane*.
2,2 - Cycloheptatrienecarboxylic acid, melting p. and esterification const. of, 3252¹.
yclohexadienone. See *Benzenone*.
yclohexane (hexamethylene), antimonyl tartrate, 1256⁸.
 dehydrogenation of, catalytic activity of various metals on, 3053⁷.
 derivs., 2941⁷.
 freezing-point const. of Ph₂O for, 2903⁴.
 internal pressure of, 3394⁸.
 prepn. and phys. const. of, 3266¹.
 refractive index of, in ultra-violet, 889¹.
 as wood preservative, 2870⁸.
 —, 1-chloro-1,2-epoxy-, 2031⁶.
 —, cyclohexyl-. See *Bicyclohexyl*.
 —, 3,5-dibromo-1,1-dimethyl-, *cis*- and *trans*-, and isomerization of, 3087².
 —, 1,2-epoxy-1(3 and 4)-methyl-, reduction of, 2644^{5,6}.
 —, hexabromo-, *trans*-, from hexane, 42⁸.
 —, isopropylmethyl-. See *Menthane*.
 —, methyl-, reaction with AlCl₃, 3476⁸.
 —, methylene-, hydrogenation of, 1401⁸.
 —, propargyl-, 3476⁸.
Cyclohexaneacetamide, 1 - carbamyl-, 268⁸.
 —, α -hydroxy-, 982⁴.
Cyclohexaneacetic acid, boiling p. and esterification const. of, 3252¹.
 ureides of, P 3351⁷.
 —, α -acetyl-2-hydroxy-, lactone, 2644⁸.
 —, bromo-, ureides of, P 3351⁷.
 —, 1-carbamyl- α -cyano-, and sodium salt, 268⁴.
 —, 1-carboxy-, 268⁴.
 —, 1,2-dibromo-, ethyl ester, 2329¹.
 —, $\alpha, 1$ -dicyano-, derivs., 268^{3,4,5}.
 —, α -hydroxy-, *dl*-, *d*-, and *l*-, and derivs., rotatory dispersion of, 982^{3,4}.
 —, 1-hydroxy- $\alpha, 3$ -dimethyl-, and ethyl ester, 2030^{5,6}.
 —, 1 - hydroxy - 5 - isopropyl - $\alpha, 2$ -dimethyl-, ethyl ester, 2030⁷.
 —, 1-hydroxy-5-isopropyl-2-methyl-, and ethyl ester, 2030^{6,7}.
 —, 1-hydroxy-3-methyl-, ethyl ester, 2030⁸.
 —, 2-hydroxy-4-methyl-, lactone, 2644¹.
 —, 3-methyl-, ethyl ester, 2030⁴.
 —, 4-methyl-, melting p. and esterification const. of, 3252¹.
 Δ^1, α -Cyclohexaneacetic acid, melting p. and esterification const. of, 3252¹.
 prepn. of, 2475⁸.
 —, $\alpha, 3$ -dimethyl-, and ethyl ester, 2030⁸.
 —, 5-isopropyl- $\alpha, 2$ -dimethyl-, and ethyl ester, 2030^{7,8}.
 —, 5 isopropyl-2-methyl-, and ethyl ester, 2030^{6,7}.
 —, 3-methyl-, ethyl ester, 2030⁴.
 —, 4-methyl-, *l*-, rotatory dispersion of, 1136⁷.
 melting p. and esterification const. of, 3252¹.
Cyclohexaneacetonitrile, 1-cyano-, 268⁸.
Cyclohexanealdehyde, 2 - keto - 3 - methyl-, and oxime, 1277⁸.
Cyclohexanebutyranilide, 2 - carboxy (?), *cis*- and *trans*-, 1270⁴.
 —, 2-phenylcarbamyl-, *cis*- and *trans*-, 1270⁴.
Cyclohexanebutyric acid, 2-carboxy-, 261⁸.
cis- and *trans*-, 1270⁴.
 —, 2-phenylcarbamyl-(?), *cis*- and *trans*-, 1270⁴.
Cyclohexanecarbinol, α -phenyl-, 2636⁸.
Cyclohexanecarboxamide, 4,5 - dihydroxy-1,2 - isopropylidenedioxy-, 2042².
Cyclohexanecarboxylic acid, *d*-, and *dl*-, ethyl lactate ester, 244^{4,5}.
 and ethyl ester, prepn. of, 2040⁸.
 ionization const. of, 1802⁴.
 prepn. by Grignard reaction, 467⁴.
 ureides of, P 3351⁷.

- , 1-acetamido-(?), 268⁶.
 —, bromo-, ureides of, P 3351⁷.
 —, 2-cyclohexyl-, and isomer, and salts, 1703⁴.
 —, 3-hydroxy-2,2,4-trimethyl-, *trans-d*-, and methyl ester, 2656².
 —, 3-keto-2,2,4-trimethyl-, *d*-, and derivs., 2655⁹, 2656¹.
 —, 3(and 4)-methyl-, phys. consts. of, 3252².
 —, 1,2,4,5-tetrahydroxy-. See *Quinic acid*.
 1,1 - Cyclohexanediactic acid, ionization const. and keto-enol equil. of, 1802⁴.
 1,2 - Cyclohexanediactic acid, 1,2 - dihydroxy-, mono- γ -lactone, 2329².
 1,3 - Cyclohexanedicarboxylic acid, *cis*- and *trans*-, and *d*- and *l-trans*-, 3483².
 1,2-Cyclohexanediol, *cis*- and *trans*-, reaction with acetone and with H₂BO₃, 970⁹. dehydration of, 1857⁹.
 —, 1,2-dimethyl-, dehydration of, 2817⁹.
 1,3 - Cyclohexanediol, dehydration of, 1857⁹.
 1,4 - Cyclohexanediol, dehydration of, 1857⁹.
 1,2-Cyclohexanedione, dioxime, 487².
 —, 3(4, and 5)-methyl-, dioxime, 487².
 1,3 - Cyclohexanedione, 5,5 - diethyl-, 2032⁷.
 —, 5,5-dimethyl-, reaction with HClO, 1263⁴.
 —, 2,2' - methylenebis[5,5 - dimethyl-, 1263⁴.
 —, 2,2'-methylenebis[5-phenyl-, 1263⁴.
 Cyclohexanethanol, β ,3-dimethyl-, 2030⁹.
 —, 5-isopropyl- β ,2-dimethyl-, 2030⁹.
 —, 3-methyl-, 2030⁴.
 Cyclohexanethyamine, *N*-benzoyl- \dagger , 825¹.
 β -Cyclohexaneglutarylfluorescein*, 968².
 β - Cyclohexaneglutaryl-rhodamine*, 986⁴.
 Cyclohexaneglycolic acid. See *Cyclohexanecetic acid*, α -hydroxy-.
 Cyclohexanexol. See *Inositol*.
 Cyclohexanemalonamic acid, 1-carboxy-, 268⁹.
 Cyclohexanemalonamide, 2 - hydroxy - 4 - methyl-, 2644⁷.
 Cyclohexanemalonic acid, 2-hydroxy-, lactone, Et ester, 2644⁷.
 —, hydroxyisopropylmethyl-, lactone, Et ester, 2644⁸.
 —, 2-hydroxy-4-methyl-, lactone, Et ester, 2644⁷.
 Cyclohexanemethylamine, *N* - benzoyl- \dagger , 825¹.
 Cyclohexanenitrile, 1 - allyl - 2 - keto-, and semicarbazone, 1262⁹.
 —, 2-amino-2-hydroxy-, 1263¹.
 —, 2-amino-2-hydroxy-3-methyl-, 1263¹.
 —, 1-benzyl-2-keto-, and semicarbazone, 1262⁹.
 —, 1-ethyl-2-keto-, and derivs., 1262⁹.
 —, 2-keto-, and derivs., 1262⁹.
 —, 2-keto-1-methyl-, and derivs., 1262⁹.
 —, 2-keto-3-methyl-, and oxime, 1262⁹.
 —, 2-keto-1-propyl-, and semicarbazone, 1262⁹.
 Cyclohexanepropanol, and derivs., 2040⁹.
 Cyclohexanepropanonilide, 3 - (phenylcarbamylmethyl)-, *cis*-, 1260⁹.
 Cyclohexanepropionic acid, boiling p. and esterification const. of, 3252².
 —, 3-(carboxymethyl)-, prepn. of, 824⁵.
 Cyclohexane series, vapor pressures of mixts. of paraffins and members of the, 1937².
as-Cyclohexanesuccinylfluorescein*, 986².
as-Cyclohexanesuccinylrhodamine*, 986⁴.
 Cyclohexanesulfonic acid, prepn. by Grignard reaction, 467⁶.
 Cyclohexanesulfonamide, 1402⁹.
 Cyclohexanesulfonic acid, salts, 1402⁹.
 Cyclohexanesulfonyl chloride, 1402⁹.
 Cyclohexanetetrollic acid, 3476⁹.
 Cyclohexanol (*hexalin*), catalytic actions of reduced Cu, reduced Ni and ThO₂ on, 3411⁴.
 —, dehydrogenation of, Cu as catalyst for, 1367⁴.
 —, detn. in soaps, 742³, 904⁸.
 —, phys. consts. of, 1702^{1,2}.
 —, sodium derivs. of, thermochem. studies of, 1982⁹.
 —, as solvent and thinner, 3603⁹.
 —, 2,6 - bis(*p* - hydroxybenzyl)-, and derivs., 1415⁴.

- 1, 3 - Cyclopentanedicarboxylic acid**, dihydrazide, 249³.
- , 1, 2, 2-trimethyl-. See *Camphoric acid*.
- 1, 2-Cyclopentanediol**, *cis*-, reaction with acetone and with H₂BO₃, 970³.
- Cyclopentanone**, azines, 2343^{4, 5}.
- , 2, 5 - bis(*p* - hydroxybenzal)-, derivs., 1415¹.
- , 2, 3 - dibromo - 5 - methyl - 3, 4-diphenyl-, 2934².
- , 2, 2-dimethyl-, and derivs., 239^{4, 5, 7}.
- , 2, 5-dimethyl-, 2933³.
- , and derivs., 239^{5, 8}.
- , 2, 2, 3, 4, 5-pentachloro-(?), 2039⁶.
- Cyclopentanonecarboxylic acid**. See *Cyclopentanecarboxylic acid*, keto-.
- Δ^1 - Cyclopentanecetyl chloride, 2032³.
- Cyclopentenedione**, (dimethylaminophenylimino) diphenyl-, behavior as it changes state, color and cryst. condition, 1647³.
- Δ^3 - Cyclopentenitrile, 2, 2, 3 - trimethyl-. See α -Campholynitrile.
- Δ^2 - Cyclopentenone, 3 - *p* - anisyl - 5 - methyl-4-phenyl-, 2934³.
- , 3-isopropyl-. See *Tanacetophorone*.
- , 5-methyl-3, 4-diphenyl-, 2934³.
- , 5 - methyl - 3 - (3, 4 - methylene-dioxyphenyl)-4-phenyl-, 2934³.
- Δ^3 - Cyclopentenone, 3 - anisal - 3 - *p* - anisyl-5-methyl-4-phenyl-, 2934³.
- , 2, 5 - bis - *p* - dimethylaminophenylimino-3, 4-diphenyl-, behavior as it changes state, color and cryst. condition, 1647³.
- , 2 - methyl - 4 - (3, 4 - methylene-dioxyphenyl) - 3 - phenyl - 5 - piperonylidene-, 2934³.
- Cyclopropane**, derivs., tautomerism of, 247³, 1410⁴.
- Cyclopropanecarboxamide**, 1-acetyl-, and phenylhydrazone, 2809¹.
- Cyclopropanecarboxylic acid**,⁹ 1 - acetyl-, derivs., 2809¹.
- , 1-(α -cyano- α -hydroxyethyl)-, α Et ester, 2809¹.
- 1, 1 - Cyclopropanedicarboxanilide**, 2808³.
- 1, 2 - Cyclopropanedicarboxylic acid**, 1-bromo-3-phenyl-, esters, 2643³.
- , 2, 3-dibromo-3-methyl-, ethyl methyl ester, 1410⁷.
- , 3, 3-dimethyl-. See *Caronic acid*.
- , 1-ethoxy-3-phenyl-, and esters, 2643³.
- , 1-methyl-, *cis*- and *trans*-, and calcium salt, 1408³.
- Cyclopropanedicarboxylic anhydride**, 3-methoxy-3-methyl-, 1410⁷.
- 1, 2 - Cyclopropanedicarboxylic anhydride**, 1-methyl-, 1408³.
- 1, 2 - Cyclopropanedicarboxy - *p* - toluides**, 1-methyl-, 1408³.
- Cyclopropanenitrile**, heat of combustion of, 2324⁷.
- , 2 - benzoyl - 1 - (*p* - nitrophenyl) - 3-phenyl-, 2207³.
- 1, 1, 2, 3 - Cyclopropanetetracarboxylic acid**, and derivs., configuration of, 2464^{4, 5}.
- 1, 1, 2 - Cyclopropanetricarboxylic acid**, 3-phenyl-, triethyl ester, 2643³.
- 1, 2, 3 - Cyclopropanetricarboxylic acid**, *trans*, 246⁵.
- , 1-cyano-, triethyl ester, 246⁵.
- Cyclopropene**, ring, effect of Ph group on the formation of, 2643³.
- Δ^2 - 1, 2 - Cyclopropenedicarboxylic acid, 3-methyl-, esters, 1410⁶.
- Cyclo-rubber**. See *Rubber, synthetic*.
- Cyclotelluropentane-3, 5-dione**. See 1, 2-Telluropyrane-3, 5(4, 6)-dione.
- Cyclotriazabutane**. See *Triazetidine*.
- Cydonia**, identification of, 2226³.
- Cymbopogon oil**. See *Oils*.
- Cymene**, chem. const. of, 752³.
- , dyes from, synthesis of, 490³.
- m*-Cymene, mol. coeff. of refraction, 1222³.
- o*-Cymene, mol. coeff. of refraction, 1222³.
- p*-Cymene, 641⁵.
- , in kerosene of Burmah, 1046³.
- , mol. coeff. of refraction, 1222⁴.
- , oxidation of, electrochem., 2190³.
- , spectrum of, 11³.
- , 2-amino-. See *Carvacrylamine*.
- , aziminochloro-*, 42⁵.
- , 2-chloro-, 42⁵.
- , 2- γ -chloroallyl-, 2645².
- , 6-chloro-2, 3-dinitro-, 42⁵.
- , 2, 5-dibromo-, 641⁵.
- , 2 - (β , γ - dibromo - γ - chloropropyl)-, 2645².
- , 2, 5-dihydro-2, 5²-diketo-. See *Thymoquinone*.
- , 3-hydroxy-. See *Thymol*.
- , 5-hydroxy-2-(hydroxymethyl)-. See *Thymotinic alcohol*.
- 2, 3-*p*-Cymenediamine**, 6-chloro-, 42⁵.
- 2, 5-*p*-Cymenedione**. See *Thymoquinone*.
- 3-*p*-Cymenol**. See *Thymol*.
- 3-*p*-Cymenol**, 42⁵.
- Cymoylbenzoic acid***, and silver salt, 276⁵.
- Cynara scolymus**. See *Artichoke*.
- Cyperus rotundus**, oil of, 3563³.
- Cypridina**, luminescence of, inhibition by light, 2963¹.
- Cyrtolite**, in Ontario, 1838¹.
- Cysteine**, as antidote for As poisoning, 1912³.
- , detection of, 2834¹.

- oxidation of, catalysis by Fe, 430^a.
oxidation of, peroxide formation during aerobic, 2060^a.
sulfur excretion after ingestion of, 1446^a.
in tissues of pigeon, effect of vitamin on, 3517^a.
- Cystine**, detection of, 997^a, 2834¹.
effect on S metabolism, 3296^a.
in jack bean, 2677^a.
metabolism, 314^a.
metabolism, disturbances of, in children, 102^a, 1309^a, 3532^a.
in nutrition of growing rat, 2069¹.
optical properties of, 1128^a.
optical rotation of, 3255^a.
oxidation of, 3255^a.
in protein fraction of tubercle bacilli after removal of tuberculinic acid, 2356^a.
in proteins, 2062¹.
sulfur excretion after ingestion of, 1446^a.
in tissues of pigeons on rice diet, 3517^a.
- Cystinuria**, metabolism in, 2848^a.
- Cytochrome**, hem in, 3098^a.
- Cytology**. See *Cells; Cells, animal; Cells, plant*.
- Cytolysis**. See *Cells, animal*.
- Cytoplasm**. See *Protoplasm*.
- Cytosine**, color test for, 1130^a.
nucleotide, 834^a.
- Dacite**, olivine-, in Tertiary volcanic series of eastern Iceland, 1302^a.
- Dacrydium cupressinum**, oil of, 1176^a.
- Dactylopius coccus**. See *Cochineal*.
- Dahl**, silage, 2989^a.
- Dahlia**, effect on scorpion venom, 3321^a.
inulin from, in diabetes treatment, 2690^a.
- Dairy industry**, wastes, disposal of, 143^a.
water for, contamination and sterilization of, 1461^a.
- Dairy products**. (See also *Butter; Cheese; etc.*)
books: *Lab. Book of Dairy Analysis*, 2094^a.
Le lait et les produits dérivés, 3550^a.
butter-fat detn. in, 2092^a.
creamery wastes, acidity and purification of, 2092^a.
examin. of, 864^a.
hydrogen-ion concn. of, measurement of, 2092^a.
review, 682^a.
starters, influence of air supply, temp. of incubation and rate of ripening on, 3329^a.
- Dakin-Carrel solution**. See *Carrel-Dakin solution*.
- Dammar**, esterification of, 408^a.
Malayan, 3604^a.
oil from black, 1754^a.
penak, 408^a.
- Damourite**, 2795^a.
from Tasmania, 2622¹.

Detinning. See *Tin, metallurgy of*.

Detonation, of ammonium nitrate, influence of temp. on, 3021¹.

in engines, action of PbEt₂ on, 390².

compn. for prevention of, P 1192¹.

theories of prevention of, 1766².

of explosives, 3594².

in gas mixts., limits of, 3595¹.

in inflammable medium, safety in, 1197².

velocity of, definition of, 1497².

Detonators. (See also *Fuses*.) P 178², P 1349¹, P 3596¹.

action of, 3594².

for blasting, P 578².

blasting cap, aluminium, 3019².

blasting caps, testing of, 3019².

connecting blasting caps with fuse, 3594².

development and applications of, 1056².

explosive charges from, furnace for burning, P 3596¹.

explosive properties of, 1197¹.

improvements in, during and since the war, 3018².

for liquid-air cartridges, P 400².

manuf. of, app. for, P 2879².

secondary charge for compd., P 1778².

silver azide as, 2564².

Detoxication, acetylation in the organism as, 3517².

combinations within the body, 3324⁷.

surface tension and, 128⁷.

Development. (See also *Growth*; *Photographic development*.)

of hydrozoa, modification through differential susceptibility, 1602².

Dew, alk. reaction of, on cotton plants, 2361².

formation and excretion by plants, 1000².

Dewar flasks. See *Vacuum containers*.

Dew point, detn. of, 594².

Dextran, in wines, 374².

Dextrin, acetates, 1362².

amylase action on, 3008².

book: *Die Fabrikation des*, 1506².

from cellulose-contg. materials, P 729².

distinguishing, from glycogen, 1146².

formation by malt amylase of diff. grains, 557².

forms of, produced by drying gel, 2897².

halogenated products from, P 548².

maltose sepn. from, 3277².

paste, prepn. from starch, 2278⁷.

prepn. of stable, 1698².

surface tension of soln. of, 2680⁷.

undigested, in starch hydrolysis, 660².

Dextrose. See *d-Glucose*.

Diabases, soil formation from, 2012².

Diabetes. (See also *Glucosuria*.) 1305⁷.

acid-base equil. in coma of, 3533².

acidosis, acid-base equil. in, 1452².

acidosis in, 2697⁷.

acidosis of, blood changes in, 3310^{2A}.

antipyrine effect in, 3322¹.

assimilation disturbance in, 2975¹.

biofood for treatment of, 378².

blood diastases in, after treatment with insulin, 325².

blood lipid curve in, directly after ingestion of fat with and without insulin, 341².

blood plasma proteins in, 2529².

blood sugar in, 1451², 2078².

after administration of glucose, insulin effect on, 3320².

in course of the day, 3308¹.

influence of fasting on, 1306².

before and after insulin injection, nature of, 1886².

carbohydrate metabolism in, significance of reactive form of glucose for, 2079².

carbohydrate oxidation in, 2680².

carbon balance in, and action of insulin, 3104¹.

cardiac muscle compn. in, 2850².

caseosin therapy in, 2238⁷.

cause of, 1894².

coma in depancreatized dogs, 3309².

infection in relation to, 2373².

non-protein N in, 3310².

treated with dihydroxyacetone, 2531².

complement in serum in, 108².

diastatic activity of blood in, 330².

dietetic treatment for, 2517².

dietetic treatment of, Philippine fruits and vegetables suitable for, 2364².

diuresis and, 1308².

effect of lumbar puncture on polyuria, glucosuria and glucemia in, 2082².

energy expenditure in, in relation to external temp., 3311².

fat transformation to sugars in, effect of insulin on, 2974².

glucemia in, potassium influence on, 1737², 2086².

glucolysis in blood in, 116².

glucolytic power of blood in, 1895².

glucose combustion, 1733⁷.

glucosuria in, reduction by feeding oatmeal, bran or exts., 347².

glucosuria threshold in, 1306².

glycogen content of heart, liver and muscles in, 2529².

glycogen in, 1451².

gravis, 1306¹.

hydrogen-ion concn. and, 1889².

hypertonia and, 1160².

induced oxidation and, 3531².

infection in, 2237².

insipidus, acetaldehyde content of urine in, 342².

diuresis and, 1596².

effect of diuretics on blood in, 1305¹.

metabolism in, 2849².

metabolism of purines in, 847², 3312².

neurocol action on water and salt metabolism in, 354⁷.

pathogenesis of, 122¹.

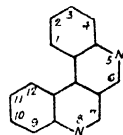

pituitrin and, 1311², 1898².

production of exptl., 1007².

insulin action in, 1901².

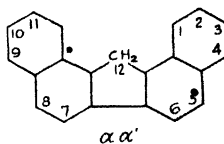

- insulin effect on CH_3CHO content of blood in, 1591^a.
 insulin effect on amino acid content of blood and urine in, 1457^a.
 insulin effect on lipemia of, 1600¹.
 insulin formation outside of pancreas in, 120^a.
 insulin in spruce complicated with, 2708^a.
 insulin treatment of, 1867^a, 2708^a.
 alk. reserve of blood during, 3533^a.
 high blood sugar and absence of sugar in urine in, 2701⁷.
 urine examn. in, 102^a.
 intarvin in, 1002^a, 2690⁷, 3112^a, 3127⁷.
 inulin and artichokes in treatment of, 2690⁷.
 ketogenesis in, effect of insulin on, 344^a.
 ketonuria in, 117¹.
 lactation in, 1886^a.
 lactic acid content of blood in, 2370¹.
 lactic acid formation in, 3519¹.
 lactic acid metabolism in, and influence of insulin, 2087^a.
 lactic acid production in, following insulin administration, 1888⁷.
 mellitus, adrenaline effect on blood pressure and blood sugar in, 139⁷.
 amino acid content of blood in, 3313^a.
 blood fat in, 2373^a.
 blood sugar in prognosis of, 3310^a.
 blood urea in, 2373¹.
 blood urea in, relation to coma and to duration, 1007^a.
 cause of, 2702¹, 3522^a.
 dihydroxyacetone in treatment of, 1898².
 glucosuria threshold in, 1306^a.
 nature of, 559¹.
 pancreatic and hepatic activity in, 2078^a.
 protein action in, 1009³, 2699^a.
 roasted products in therapy of, 668^a.
 water metabolism in, and effect of insulin on it, 1597¹.
 mellitus aponeuroticus, intermediary carbohydrate metabolism in, 2231^a.
 metabolism in, 315⁷.
 mineral metabolism in, 1594^a.
 nitrogen-minimum in, 2984^a.
 pancreas in treatment of, 3112^a, 3113^a.
 pancreas product for treatment of, P 705¹.
 pancreas sickness with, 1736³.
 after pancreatectomy, effect of NaHCO_3 and insulin on, 1596^a.
 pancreatic, blood in, 1155¹.
 pancreatic, respiratory metabolism following insulin administration in, 2083⁷.
 pancreatic, theory of, 2083^a.
 permeability of cells for glucose in, 2674^a.
 phlorhizin, effect of insulin on, 344^a, 3115^a, 3539^a.
 phlorhizin, elimination of ingested sugar in, 3534^a.
 phlorhizin, mechanism of, 116^a.
 phosphate (inorg.) in blood and urine during carbohydrate metabolism in, 314⁷.
 remedy for, P 3002^a.
 renal threshold for glucose in, 2702^a.
 review, 2238^a.
 sucrose treatment for use in, 524^a.
 sugar in blood in, 672^a.
 sugar in cerebrospinal fluid in, 2081^a.
 sugar in urine in, following ingestion of carbohydrates, 103¹.
 sugar metabolism in, during pregnancy and treatment with insulin, 3533¹.
 sugar threshold in, 2373^a.
 surgical treatment of, 3306^a.
 testicular tissue in, 124⁷.
 theory of, 115^a.
 tissue glucolysis in, 3537^a.
 urine in, effect on optical activity of glucose, 2371^a.
Diacetamide, *N*-benzyl-, 3261¹.
Diacetanilide, 2-hydroxy-5-phenyl-, acetate, 1858^a.
Diabetic acid. See *Acetoacetic acid*.

 carbohydrate-free excess-fat, effect on sensitivity to insulin, 3520⁷.
 carbohydrate-free, protein and fat, effect of phlorhizin during nourishment with, 3304¹.
 carbohydrate in, effect on blood sugar threshold, 1300⁴.
 in China (North), 1728⁵.
 deficiency in, relation to gastric lesions in rats, 1727¹.
 deficient—see also *Avitaminosis*.
 deficient, effect on bactericidal action of blood, 1728⁹.
 effect on inorg. salt content of mother's milk, 1588².
 sterility due to, 2971⁵, 3515⁸, 3516².
 sunlight in relation to pork production on, 1001⁹.
 for diabetes treatment, 2517⁴.
 for diabetics, roasted products in, 668².
 digestibility of crude fiber as influenced by compn. of ration, 3294⁹.
 in eczema and allied dermatoses treatment, 3111².
 effect of accessory foods on sp. dynamic action, 2064⁹.
 effect of artificial, on pigeons, 3295⁸.
 effect of, of mother during pregnancy and lactation on rickets, 847⁹.
 effect on action of definite internal secretion substances, 1601⁸.
 on action of insulin and adrenaline, 849⁹.
 on activity of internal secretion substances, 1153¹.
 on bile secretion, 849⁸, 3117⁹.
 on blood-sugar curves after intravenous administration of insulin, 1737⁷.
 on blood sugar of lactating cows, 3107¹.
 on calcium and P metabolism, 1728².
 on calcium assimilation, 669².
 on cell function, 1589¹.
 on dental caries, 94², 2980⁹.
 on development of reproductive organs, 1444².
 on fat production in animals, 1720⁸, 3517².
 on hatchability of eggs, 2069⁸.
 on hemokonia in blood serum, 97².
 on hippuric acid synthesis, 1153², 2691¹.
 on inflammatory reaction, 1221¹.
 on intestinal reduction, 668⁴.
 on lactation, 1294⁸, 2366⁷.
 on liver injury produced by CCl₄, 1003⁹.
 on metabolism in pregnancy, 333⁹.

- on mineral metabolism of dairy cows, 2971⁴, 2973⁷.
- on ossification, 1729⁴.
- on reproduction, 1001⁴.
- on response of rabbits to insulin, 128⁹.
- on sugar excretion and tolerance, 846¹.
- on teeth structure, 3104⁸.
- on tropical sprue and pernicious anemia, 1003⁹.
- on tuberculosis, 2980².
- on tumor susceptibility and growth, 2985³.
- on water elimination, 1882⁷.
- egg, effect on bleeding of puberty and menstruation, 3497¹.
- egg white as nitrogen source for young growing rats, 1151⁴.
- fat, 2066⁸.
 - effect of muscular exercise on, 2368⁴.
 - effect on carbohydrate metabolism of mammalian muscle, 849¹.
 - effect on uric acid content of blood, 1292².
 - importance for the sailor, 2516².
 - influence on metabolism of infants, 2971¹.
 - for nursing, 2364¹.
- fat-free, fatty acids excreted by dog on, 3518⁶.
- fluorine and I in, effect on reproductive function and on growth of young, 2693⁸.
- fluorine in, effect on teeth, 2066⁸.
- of goat milk, N and mineral balances in infants on, 3298⁹.
- goiter production by restricted I feeding, 2370¹.
- of human milk (dried), 1001⁴.
- for infants, buffer value in, 1588².
- jodine deficiency in, supplied by use of kelp, 140¹.
- iron-deficient, relation to disease, 1010².
- iron-hunger in ruminant stock, 2227¹.
- ketogenic, in epilepsy treatment, 1294⁴.
- lactated flours in, effect on rickets, 1883².
- for lactation, 1003⁹.
- lactic acid milk in, of premature children, 2842⁶.
- lecithin-contg. foods, 1002⁹.
- milk, as extra ration, 2065⁷.
 - growth and reproduction of rats on, 1726⁹.
 - influence of fat content of, on sex glands of male albino rats, 3517⁷.
 - mineral deficiencies of, 1293¹.
 - nutritional anemia on, 3296⁸.
 - nutritional value of, 3295⁹.
 - optimum amt. for children, 3296¹.
 - for white rats, 2364⁹.
- milk (dried vs. evapd.), 2066⁷.
- milk or cereal gruel for calves, fatty acid production in intestines on, 3303⁸.
- milk powders, whole vs. skimmed, 2067².
- milk treated with Cl₂, 2986⁹.
- mineral constituents in, of farm animals, 2841⁶.
- of mother during pregnancy, influence of excessive amt. of fat-sol. factor and Ca in, on young, 1151¹.
- nitrogen metabolism on unbalanced, 671⁷.
- osteoporosis production by, 1443⁷.
- of parent, influence on young, 1150⁹, 1729³.
- pellagra-preventive, 2693⁸.
- phosphorus action in, varying in mineral content, 2086².
- phosphorus-deficient, for cattle, 2690⁶.
- protein, amino acid excretion in nurslings on, 317².
- protein and vitamin B in mother's, ratio necessary for rearing offspring, 98⁶.
- protein, as cause of nephritis, 2693⁸.
- protein effect in dairy rations, 2365².
- protein, hypertension from, 2079².
- protein in, 2092⁵.
- protein in, correlation with loss of fur in young growing rats, 1729¹.
- protein-rich, 2693².
- in public schools, 1729⁷.
- purified, effect of Na in, 1589¹.
- rachitic, 2691¹.
- reproduction and, 3519⁴.
- reproductive potency of dry milk as affected by oxidation, 1292⁷.
- requirements for reproduction, 845⁹, 2068¹.
- rice, cysteine and cystine in tissues of pigeons on, 3517⁷.
- rickets-producing, 3297¹.
- rickets-producing, induction of calcifying properties in, by radiant energy, 669⁷.
- rickets production by, 1443³.
- salt- and lipid deficient, influence on respiratory exchange, 671⁷.
- scorbutic, 2070⁷.
- scorbutic, antiscorbutic substance in livers of chickens fed on, 1292².
- scorbutic, influence on quantity of urea in blood, 2228³.
- scurvy in child from, 2842⁴.
- starch in, relation to blood sugar, 1296¹.
- synthetic, adequacy for growth of chick, 2972².
- teeth and, 1151⁴.
- teeth formation in relation to, effect of light on, 3104⁹.
- tetany and, 846⁹.
- in treatment of disorders of children, 2842⁶.
- tryptophan-deficient, attempt to sensitize white mice to action of ultra-violet light by, 847².
- in tuberculosis, 2516².
- uniform, 2070⁴.
- vegetable protein, effect on incidence of spontaneous tumors in mice, 340².
- vitamin-A-contg., ophthalmia on, 2972⁸.
- vitamin-A-deficient, effect of irradiation of environment with RaBr₂ on growth of rats fed on, 1151⁷.
- effect of irradiation of environment with ultra-violet light on growth and calcification of rats fed on, 1151⁶.
- effect on defences against infections, 335⁶.
- effect on heart, 1445⁷.
- effects of Ca glycerophosphate, Na glycerophosphate and NaH₂PO₄ on skeleton of rats kept on, 1729².
- hemeralopia from, 3520².
- influence on visual purple in eyes, 3520².
- keratomalacia from, 2080⁶.
- pathologic changes in white rats on, 2065⁹.
- vitamin A in, of cow, relation to its presence in milk fat, 532⁴.
- vitamin A in relation to growth and reproduction, 3105⁹.
- vitamin B and, 3521¹.
- vitamin-B- and carbohydrate-deficient, growth and maintenance of rat under, 1294².
- vitamin B deficiency and beriberi, 1728⁷.
- vitamin-B-deficient, cholesterol in nervous system on, 333⁹.
- effect on blood sugar, 3519⁹.
- effect on fat and lipid distribution in blood, 2517⁷.
- effect on glycogen content in liver, 2693⁸.

- effect on metabolism, 1727^o, 1729^o.
 effect on reproduction, 2517^o.
 vitamin-B-free, maintenance of pigeon by means of, 847^o.
 vitamin-B-free, of Drummond and Watson, 3519^o.
 vitamin B role in relation to size of growing rats, 2068^o.
 vitamin-C-deficient, effect on anaphylaxis, 118^o.
 effect on P and Ca in bones and teeth, 2069^o.
 relation to glucemia, 2069^o.
 vitamin-deficient, 1294^o.
 cataract from, 1305^o, 2066^o.
 effect of ultra-violet light on content of fat and sugar in blood on, 1446^o.
 effect on tissue enzymes, 3521^o.
 influence of hormones on rats with, 2973^o.
 influence on growth of mouse and rat carcinoma, 2842^o.
 liver-cell degeneration resulting from, 1305^o.
 metabolic disturbance due to, significance of cell salts in, 317^o.
 relation to muscle fatigue, 2973^o.
 vitamin-free, effect of, 2974^o.
 vitamin-free, effect on blood sugar, 2070^o.
 vitamin-high, dynamic effect of ions on growth process with, 1588^o.
 vitamins in, 2842^o.
 of wheat and wheat straw for cows, 815^o.
 wheat by-products in, 2365^o.
 whey-contg., volatile fatty acids in stool on, 1446^o.
- Diethylamine**, 3 - acetamido - 4 - hydroxy benzenearsonate, P 1327^o.
 hydrochloride, elec. cond. in MeOH and EtOH, 2440^o.
 —, *N* - nitroso - β, β', β' - tetraphenyl-, 2822^o.
 —, β, β', β' - tetraphenyl-, -HCl, 2822^o.
- Diethylenediamine**. See *Piperazine*.
Diethylene 1,2,6-trisulfide*, 1557^o.
Diethyl sulfate. See *Ethyl sulfate*.
Diffraction. (See also *Rays*, *Röntgen*.)
 of penetrating radiation by crystals, 1372^o.
 quantum theory of Fraunhofer, 3425^o.
- Diffusion**. (See also *Liesegang rings*; *Sugar manufacture*.)
 acid displacement by, 2439^o.
 of alkali salt vapors in the Bunsen flame, 592^o.
 of ammonium hydroxide into gel contg. MgCl₂, 3402^o.
 app., 2768^o.
 of arspenamine solns. and mixts. of arspenamine with serum, 2241^o.
 in carbon steels at high temps., 959^o.
 of carbon through W and W₂C, 1799^o.
 concn. disequil. caused by, 2506^o.
 in crystals, 2804^o.
 detn. of, coeffs., 3391^o.
 detn. of coeffs. of, app. for, 1969^o.
 of dyes in gelatin, 1057^o.
 of electrolytes through membranes, 1807^o.
 of electrons in an elec. field, 2908^o.
 expts. in, 1216^o.
 of gases, calcn. of, 592^o.
 in gels, 3400^o.
 of glucose contd. in blood and pure glucose solns., 3520^o.
 of helium through cryst. septa, 3183^o.
 of helium through glasses, 3183^o.
 of hydrogen into air, 592^o.
- of iodine in pure solvents and in mixts. of solvents, 3406^o.
 ionic, influence on almost satd. currents, 2599^o.
 of ions from living plant tissues in relation to protein isoelec. points, 3291^o.
 kinetic theory of, 426^o.
 of light—see *Light*.
 measuring, of colored materials, 762^o.
 membrane, pressure in ternary systems, 1981^o.
 of mercury vapor through N, 1214^o.
 of metals in Hg, influence of pressure on, 770^o.
 in metals (solid), 1841^o.
 mol. wt. detn. by, 2769^o.
 of particles in suspensions, 1216^o.
 permeability of frog skin and, 3498^o.
 of potassium sulfate into jellies contg. BaCl₂, 202^o.
 potential and transport no. of HCl in concd. soln., 1527^o.
 potentials, 1222^o.
 potentials in liquid chains, 2773^o.
 quasineutral elec., 2776^o.
 relation to viscosity and external pressure, 1974^o.
 of silver ions in solid Cu₂S, 1520^o, 3196^o.
 in solid state, 1972^o.
 in soln., Stokes-Einstein law for, 765^o.
 in solvents, detn. of, 2155^o.
 of tanning materials into animal skin, rate of, 2279^o.
 theory of positive column, 1091^o.
 thermal—see *Heat*.
 of water through collodion membrane between solns. of mixed electrolytes, electrostatic forces in, 2587^o.
- Difformin**. See "di-" under *Formin*.
Digallic acid, from tannic acid, identity of, with synthetic, 1260^o.
Digermane, hexaphenyl-, 3259^o.
Digesters. See *Paper pulp*.
Digestion. (See also *Enzymes*.)
 blood chemistry during, 1883^o.
 by caterpillar of clothes moth, 2690^o.
 of cell walls and fibrous materials of plants, 2229^o.
 effect of H-ion concn. and buffer value of foods on, 1444^o.
 salivary, effects of halogen salts on, 2074^o.
 in swine, 531^o.
- Digestive glands**, secretion by, muscle hormone in, 3526^o.
Digestive juices, resorption of, 853^o.
Digestive tract, bismuth absorption in, 1908^o.
 choline action on motor function of, 1910^o, 2531^o.
 colon bacilli in, 2229^o.
 effect of cholesterol-lecithin quotient on, 3105^o.
 insulin absorption from, 680^o, 1885^o, 1897^o.
 morphine action on, influence of codeine on, 2086^o.
 morphine-codeine action on, 3325^o.
 movements of, influence of natural chem. stimuli on, 2343^o.
 obstruction of, 1309^o.
 opium action on, of the hen, 355^o.
 permeability as factor in parathyroid tetany, 2369^o.
 protein absorption from, study by precipitin test, 1152^o.
- Digitolin**, administration of, 137^o.

Digitalin, 253^a.

—, **dihydro-**, 253^a.

Digitalis, alkaluria after administration of, 3306^a.

assaying, 2862^a.

Dutch pharmacopoeial prepn. of, 1324^a.

effect (extracardial) of, 3121^a.

effect in presence of coronary obstruction, 2084^a.

effect on heart, 1011^a, 2534^a, 3123^a.

effect on vagus, 538^a.

fertilizers for, 376^a.

gigogenin in leaves of, 2687^a.

glucoside, effect on lungs, 1367^a.

homeopathicity of, 679^a.

infusion, influence of *pu* on stability of mixts. with K citrate, 2999^a.

iron-greening factor of, 377^a, 3001^a.

of Minnesota and other samples, 2864^a.

physiol. action of, relation to chem. constitution, 1310^a.

and prepus., 3561^a.

prepus., research on, 2724^a.

prophylactic administration of, preceding operations, 348^a.

as respiratory stimulant together with caffeine, 1897^a.

substance in, accompanying digitoxin, 2104^a.

Digitonin, and decomp. products of, 1861^a.

effect on starfish egg, 2090^a.

Digitoxin, digitalis substance accompanying, 2104^a.

pharmacology of, 3325^a.

susceptibility of young rabbits to, 3120^a.

Diglycol, trithio-, 1557^a.

Dihexosan, hexaacetyl-, 304^a.

—, tetramethyl-, 304^a.

Dihydroxyammonia. See *Ammonia*, *dihydroxy-*.

Diimide, ammonia combustion to, 2312^a.

Diindanylamine, ionization const. of, 1520^a.

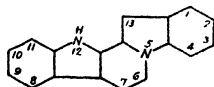

Diindene*, 492^a.

—, **dihydro-***, 492^a.

Diindene dibromide*, 492^a.

Diindogen. See *Indigotin*.

Diindolopyridine,

6,13 - Diindolopyridinedione, **12 - benzoyl-7-phenyl-**, 280^a.

—, **7-phenyl-**, 280^a.

6 (12) - Diindolopyridinone, **13 - hydroxy-7-phenyl-, benzoate (?)**, 280^a.

Dilodiform*, electrolytic prepn. of, 1125^a.

Dilisoamylamine, hydriodide, 1403^a.

Dilisoamylthallie chloride, 3439^a.

Dilisoamylthallie fluoride, 3439^a.

Dilisobutyl. See *Hexane*, **2,5-dimethyl-**.

Dilisobutylamine, hydriodide, 1403^a.

and hydrochloride, 3478^a.

—, **6N-nitroso-**, 3478^a.

Dilisobutylthallie chloride, 3439^a.

Dilisobutylthallie nitrate, 3439^a.

Dilisopropyl. See *Butane*, **2,3-dimethyl-**.

Dilisoamylthallie chloride, 3439^a.

Dilisoamylthallie nitrate, 3439^a.

Diketones. See *Ketones*.

Dilactic acid. See *Dilactylic acid*.

Dilactylic acid (α, α' - oxybispropionic acid), 3082^a.

spectrogram in CHCl_3 , 2091^a.

Dilatation. See *Expansion*.

Dill, fat content of fruits of, 2278^a.

Dill oil, 3565^a.

Dilution. (See also *Heat of dilution*.)

alc. contraction on, 759^a.

effect on colloids, 920^a.

energy (free) of, of barium chloride, 2900^a.

law of Ostwald, 922^a.

maintaining const., in fibrous liquid masses, app. for, P 588^a.

"Dilut-o-meter", for crank case-oil examn., 1772^a.

Dimensions, theory of, 2149^a.

Dimethylamine, viscosity of mixt. with PhOH , 1362^a.

Dimethylanilinephthalein*, physiol. action on intestines, 2710^a.

Dimethylene-1,3-oxalimine*, rings, synthesis and division of, 2335^a.

Dimethylstannyl, reactions of, 3250^a.

Dimethyl sulfate. See *Methyl sulfate*.

Dimethyl yellow, color-change interval of, 1828^a.

Dimolybdo-mannitol, 1545^a.

Dinaphthantracene. See *Dibenzanthracene*.

Di - 1 - naphthenylazosulfime. See *1,2,4-Thiadiazole*, **3,5 - di - 1 - naphthyl-**.

Dinaphthofluorene. See *Dibenzofluorene*.

Di-1-naphthylamine, reaction with *p*-sulfo-benzenediazonium salts, 2200^a.

Di-2-naphthylamine, reaction with *p*-sulfo-benzenediazonium salts, 2200^a.

Dinicotinic acid, **4 - p - anisyl - 2 - cyano-1,2 - dihydro - 1,2,6 - trimethyl-**, dimethyl ester, 2497^a.

—, **4 - p - anisyl - 1,2 - dihydro - 1,6 - dimethyl - 2 - methylene-**, diethyl ester, 2497^a.

—, **4 - p - anisyl - 1,2 - dihydro - 1,6 - dimethyl - 2 - (phenylcarbamiylmethylene)-**, diethyl ester, 2497^a.

—, **4 - p - anisyl - 1,2 - dihydro - 1,2,6 - trimethyl-**, diethyl ester, 2497^a.

—, **4 - p - anisyl - 1,2,3,6 - tetrahydro-1,2,6 - trimethyl-**, diethyl ester, 2497^a.

—, **2 - cyano - 1,2 - dihydro - 4 - isobutyl-1,2,6 - trimethyl-**, diethyl ester, 2497^a.

—, **2 - cyano - 1,2 - dihydro - 1,2,6 - trimethyl-**, diethyl ester, 2496^a.

—, **2 - cyano - 1,2 - dihydro - 1,2,6 - trimethyl - 4 - (m - nitrophenyl)-**, diethyl ester, 2497^a.

—, **2 - cyano - 4 - ethyl - 1,2 - dihydro-1,2,6 - trimethyl-**, diethyl ester, 2497^a.

—, **1,2 - dihydro - 1,6 - dimethyl - 2 - methylene-**, diethyl ester, perchlorate, 2497^a.

—, **1,2 - dihydro - 1,6 - dimethyl - 2 - methylene - 4 - (m - nitrophenyl)-**, diethyl ester, and perchlorate, 2497^a.

—, **1,2 - dihydro - 1,6 - dimethyl - 2 - methylene - 4 - phenyl-**, diethyl ester, and perchlorate, 2497^a.

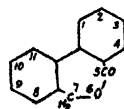

—, **1,2 - dihydro-1,6 - dimethyl - 4 - (m-nitrophenyl) - 2 - (phenylcarbamiylmethylene)-**, diethyl ester, 2497^a.

—, **1,2 - dihydro - 4 - isobutyl - 1,6 - dimethyl - 2 - methylene-**, derivs., 2497^a.

—, **1,2 - dihydro - 4 - isobutyl - 1,6 - dimethyl - 2 - (phenylcarbamiylmethylene)-**, diethyl ester, 2497^a.

—, **1,2 - dihydro - 4 - isobutyl - 1,2,6 - trimethyl-**, diethyl ester, 2497^a.

- , **1,2-dihydro-2-isopropylidene-6-methyl-4-phenyl-(?)**, diethyl ester, perchlorate, 2497².
- , **1,2-dihydro-6-isopropyl-2-methylene-4-phenyl-(?)**, diethyl ester, perchlorate, 2497².
- , **(1,2 and 1,4)-dihydro-1,2,4,6-tetramethyl-**, diethyl ester, 2497⁴.
- , **1,2-dihydro-1,2,6-trimethyl-4-(m-nitrophenyl)-**, diethyl ester, 2497⁴.

Electrokinetic changes, between solid phases and electrolytes in soln., 2772⁴.
Electrokinetics, 2903⁹.
Electrolysis. (See also *Cathodes; Cells, electrolytic; Electrodes; Metallurgy*; and such headings as *Copper, metallurgy of*; also various substances commonly electrolyzed commercially, as *Sodium chloride*, and the electrolytic products, as *Sodium hydroxide and Chlorine*.) P 1541⁶.
 of alloys (molten), 2167⁹.
 comparison with oxidation-reduction conditioned on passage through a membrane, 305⁹.
 of crystals, 1798².
 with dropping Hg as cathode, 1099⁴, 1222⁴, 2905¹.
 of equimolar mixts., 3432⁴.
 of Fehling soln., 3416³.
 of fused salts, P 938⁷, 1820¹, P 2607⁴.
 with gas cathode, 2160⁴.
 generating gases by, P 2786⁵.
 intermittent-current, 3416⁴.
 micro-, 938².
 of organic compds., P 1825².
 polarization in, counteracting, P 1667⁷.
 in presence of volatile solvents, app. for, 1969⁹.
 by stray currents, measurement of, 1379⁹.
 by stray currents, prevention of, P 15².
 in sulfur dioxide (liquid), 3416².
 theory of, of ternary alloys from binary salt fusions, 3410⁴.
 voltage of, calcn. of, 1227⁴.
Electrolytes. (See also *Amphoteric substances; Ionization, electrolytic; Ions, electrolytic; Salts*.)
 activities of strong, 1366¹, 1521⁴, 2156³, 2900⁴.
 adsorption of, on charcoal, 1976².
 adsorption on particles, measuring, 2768⁴.
 in animal organism, role of, 1716⁹, 2080², 2229⁴.
 anomalous behavior of strong, 922⁴.
 in body fluids in nephritis with edema, 2699⁴.
 cellular colloidal, dispersion in relation to mineral exchanges, 2346⁹.
 in cerebrospinal fluid, in certain diseases, 3110¹.
 coagulation of colloids by a mixt. of, influence of ions carrying same charge on, 3046⁴.
 coagulation of colloids by mixts. of, 1517⁹, 1801⁴.
 coagulation of sols by, 1976².
 colloid pptg. power of, 2186⁷.
 colloid pptn. by, 919⁴, 1078⁴.

- colloid pptn. by, influence of nonelectrolytes on, 761¹.
- colloid protection by, in an amt. too small to cause flocculation, 2201⁷.
- combination of, within the cell, influence of poisons on state of, 2086³.
- concd. aq. solns. of strong, theory of, 1649¹.
- constitution of solid, 428².
- definition of, 1221⁶.
- dielec. const. of water in strong, 1653².
- dielec. consts. of solns. of, 1808², 3058².

 tannage in abs., 1506^o.
 thymus involution produced by injections of, 3323^o.
 from tuber and root crops in Gt. Britain, 1613^o, 3142^o.
 uses of, 698^o.
 vapor pressures of binary and ternary mixts. of hydrocarbons, water and, 1937^o.
 vinegar manif. from, 374^o.
 viscosity (relative internal) of, 2151^o.
 water detn. in mixts. of ether, water and, 24^o.
 wetting by, 3189^o.
 from wood, 2257^o.
 in yeast metabolism, 2355^o.
Ethylamine, complex compds. with Co, 68^o.
 3 - formamido - 4 - hydroxybenzenearsonate, P 1327^o.
 internal pressure of, 3394^o.
 prepn. of, 35^o.
 —, β , β -diphenyl-, and chloroaurate, 2822^o.
 —, β -phenyl-. See *Phenethylamine*.
 —, β , β' -5-m-tolylenebis-, 1564^o.
 —, β -triphenyl-, -HCl, 2822^o.
Ethyl bromide. See *Ethane, bromo-*.
Ethyl chloride. See *Ethane, chloro-*.
Ethyl compounds, polarization of light scattered by vapors of, 2600^o.
Ethyl disulfide, and ethylene trisulfide of Ray, 2027^o.
Ethylene, activation of, 236^o.
 adsorption equil. of mixts. with CO₂, 1975^o.
 adsorption film of, 595^o.
 as anesthetic, 1162^o, 1312^o, 3121^o, 3122^o, 3540^o.
 anesthetic mixt. with O, prevention of explosion due to static spark in, 2565^o.

- catalytic action of Al_2O_3 and Fe on, 2590³.
- chloride derivs. of, effect on nerves of the skin, 856¹.
- combustion of, in prepn. of $\text{C}_2\text{H}_4\text{Cl}_2$, 966⁷.
- compressibility of and deviation from Avogadro's law, 2151⁴.
- decompn. by heat, 1191⁶.
- dielec. const. of, 3417⁸.

5-phenyl-, 246^a.
3,4-Furandicarboxylic acid, tetrahydro-
2-keto-5-phenyl-, 2643^a.
2,5-Furandione. See Maleic anhydride.
2-Furanmethanediol, tetrahydro-, di-
 acetate, 2781^a.
2-Furanol, tetrahydro-, 468^a.
2(3)-Furanone, 5-phenyl-. See lactone under
 β -*Bulenic acid*, γ -*hydroxy- γ -phenyl-*.
2,3,4-Furantricarboxylic acid, 2,3-di-
hydro-5-methyl-, triethyl ester, 246^a.
 —, **2,3-dihydro-5-phenyl-**, triethyl ester,
 246^a.
- Furasan (1,2,5-oxdiazole),** ($\text{O} \cdot \text{N} \cdot \text{CH} \cdot \text{CH} \cdot \text{N}$)
 1 2 3 4 5
 —, **3-*p*-anisyl-4-phenyl-**, and 2-
 (or 5)-oxide, 2819^a.
- , **3,4-bis(phenyliminomethyl)-, 2-**
 oxide, 2808^a.
 —, **3-methyl-4-phenyl-**, 282^a.
3-Furazanaldehyde, 4-(phenylimino-
methyl)-, 5-oxide, oxime-, 2807^a.
3-Furazancarboxamide, 4-cyano-, 2(or 5)-
 oxide, 2808^a.
3,4-Furazandialdehyde, 2-oxide, 3-phenyl-
 hydrazone, 4-oxide, 2807^a.
3,4-Furazandinitrile, 2-oxide, 2808^a.
Furfural, Furfuraldehyde. See 2-Furaldehyde.
Furfurole. See 2-Furaldehyde.
Furfuryl alcohol. See 2-Furancarbinol.
Furil (bipyromucyl; di-2-furylglyoxal)
 dioxime, as reagent for detection and detn. of
 Ni, 1548^a.
Furnace. (See also *Kilns; Refractory ma-*
terials; Regenerators; Retorts; Sulfur burn-
ers; and "retorts" under Gas, illuminating
and fuel.)
 for activation of charcoal or reduction of
 NiO by H₂, P 384^a.
 annealing, P 1183^a.
 for copper sheets, etc., P 2633^a.

 didymium fluorescence in, 779⁴.
 drawing sheet, P 713⁴.
 elasticity and strength of, 1331⁴.
 elec. cond. of electrolyte solns. in powdered, 923⁴.
 elec. cond. of soda-lime, 2394⁴.
 elec. insulating, P 1762⁴.
 elec. penetrability of, detn. of, 3150⁴.
 electrode in biochemistry, 3281⁴.
 electrodeposition of metallic mirrors on, P 879⁴.
 electrolysis through, 2772⁴.
 electromotive properties of, 3005⁴.
 entropy and vapor pressure of, 2903⁴.
 flow of molten, regulation of, P 566⁴.
 in foodstuffs, 3130⁴.
 frosting, P 566⁴, P 3005⁴.
 furnace, P 1337⁴, P 1480⁴, P 1762⁴, P 2395⁴, P 2396⁴, P 2579⁴, P 2732⁴, P 3575⁴, P 2869⁴, P 3005⁴.
 furnace, construction and operation of, 1332⁴.
 developments in, 2395⁴.
 feeding device for, P 158⁴.
 fuel consumption in, 2115⁴.
 melting and refining, P 1337⁴.
 muffle, P 713⁴.
 refining, P 3575⁴.
 sandstone block refractory in, 2395⁴.
 silica brick and chamotte block used in, 1332⁴.
 tank design, 2395⁴.
 tank, water-cooled, P 158⁴.
 thermotech. investigations of, 3573⁴.
 fusibility and viscosity of, 2394⁴.
 germanium, 2429⁴.
 hardening, P 1183⁴.
 heat-insulating material of, P 1183⁴.
 heat treatment of, effect of, 1036⁴.
 helium diffusion through, 3183⁴.
 industry, developments in, 2395⁴.
 ink for use on, P 2277⁴.
 ion exchange in, 3005⁴.
 lab., chem. and thermal resistance of, 2393⁴.
 leer for "firing in" decorated, P 1935⁴.
 limestone for making, 1478⁴.
 low-expansion, P 3154⁴.
 manuf. of, P 158⁴, P 1183⁴, 1331⁴, 2867⁴.
 manuf. of, at Ford plant, 3005⁴.
 manuf. of, in Bristol in early days, 2395⁴.
 mat, microscopic structure of surfaces of, 1331⁴.
 melting and refining, P 566⁴.
 melting, development of, 3356⁴.
 mixing app. for, P 1763⁴.
 mixing of ingredients for, 1332⁴.
 moisture accumulation on, prevention of, P 384⁴, P 1331⁴.
 molds for, P 1039⁴.
 natural, phys. properties and chem. compn. of, 456⁴.
 opaque to ultra-violet rays, P 1934⁴.
 optical, barium, P 158⁴.
 optical, review, 2114⁴.
 permeability for ultra-violet radiations, 3220⁴.
 photo-elastic consts. of, 2731⁴.
 phys. chem. state of, 1331⁴.
 physico-chem. compn. of, P 2114⁴.
 plate, casting, P 1763⁴.
 plate, forming, P 1763⁴.
 plate, manuf. at Chantierine works, 3356⁴.
 polishing, P 3571⁴.
 polymorphism and tempering of, 2394⁴.
 potash for manuf. of crystal, 2115⁴.
 potential difference between solns. of electrolytes and soft, 1808⁴.
 pots, P 3575⁴.
 pots, "arching" of, 1761⁴.
 pots, fireclays for, 3152⁴.
 Pyrex, industrial equipment of, 3175⁴.
 quartz—see "fused" under *Silica*.
 rain drops on, compn. for dispersing, P 3572⁴.
 raw materials (German) for, 1332⁴.
 refractories for manuf. of, 1183⁴.
 resistance to devitrification, 448⁴.
 rolling, P 158⁴.
 rolling, app. for, P 1763⁴.
 selenium in, 1331⁴.
 semi-opaque, 3573⁴.
 shaping tubes, etc., of, P 1641⁴.
 sheet, app. for making, P 566⁴, P 1763⁴.
 sheet, formation of, P 158⁴, P 566⁴.
 silica—see "fused" under *Silica*.
 silvering—see *Silvering*.
 slag in manuf. of, P 3359⁴.
 sorption of NH₃ and CO₂ by, 1215⁴.
 "splinterless" reinforced sheets, P 879⁴.
 sponge, P 386⁴.
 strass, 2115⁴.
 structure of, 1213⁴, 3181⁴, 3183⁴.
 surface layers on, 2290⁴.
 surface tension of molten, 2394⁴.
 tank block comparisons, 3575⁴.
 tank block for window, 2395⁴.
 tank blocks, action of As compds. on, 1033⁴.
 tank design, 2395⁴.
 technology, developments in, 711⁴.
 temp. of incandescent bell, device for measurement of, 3040⁴.
 thermal endurance of, 1183⁴, 1477⁴.
 thermophosphorescence of, produced by Ra radiation, 1819⁴.
 titania effect on, 385⁴.
 uniting Cu tubes to, P 784⁴.
 uniting tubes of metal and, P 1069⁴.
 vapor pressure of components of, 3184⁴.
 viscosity of, 878⁴, 2114⁴, 3573⁴.
 viscosity of, effect of compn. on, 385⁴, 356⁴.
 viscosity of, measurement of, 2430⁴.
 viscous, spout for delivering, P 386⁴.
 walls for use against molten, 1762⁴.
 weathering of bulb, 1479⁴.

- window, flattening, app. for, P 1935¹.
 withdrawing from tanks, app. for, P 158⁴.
- Glass substitutes**, 3003³, P 3593¹.
 gelatin compn., P 2264⁴.
- Glassy state**, theory of, 1360⁶.
- Glauber salt**. See *Sodium sulfates*.
- Glaucoma**, adrenaline injections in, 1911⁴.
 blood reaction in, 2528¹.
 pupillary and ophthalmotonic effect of atropine and pilocarpine in, 3542⁴.
- Glaucoma scintillans**, conjugation of, effect of medium on, 2377⁹.
- Glauconite**, treating, P 2866⁵.
 for water-softening, P 693³, P 2097³, P 2717⁴.
- Glasses**, aventurine, 712⁴.
 cadmium compds. in, 562¹.
 in ceramic industry, 566⁴.
 chem. comparison with glasses and enamels, 2116².
 cold, wall and floor plates, P 1480³.
 colored by Mo, 1934¹.
 defects on whiteware, 1933⁷.
 effect on phys. properties of porcelain, 2868⁷.
 refractory, P 386⁴.
 soly. of, used in cooking, 2869³.
 stresses in, 1037⁴.
 sulfuring on earthenware, 1480¹.
 turquoise alk., 1480².
 zinc silicate, colors in, 712⁵.
- Glazing**, salt, of ceramic ware, P 3575³.
 salt, kilns for, P 2869³.
- Gleokosa**. See *Chloramine-T*.
- Gliladin**, biuret reaction, effect of glycerol on, 2682².
 constitution of, 1712⁴.
 equil. in aq. soln., 662⁹.
 isoelec. point of, 1079².
 mol. wt. of, 2059³.
 optical rotation of, 3479³.
 prepn. of, 3503³.
 soly. of, 3129⁴.
 trypsin action on, 1433³.
 * tryptophan and cystine content of, of wheat, 2062².
 in wheat of diff. types and varieties, 1014⁶.
- Globoids**, alkali action on, 2063³.
- Globulins**. (See also *Euglobulin*; *Pseudoglobulin*; *Thyroglobulin*.)
 -albumin fraction of beef flesh, amino acids in, 547¹.
 albumin-, ratio effect on osmotic pressure of serum proteins, 3279².
 albumin-, ratio in blood in tuberculosis, 2234⁶.
 albumin-, ratio in immune serums, 341³.
 in blood in cases with diminishing blood sedimentation, 2849⁶.
 in blood of lepers, 2700³.
 in blood plasma of young calves and a cow following injection of *B. abortus* and of pregnant and non-pregnant cows or of cows which have aborted, 2236³.
 blood sera of rabbits immunized against, from human sera, 112².
 of blood serum, 835⁴, 2072⁵.
 effect of As on, 3523⁴.
 effects of dil. acids and alkalis on, 1870³.
 in malignant tumors, 1158³.
 mol. wt. of, 2059³.
 from normal guinea pigs, surface tension of plasma after injecting into guinea pigs, 3311¹.
 soly. of, 2832⁵.
 in bran, 2677⁷.
- calcium content of, 993³.
 from cerebrospinal fluid, 1893¹.
 cleavage by plant proteases, 93³.
 coagulation by heat, effect of alk. salts on, 837⁴.
 complement action and, 1892³.
 compds. with salts of multivalent ions, 659⁴.
 detn. in blood serum, 665¹.
 detn. in cerebrospinal fluid, 1873³, 1874⁹.
 effect on agglutination, 120⁶.
 heat effect on, 1285⁷.
 in immunity reactions, 1894².
 isoelec. point of, 2528².
 of jack bean, 2677⁹.
 in organs in protein immunization and HgCl₂ poisoning, 2528³.
 pathol. increase in, 536².
 in Sachs-Georgi reaction, 1894³.
 sensitizing Congo red by means of, 3493¹.
 sterilization of, P 3566¹.
 toxicity of, from normal serum, 1895³.
 tryptophan and cystine content of α - and β -, 2062³.
- Gloss**, detn. of, of varnishes, 2418⁵.
- Glossophytia**, yeast in treatment of, 3118².
- Gloves**, cotton fabrics for, finishing, 2416⁶.
 rubber, manuf. of, 1793¹.
- Glow discharge**. See *Electric discharge*.
- Glucal**, transformation into desoxyglucose in rabbits, 1005⁷.
- Glucemia**. (See also *Blood sugar*; *Hypoglycemia*.)
 adrenaline, 3117², 3120².
 adrenaline, effect of alkali and of atropine on, 2242⁹.
 adrenal medulla role in pseudodffective, 2522⁹.
 alimentary and sympathetic, 2238⁴.
 arterial, variations of, 2693³.
 blood vol., Cl concn. and Cl distribution in, 2530⁴.
 caused by extirpation of salivary glands, 1297⁷.
 of cooling intoxication, 3324⁵.
 crit., 537⁴.
 diabetic, influence of K on, 1737⁹.
 effect on milk secretion in women, 1886⁷.
 effect on resistance to bacterial toxins, 2080⁷.
 from glucose injection in "acid-fed" and "alk.-fed" animals, 1153².
 glycogen behavior in, effect of insulin on, 1733⁶.
 glycogen content of liver during, influence of insulin on, 344⁶.
 hydrogen-ion concn. and, 1889³.
 after ingestion of ordinary meal after fast, 3518³.
 insulin effect on, 1456¹.
 lactic acid in blood in, 1885⁹.
 from lactic acid injection, 1305⁷.
 lumbar puncture and, 2082³.
 lung ext. effect on, 2977⁴.
 morphine, adrenaline effect on, 1297³.
 in myxedema, 2083³.
 parasympathetic and asphyxia, 2238⁴.
 pituitrin, 3125⁷.
 potassium influence on diabetic, 2086³.
 in pregnancy, 1010⁶.
 produced by air injection into udder, 3532⁴.
 for protein ingestion, 96⁶.
 recuperation of, after action of insulin, 2242⁷.
 relation to excretion of acids, bases and sugar in U nephritis, 115⁷.
 respiration regulation in, 2286³.

- respiratory exchange in, effect of insulin on, 350².
 secretin and, 1298¹, 1904¹.
 from sectioning duodenal mesentery, 3529¹.
 after splenectomy, 337².
 vitamin C deficiency and, 2069¹.
 water imbibition and, 3528¹.
- Glucium**. See *Beryllium*.
- Glucosacetovanillone***, *d*-, androsin and, 2672¹.
- Glucodesose**, glucal transformation into, in rabbits, 1005⁷.
- Glucoheptonic acid**, lactone formation from, 3256⁴.
- , **4-methyl-***, lactone formation from, 3256⁴.
- α -Glucoheptonic acid**, **4-methyl-**, *d*-, lactone, 1131¹.
- Glucokinin**, effect on growth and metabolism in maize seedlings, 1882¹.
 effect on metabolism of liver cells, 1732¹.
- Glucolysis**, by blood, 3526¹.
 in blood *in vitro*, 2352¹, 3276¹.
 by blood, kinetics of, 324³.
 by cancer cells, 1737².
 in carcinoma, 3532¹.
 combined sugar and, 2961¹.
 in diabetes, intensity of, 1895¹.
 effect of hydrogen, Ca and Hg ions on, 3114¹.
 effect on inorg. P of blood *in vitro*, 1886¹.
 hydrogen-ion concn. and, 1889³.
 insulin effect on, 3221^{1,2}, 1900⁷, 3541¹.
 insulin effect on, by erythrocytes, 3526¹.
 insulin effect on, in heart, 1905⁷.
 by lung tissue, 1290¹.
 measurement of, 1720⁷.
 rates in diff. bloods, 116².
 tissue, in diabetes, 3537¹.
 of tumors, 2369¹.
- Glucometer**, 2353¹.
 liquid for Burmann's, keeping quality of, 2109².
- Gluconic acid**, formation by *Aspergillus niger*, 2355¹.
 formation from sugar in fungus cultures, 1878¹.
p-tolylsulfonylhydrazide, 261¹.
 —, **triphenylmethyl-**, *d*-, derivs., 2479^{2,3}.
- Glucoproteins**, carbohydrate group of, 1715¹.
- Glucosamine**, configuration of, 2672¹.
 detn. of, 623¹.
 effect on insulin hypoglycemia, 2367¹.
 hydrochloride, detn. of, 1715¹.
 phosphatide contg., from brain, 2676¹.
- β -Glucosan**, from cellulose, 41¹.
- Glucosans**, 2212¹.
 physiol. behavior of, 2062⁷.
- Glucose**, acid detn. in potato sirup, 1829⁷.
 book: Die Fabrikation des Strkezuckers, 1506¹.
 cryst., P 2756¹.
 decolorization of, P 189¹.
 glycoside or, 2478¹.
 refining, Norit in, 1789¹.
- d*-Glucose**. (See also *Blood sugar*; *Glucemia*; *Glucosuria*; *Hypoglycemia*; *Sugar analysis*.)
 acetone formation from, by *B. acetohilicum*, 3282⁷.
 behavior of α - and β -, towards yeast and Taka-diastase, 3279¹.
 in blood of normal inhabitants of the tropics and of birds in avitaminosis, 2363¹.
 in blood serum, effect on anthrax development, 2637¹.
 blood serum, microbial alteration in ampules, 2258¹.
 blood sugar curve in diabetics after administration of, insulin effect on, 3320².
 in body fluids, rotatory power of, 1886².
 bromoacetyl derivs., optical rotation of, 249¹.
 from cane sugar, 472¹.
 in carbohydrate metabolism, 3274¹.
 from cellulose-contg. materials, P 729¹.
 in cerebrospinal fluid, 1450¹.
 colloidal, 1978¹.
 colloidal, stability of, 2153¹.
 combustion of, application of laws of diastatic action to, 1733⁷.
 condensation of, 2642¹.
 constitution of, 2811¹.
 from corn stalks and sorghum, 414¹.
 degradation by colon bacillus, 2968¹.
 derivs., 44^{1,2}.
 as detoxicator in animal organism, 98¹.
 5,6-dichlorohydrin*, and derivs., 2479¹, 2480^{1,2}.
 diffusion of, contd. in blood and in pure solns. of, 3520¹.
 distribution between blood plasma and red corpuscles, 2845¹.
 effect of bicarbonate and, on excitability of frog heart, 1904¹.
 effect of concn. of, on velocity of synthesis of β -methyl- and β -ethylglucoside, 3495¹.
 effect of feeding, on blood sugar level in rabbits, 1101¹.
 effect of injection of, on blood sugar, 3302¹.
 effect of insulin and muscle tissue on, *in vitro*, 834¹.
 effect of oral administration of, 2974¹.
 effect of simultaneous administration with insulin, 125¹.
 effect on blood sugar of intrapancreatic administration of, 351¹.
 effect on circulation of the blood and movement of water, 349¹.
 on coagulation of sols by electrolytes, 596¹.
 on colloidal equil. of lipoids, 3279¹.
 on diastatic activity of saliva, 2060¹.
 on hemolytic and green growth of streptococci in blood agar, 1440¹.
 on hydrolysis of sucrose by invertase from honey, 835¹.
 on insulin hypoglycemia when administered by stomach tube, 2367¹.
 on insulin intoxication, 2087¹.
 on lactic acid in blood, 2084¹, 2370¹.
 on lymph of thoracic duct, 3545¹.
 on mucus of frog gages, 3540¹.
 on oxidation* of $\text{AcCH}_2\text{CO}_2\text{H}$ by H_2O_2 , 242¹.
 excretion under intravenous injection, 115¹.
 fermentation by yeast, effect of insulin on rate of, 1877¹.
 fermentation of, 3481¹.
 fermentation of, A evolved during, 2687¹.
 formation from glucosamin* in the organism, 2367¹.
 formation from starch by amylases, 2678¹.
 gas metabolism of mouse after injection of insulin and, 2231¹.
 glucemia from, effect of carbohydrate in diet on, 1601¹.
 in honey, ratio to fructose, 1462¹.
 hydrogen production at expense of, by colon bacillus, 2222¹.

- impermeability of blood corpuscles to, 2843⁷.
 impermeability of kidney for, 2843⁸.
 incubation with insulin and liver ext., 1718⁸.
 ingestion of, relation between concn. of glucose and chlorides in blood after, 1446⁷.
 insulin action on α, β , 3520⁷.
 insulin effect on, *in vitro*, 1886⁸.
 insulin-, treatment of surgical shock and non-diabetic acidosis, 3114¹.
 ionization const. of, 3446².
 isometabolic point for, 2220⁸.
 isosmotic perfusion soln. of, role of K and Na ions in, 3498⁹.
 isotonic soln., prepn. of, 1877⁸.
 liver tissue effect on, 1890⁸.
 manuf. and uses of refined, 584⁸.
 manuf. of, P 746¹, P 3613².
 metabolism of, 837¹, 2073⁷.
 monophosphates, and their behavior with yeast, 2811^{8,9}, 2812^{1,4,8}.
 mutarotation of, 1649⁹, 2034⁴.
 mutarotation of, kinetics of, 3055⁴.
 mutarotation velocity of, relation to pH , 1649⁹.
 omentum behavior following intraperitoneal injection of, 1447⁷.
 optical activity of, as influenced by normal and diabetic urines, 2371⁸.
 optical rotation of, from glucosides and disaccharides, 40⁹.
 oxidation of, 2327⁴.
 effect of insulin on, 2703⁸.
 induction of, 3532¹.
 by means of air, 2676⁸.
 permeability of cells for, disturbance in, in diabetes, 2674⁸.
 permeability of collodion to, effect of insulin on, 3278⁸.
 permeability of frog liver, 2231⁴.
 permeability of the plexus and of the meninges for, 2081⁸.
 phenylhydrazones of, mutarotation and structure of, 2034⁴.
 reaction with methylene blue, 1835⁸.
 reactive form of, 2079⁹.
 reducing power of, in presence of Cu salts, 2350⁸.
 reduction of, with Al-Hg, 973⁸.
 renal threshold for, 2702⁸.
 ring closure of, 502⁹.
 in solns. contg. alkali and phosphate, 2676⁸.
 soln. vol. of β -, 3418⁷.
 specific dynamic action of, 2974⁴.
 specific dynamic action of, effect of thyroid on, 1730⁹.
 storage capacity in body in diabetes, 2975².
 sweetness of, 3097⁸.
 tolerance, influence of diet on, 846¹.
p-tolylsulfonylhydrazones, 260⁸.
 transformation in KOH soln., 472⁸.
 in urine, 2374¹, 3276⁹, 3517⁸.
 utilization by warm-blooded animals, importance of adrenaline and insulin in, 3302⁸.
 yeast ext. action on, effect of acidity on, 834⁸.

 in urine after administration of Na benzoate, 3539¹⁹.
 as urochrome constituent, 992²⁰.
Glucuronic acid, 3-methyl-, 1131²¹.
Glucuronide, methyl-, prepn., 41²².
Gluc. (See also *Adhesives*.)
 acetic acid effect on, 1638²³.
 adhesiveness of, 1064²⁴, 1329²⁵.
 anaphylactogenic properties of aq. exts. of, 1006²⁶.
 antigenic properties of, 2852²⁷.
 balls or granules of, P 1744²⁸.
 books: 2552²⁹; Die Leim- u. Gelatine-Fabrikation, 2143³⁰.
 from chrome leather waste, P 2144³¹.
 for coated paper, 175³².
 compn. for sealing bottles, etc., P 586³³.
 compounding with rubber, P 748³⁴.
 electro-ultrafiltration of, 3404³⁵.
 evaluation of, 417³⁶.
 filtration of solns. of, P 1019³⁷.
 from fish bones, P 1620³⁸.
 industry, 2885³⁹.
 industry in Germany, 3035⁴⁰, 3614⁴¹.
 jelly strength of, penetrometer for testing, P 2280⁴².
 manuf. of, P 586⁴³, 2574⁴⁴.
 purification of, P 3615⁴⁵.
 pyrrole from, 1790⁴⁶.
 review, 747⁴⁷.
 rubber dispersion in, P 192⁴⁸.
 sheets of, app. for forming, P 1638⁴⁹.
 testing, 1207⁵⁰, 1962⁵¹, 2574⁵².
 waterproof casein, P 2144⁵³.
Glutaconaldehyde, and derivs., 517⁵⁴.
Glutaconic acid (HOOC.CH₂.CH:CH.CO₂H)
 α β γ
 derivs., chemistry of, 247⁵⁵, 470⁵⁶, 1410⁵⁷.
 —, α - bromo- α , β (or β , γ) - dimethyl-, 470⁵⁸.
Glutamic acid (α - aminoglutaric acid).
 anhydrides of, constitution of, 992⁵⁹.
 d-, reaction with aniline, 469⁶⁰.
 optical properties of, 1128⁶¹.
 N-benzoyl- β -phenyl- 2203⁶².
 cycloglutamyl-, 638⁶³.
 glutamyl-, isomer, and salts, 638⁶⁴.
 β -phenyl-, 2203⁶⁵.
 N-salicylal-, salts, 2640⁶⁶.
Glutaminic acid. See *Glutamic acid*.
Glutaraldehyde, dioxime, prepn. of, 1141⁶⁷.
Glutaramide, α , γ - dimethyl - N, N'-di-1-naphthyl-, 2477⁶⁸.
 —, α , γ -dimethyl-N, N'-di-2-naphthyl-, 2477⁶⁹.
 —, α - methyl - N, N' - di-2-naphthyl-, 2477⁷⁰.
 —, α , β , γ -trimethoxy-, 1409⁷¹.
Glutaranilic acid, γ -amino-, 469⁷².
Glutaranilide, α -methyl-, 2477⁷³.
Glutaric acid, dimethyl ester, SnCl₄ addn. compds., 50⁷⁴.
 • ionization const. of, 1802⁷⁵.
 photolysis of, 2454⁷⁶.
 —, α -amino-. See *Glutamic acid*.
 —, α - bromo - α - ethyl- γ -hydroxy- β , β -dimethyl-(?), γ -lactone, 1697⁷⁷.
 —, γ - bromo - α - ethyl- α -hydroxy- β , β -dimethyl-(?), γ -lactone, 1697⁷⁸.
 —, α -bromo- γ -hydroxy- β -phenyl-, monoethyl ester, γ -lactone, 2643⁷⁹.
 —, α -bromo- γ -methyl-, esters, 1408⁸⁰.
 —, α -bromo- β -phenyl-, dimethyl ester, 2643⁸¹.
 —, α -chloro- γ -methyl-, esters, 1408⁸².
 —, α , γ -diacetyl- β -methyl-, derivs., 246⁸³, 247⁸⁴.
 —, α , β -dibromo- α , γ -dimethyl-, 471⁸⁵.
 —, α , γ - dibromo - α - ethyl- β , β -dimethyl-, *cis*-, and *trans*-, and diethyl ester, 1697⁸⁶.
 —, α , β -dibromo- α (or γ)-methyl-, 470⁸⁷.
 —, α , β -dibromo- β -methyl-, 470⁸⁸.
 —, α , γ -dibromo- β -phenyl-, and esters, 2643⁸⁹.
 —, β , β -diethyl-, ionization const. and keto-enol equil. of, 1802⁹⁰.
 —, β , β -dimethyl-, ionization const. of, 1802⁹¹.
 •, β , β -dipropyl-, ionization const. of, and keto-enol equil. of, 1802⁹².
 —, β -ethyl-, ionization const. of, 1802⁹³.
 —, α -ethyl - α , γ - dihydroxy- β , β -dimethyl-, γ -lactone, 1697⁹⁴.
 —, α - ethyl - α - hydroxy- β , β -dimethyl-, γ -lactone, 1697⁹⁵.
 —, β -ethyl- β -methyl-, ionization const. and keto-enol equil. of, 1802⁹⁶.
 —, α -hydroxy- β -(γ - hydroxybutyl)-, derivs. (?), 2942⁹⁷.
 —, α -hydroxy- α (and γ)-methyl-, derivs., 1408⁹⁸.
 —, α -hydroxy- β , β , γ -trimethyl-, γ -lactone, 2329⁹⁹.
 —, α -iodo- γ -methyl-, esters, 1408¹⁰⁰.
 —, α -keto- β , β -dimethyl-, diethyl ester, 2329¹⁰¹.
 —, α -keto- β -phenyl-, oxime, and diethyl ester, 2203¹⁰².
 —, β -keto- α , α , γ , γ -tetramethyl-, cyclic anhydride with dimethylmalonic acid, 2189¹⁰³.
 —, α -keto- β , β , γ -trimethyl-, diethyl ester, 2329¹⁰⁴.
 —, α -methyl-, products derived from halogenated derivs. of, 1408¹⁰⁵.
 —, β -methyl-, ionization const. of, 1802¹⁰⁶.

- , β -phenyl-, ethyl ester, 494².
 —, α, β, γ -trimethoxy-, dimethyl ester, 1409⁵.
Glutaric anhydride, β -keto- $\alpha, \alpha, \gamma, \gamma$ -tetramethyl-, 2188².
Glutarimide, α, γ -dimethyl-*N*-1 (and 2)-naphthyl-, 2477².
***p*-Glutarotoluide**, α, γ -diethyl-, 2477².
 —, α, γ -dimethyl-, 2477².
 —, α -methyl-, 2477².
Glutarylfluorescein*, 986².
 —, β, β -diethyl-, 986².
 —, β, β -dimethyl-, 986².

Glutaryl rhodamine*, 986⁴.
 —, β, β -diethyl-, 986⁴.
 —, β, β -dimethyl-, 986⁴.
 —, β -ethyl- β -methyl-, 986⁴.
Glutathione, formation in bacterial cultures, 310².
 occurrence and detn. in tissues, 2217¹.
 oxidation of, catalysis by Fe, 430².
 oxidation of, peroxide formation during aerobic, 2060².
 oxidation-reduction mechanism of cells, effect of Cu and Au on, 3499².
 reduction of oxidized, by tissues, 2347².
 synthesis of, 2188¹.
 synthesis of, in higher animals, 1912².
Gluten, alc.-insol. in flour, relation to strength, 544².
 compn. of crude, 1459².
 development in wheat grain, 841⁴.
 fat and, in flour, 2539².
 of flour-mill streams, quality of, 1014².
 of flour, relation to gas retention by dough, 1913².
 protease effect on, during fermentation, 1914².
 reaction with HCl, 3500².
 starch sepn. from, app. for, P 1961².
 swelling of, effect of NH₄ salts on, 2966².
 in wheat (American and Italian), 1459².
Gluten, bromo-, 818².
Glutenin, detn. in cereal products, 1459².
 effect on strength of flour, 544².
 • individuality of, 2379².
 • isoelec. point of, 1079².
 mol. wt. of, 2059².
 prepn. and detn. of, 1914².
 from wheat of diff. types and varieties, 1014².
Glutin. See *Gelatin*; *Gladin*.
Glycemia. See *Glucemia*.
Glyceric acid, diorthophosphate of, from blood, 2076¹.
 rotation of *L*-, effect of substitution on, 2076¹.
Glycerides, of cacao fat, 904².
 in corpus luteum, 323².
 methyl ketones in, oxidative decompn. of, by molds, 2244².
Glycerin. See *Glycerol*.
Glycerol, acetates—see *Acetin*.
 adiabatic cooling of, 769².
 in ashing flour, 1459².
 assimilation by yeast, 1280².
 carbonic acid esters, 468¹.
 density of solns. of, 1519¹.
 detection of, 803¹, 1828², 3074², 3281².
 detn., 903².
 detn. in vinegar, 556².
 dielec. const. and absorption coeff. of, 1653².
 distn. of, P 1635¹.
 effect on Bi sol, 3402¹.
 on biuret reaction, 2682².
 on constancy of living substance, 3288².
 on insulin intoxication, 2087², 3128².
 on muscle, 1910².
 on parotid secretion, 2847².
 on uric acid excretion, 348².
 esterification with butyric acid, 37¹.
 esters—see *Glycerides*.
 from fat cleavage by means of ZnO, 3606⁴.
 from fermentation, 1752², 2354².
 fermentation by *B. acetoethylicum*, 3282².
 formates—see *Formin*.
 freezing points of, and its aq. solns., 3050².
 glycerinum amyli, 2259².
 growth-promoting factor of, 3104².
 heat of soln. of, 1982².
 manuf. of, P 2278², 3167².
 manuf. of, by fermentation, P 149², 869², P 3347².
 mercuric halide soly. in mixts. of water and, 1218².
 mixts. with water, capillary consts. and viscosity coeffs. of, 3395².
 mixts. with water, compn. of liquid and vapor phases of, 3413².
 pharmacopoeial standards for, 3144².
 purification by dialysis, P 1354².
 purification from volatile fatty acids and their esters, 1353².
 reaction with acetone and with H₂BO₃, 970².
 solu. vol. and refraction consts. of, 3418².
 spectrum of, 1601⁴.
 suppositories, 2862².
 systems: H₂O, and H₂O-NaCl, vapor pressures of, 2139².
 tris(*m*-nitrobenzoate), 247².
Glyceroluria, identification of, 3281².
Glycerophosphatase, in cachexia, role of, 1736².
Glyceryl nitrates. See *Nitroglycerin*.
Glycinamide. For derivs. see *Acetamide*.
Glycinanilide. (For derivatives see also *Acetanilide*.)
 —, *p*-allyloxy-, 2646².
Glycine, amino N content of urine after administration of, 3300¹.
 combination of toxic substances in the body with, parallelism with lipid-soly., 3325¹.
 complex compds. with Co, 68².
 effect on As₂S₃ or S sol, 3497².
 effect on Wassermann reaction, 2234².
 ester-HCl, prepn. of, 302².
 ethyl ester, hydrolysis of, 1804².
 hydrolysis in presence of charcoal, 1521², 1522².
 optical properties of, 1128².
 oxidation of, 3², 2809².
 as protein substitute in feeding, 315².
 reaction with aniline, 469².
 with CH₃X, 2809².
 with Zn(MnO₄)₂, 1715².
 sweetness of, 2092².
 synthesis in the body after ingestion of BzONa, 1445².
Glycine, N-acetyl-. See *Aceturic acid*.
 —, *N*-acridyl-. See *Acridineglycine*.
 —, *N*-alanyl-, *dl*-, oxidation of, 302².
 reduction of, 2033².
 —, *dl*-alanyldiglycyl-, asym. cleavage of, 2503².
 —, *l*-alanyldiglycyl-, from *dl*-alanyldiglycylglycine, 2503².

Glutarylrhodamine*, 986⁴.
 —, β, β -diethyl-, 986⁴.
 —, β, β -dimethyl-, 986⁴.
 —, β -ethyl- β -methyl-, 986⁴.
Glutathione, formation in bacterial cultures, 310⁹.
 occurrence and detn. in tissues, 2217¹.
 oxidation of, catalysis by Fe, 430⁵.
 oxidation of, peroxide formation during aerobic, 2060⁸.
 oxidation-reduction mechanism of cells, effect of Cu and Au on, 3499³.
 reduction of oxidized, by tissues, 2347⁴.
 synthesis of, 2188¹.
 synthesis of, in higher animals, 1912³.
Gluten, alc.-insol., in flour, relation to strength, 544⁹.
 compn. of crude, 1459⁷.
 development in wheat grain, 841⁴.
 fat and, in flour, 2539².
 of flour-mill streams, quality of, 1014⁴.
 of flour, relation to gas retention by dough, 1913³.
 protease effect on, during fermentation, 1914³.
 reaction with HCl, 3500⁹.
 starch sepn. from, app. for, P 1961³.
 swelling of, effect of NH₄ salts on, 2966⁵.
 in wheat (American and Italian), 1459³.
Gluten, bromo-, 818^{3, 5}.
Glutenin, detn. in cereal products, 1459⁴.
 effect on strength of flour, 544⁹.
 • individuality of, 2379⁴.
 isoelec. point of, 1079².
 mol. wt. of, 2059⁵.
 prepn. and detn. of, 1914².
 from wheat of diff. types and varieties, 1014⁴.
Glutin. See *Gelatin*; *Gludin*.
Glycemia. See *Glycemia*.
Glyceric acid, diorthophosphate of, from blood, 2076¹.
 rotation of *L*-, effect of substitution on, 2076¹.
Glycerides, of cacao fat, 904⁴.
 in corpus luteum, 323⁴.
 methyl ketones in, oxidative decompn. of, by molds, 2244³.
Glycerin. See *Glycerol*.
Glycerol, acetates—see *Acetin*.
 adiabatic cooling of, 769⁴.
 in ashing flour, 1459⁴.
 assimilation by yeast, 1289⁴.
 carbonic acid esters, 468¹.
 density of solns. of, 1519¹.
 detection of, 803¹, 1828³, 3074³, 3281².
 detn., 903⁷.
 detn. in vinegar, 556⁹.
 dielec. const. and absorption coeff. of, 1653⁴.
 distn. of, P 1635¹.
 effect on Bi sol, 3402¹.
 on biuret reaction, 2682³.
 on constancy of living substance, 3288⁷.
 on insulin intoxication, 2087³, 3128⁷.
 on muscle, 1910³.
 on parotid secretion, 2847⁴.
 on uric acid excretion, 348³.
 esterification with butyric acid, 37¹.
 esters—see *Glycerides*.
 from fat cleavage by means of ZnO, 3606⁴.
 from fermentation, 1752³, 2354².
 fermentation by *B. acetoethylicum*, 3282⁷.
 formates—see *Formin*.
 freezing points of, and its aq. solns., 3050³.
 glycerinum amyli, 2259⁹.
 growth-promoting factor of, 3104⁵.
 heat of soln. of, 1982⁷.
 manuf. of, P 2278³, 3167⁹.
 manuf. of, by fermentation, P 149², 869³, P 3347⁹.
 mercuric halide soly. in mixts. of water and, 1218⁴.
 mixts. with water, capillary consts. and viscosity coeffs. of, 3395³.
 mixts. with water, compn. of liquid and vapor phases of, 3413³.
 pharmacopeial standards for, 3144².
 purification by dialysis, P 1351².
 purification from volatile fatty acids and their esters, 1353³.
 reaction with acetone and with H₂BO₃, 970⁹.
 soln. vol. and refraction consts. of, 3418².
 spectrum of, 1661⁴.
 suppositories, 2862⁷.
 systems: H₂O, and H₂O-NaCl, vapor pressures of, 2139⁴.
 tris(*m*-nitrobenzoate), 217⁵.
Glyceroluria, identification of, 3281³.
Glycerophosphatase, in cachexia, role of, 1736⁹.
Glyceryl nitrates. See *Nitroglycerin*.
Glycinamide. For derivs. see *Acetamide*.
Glycinanilide. (For derivatives see also *Acetanilide*.)
 —, *p*-allyloxy-, 2646².
Glycine, amino N content of urine after administration of, 3300¹.
 combination of toxic substances in the body with, parallelism with lipid-soly., 3325¹.
 complex compds. with Co, 68².
 effect on As₂S₃ or S sol, 3197³.
 effect on Wassermann reaction, 2234³.
 ester-HCl, prepn. of, 302².
 ethyl ester, hydrolysis of, 1804².
 hydrolysis in presence of charcoal, 1521³, 1522².
 optical properties of, 1128⁷.
 oxidation of, 3³, 2809³.
 as protein substitute in feeding, 315³.
 reaction with aniline, 469⁹.
 with CH₂O, 2809³.
 with Zn(MnO₄)₂, 1715⁴.
 sweetness of, 2092².
 synthesis in the body after ingestion of Bz-ONa, 1445².
Glycine, N-acetyl-. See *Aceturic acid*.
 —, *N*-acridyl-. See *Acridineglycine*.
 —, *N*-alanyl-, *dl*-, oxidation of, 302⁴.
 reduction of, 2033³.
 —, *dl*-alanyldiglycyl-, asym. cleavage of, 2503³.
 —, *l*-alanyldiglycyl-, from *dl*-alanyldiglycylglycine, 2503³.
 —, *dl*-alanylglycyl-, asym. cleavage of, 2503⁷.

- , *l*-alanylglycyl-, from *dl*-alanylglycyl-glycine, 2503⁷.
 —, *N* - (aminocyanosaminomethylene)-(?), and derivs., 2052⁸.
 —, *N*-benzal-, salts, 243^{4,8}, 2630⁹.

 —, *N*-triphenylmethyl-, and derivs., 2479^{7,8}.
 —, *N* - *N* - triphenylmethylglycyl-(?), and derivs., 2479⁹.
 Glycine anhydride. See 2,5-Piperasinedione.
 Glycine hispida. See *Soy bean*.
 Glycinonitrile, *N*, α -di-*p*-anisyl-, 637⁵.
 —, *N*-phenyl- α -phenylimino-, reduction of, 282².
 Glycocholic acid. (See also *Bile acids*.)
 osmotic relationships of taurocholic acid, histone, protamine and, 527¹.
 Glycosoll. See *Glycine*.
 Glycocyanamide, 1-methyl-. See *Creatinine*.
 Glycogen, amorphous character of, 833⁷.
 blood sugar relation to, 2674³.
 catalytic action of, 3493⁴.
 in clams, relation to spoilage, 3134⁸.
 cleavage in muscle and yeast, 1716¹.
 constitution of, 974¹.
 decompn. by salivary diastase, 2674⁴.
 detn. in placenta, 1288¹.
 detn. in soln., 1437².
 in diabetes, 1451⁵.
 differentiation in *Paramecium caudatum*, 2536⁹.
 distinguishing, from dextrin, 1146⁴.
 in embryonic life, 2367³.
 in epithelium of uterus glands, 1009⁴.
 in fermentation, 3346¹.
 fermentative degradation of, action of alkali salts on, 2695⁸.
 formation by yeast, 3098⁸.
 formation in body following long-continued feeding of sugar, 123¹.
 function of liver in malaria, 858⁶.
 in heart, liver and muscles in diabetes, 2529⁵.
 heat of combustion of, 1869¹.
 hydrolysis by pancreatic amylase, 3100¹.
 insulin effect on, 1733⁴, 2703⁷.
 in kidney in phlorhizin glucosuria, 3304⁴.
 in leeches during protein assimilation, 3129⁴.
 of liver and muscle, effect of toxic agents on, 121³.
 of liver and muscle of albino rat, 3501⁷.
 in liver and muscle of rabbit, seasonal variation of, 1591⁷.
 in liver and white muscle tissue after adrenalectomy, 320⁸.
 in liver in acute yellow atrophy, 1448⁵.
 in anaphylactic shock, 1896³, 2852⁸.
 decompn. of, 2072¹.
 of depancreatized dog in state of inanition, insulin effect on, 3543¹.
 effect of vitamin B on, 2693⁹.
 in fetus and in the placenta, 324⁷.
 of fish, 2376¹.
 of frog, seasonal variations in relationship between structure of endocrine pancreatic islands and, 3520⁸.
 during hyperglucemia, influence of insulin on content of, 344⁹.
 insulin effect on, 349⁹, 1164⁹, 1456¹, 2229⁹, 2367⁸, 2974⁹, 3309⁹.
 from rachitic rabbits and from animals receiving a diet free from vitamin A, 1293⁷.
 salt influence on, 671¹.
 on vitamin-B deficient diet, 3519⁹.
 mol. wt. of, 658⁶.
 of muscle after hepatectomy, 1733³.
 in muscle, effect of adrenaline on, 3120^{2,4}.
 in muscles of frog after long period of claspings, 324⁴.
 in phlorhizin glucosuria, 3304⁴.
 synthesis and fixation of, in diseased livers, 3305².
 synthesis in muscle, 2073⁶.
 in tadpole development, 2244¹.
 tissue, in histamine shock, 3536⁹.
 yeast, 3274⁷.
 Glycogenolysis, adrenaline and insulin, 1165².
 insulin and, 3539⁴.

- by insulin, 3548^a.
- Glycol**, (*glylene glycol*; for deriva. see 1,2-Ethandiol), 4,4'-azobis-2-bromobenzoate, 2332^a.
- , bis(chloroformate), 3269^a.
- , detection of, 3074^a.
- , dibicarbonate, esters, 467^a.

Gum tragacanth, 376⁴.
 impurity in, 2110².
 nitrogen content of, 2109⁴.
 peroxidase and protein in, 702⁴.
Gum verec. See *Gum arabic*.
Guncotton. See *Nitrocellulose*.
Gunit, expansion coeff. of, 3360¹.
Gun metal, phys. properties of, 1395⁴.
 phys. properties of, influence of casting temp. and mass on, 1687⁴.
Gunpowder. See *Explosives*.
Guns, carburization as factor in erosion of barrels of machine, 2471².
 electroplating worn machine gun barrels, 12⁹.
 removing deposits from barrels of, P 1949⁴.
Gur. See *Jaggery*.
Gut, dyeing casts of, P 736⁹.
Gutta-percha, coagulated, aq. solns. of, 1207⁷.
 industry in Germany, 2144⁴.
 paste-like or sol. products from, P 749⁴.
 review, 908⁹.
Gypsum. (See also *Calcium sulfate*; *Plaster of Paris*.)
 albertite in, from Hillsboro, New Brunswick, 3078⁹.
 analysis of, 801⁴.
 articles of, P 3575⁹.
 calcined, specification for, 2112².
 coagulation of hydrated peat by means of, 380².
 crystal, deformation of, 2287⁴.
 crystn. of, rate of, 1804¹.
 dehydration products of, X-ray study of, 1346⁹.
 effect of temp. and pressure on, 760².
 effect on fertility elements of Palouse silt loam, 2384⁹.
 elasticity of selenite, 2794⁴.
 as fertilizer for sugar cane, 2718¹.
 for fertilizer, mining and manuf. of, 696².
 formation by pptn., 3449⁹.

- gas action on, at high temps., 3148^a.
 hydration of, 2592^a.
 hydration of, catalyzer for, 1620^a.
 industry in 1924, 8097, 3568^a.
 lattice constns. of, 2299¹.
 in Nullagine series, 626⁷.
 in Ontario at Long Rapids, 1838⁷.
 products of, 2397⁷.
 resources of U. S. in 1923, 876¹.
 for soil improvement, 2720^a.
 soly. of, conditions of max., 921¹.
 specifications for, 3331^a.
 sulfuric acid and sulfates from, 2262^a.
 waste, utilization of, 1334⁷.
Gyrolite, from Bombay, 3448^a.
- h**, 3212⁷.
H-acid. See *1-Naphthol-3,6-disulfonic acid*, *β-amino*-.
Haberlandt, Gottlieb, seventieth birthday, 666¹.
"Hackfleisch", moisture detn. in, 2855^a.
Haem, **Haemagglutination**, **Haematin**, etc. See *Hem*; *Hemagglutination*; *Hematin*; etc.
Haemadictyon amazonicum, yajaine and yajenine from, 2106¹.
"Haff disease", 2131^a.
Hafnium (*celtium*), atomic wt. of, 1070^a, 1643¹.^a, 1972¹.
 discovery and properties of, 2286⁷.
 magnetizing no. of, 1653^a.
 occurrence with Zr, 3391^a.
 sepn. from Zr, P 563^a, P 564^a, P 708^a.^a, P 877^a.^a, 1070^a.^a, P 1618^a, 1672¹, 2779^a.
 similarity to Zr, 3211^a.
 spectrum of, 1987^a, 2779^a.
Hafnium, analysis, detn. in malacon, 2315^a.
 detn. in zirconium dioxide, 1358^a.
 sepn. from Ti, Ce and Th, 2180^a.
Hafnium ammonium fluorides, soly. of, 2155^a.
Hafnium bromide, analysis of, 1972¹.
Hafnium compounds, manuf. of, P 1932⁷.
Hafnium oxide, density of, 753^a.
 in elec. lamp filaments, P 614^a.
 melting point of, 3182^a.
 in tungsten filaments, 1228^a.
 zirconium detn. in, 2000¹.
Hafnium phosphate, soly. of, 3404⁷.
Hafnium potassium fluoride, soly. of, 2155^a.
Hall, formation of, 2165¹.
Hair, classification of, 527^a.
 dyeing, P 1952^a, P 2750^a, P 3379¹.
 dyeing with ferricyanides, ferrocyanides, etc., P 2750^a.
 dyes for, 2105^a, 2134¹, P 2880¹.
 dyes for, analysis of, 379¹.
 falling, Silvikrin-Haarkur for prevention of, 2105^a.
 fine structure of, 833^a.
 horse, effect of Na₂S on cystine in, 2572^a.
 hydrolysis of, 746^a.
 by alkali, 3276⁷.
 effect of sulfides on, 746^a.
 by sodium sulfide, 1431^a.
 pomade for, P 1033^a.
 substances giving nitroprusside reaction in, 992^a.
Hair substitutes, P 398^a.^a.
 cellulose derivs. for, P 177^a.
 horsehair, P 404^a.
"Haisung", 1931^a.
Halide ions, effect on salivary digestion, 2074^a.
- Halides**, absorption of ultra-violet light by inorg. 3210⁷.
 acid, reaction with ester enolates, 2816⁷.
 behavior of simple, with water, 1106^a.
 chem. constitution of org., relation to speed of their reaction with inorg. iodides, 967¹.
 systems: AlBr₃-, thermal analysis of, 2902^a.
 titration of mixts. with cyanide, 796¹.
Halotils iris, compn. of, 1462^a.
Halite. See *Sodium chloride*.
Hall effect, 1652^a.
 with bismuth in weak fields, 1224^a.
 electron theory of, 8^a, 1224^a.
 intensity of magnetization and, 927^a.
 for nickel films, 2777^a.
 of photoelec. primary current for insulated crystals, 604^a.
 in photosensitive crystals, 3422^a.
Haller, biography, 2888^a, 3178^a.
Halloysite, of Jones Falls, Maryland, 3448^a.
Halochromism, of acylhydrazinoanthraquinones, 1274^a.
 of aromatic amino ketones, 1265^a.
 auxochromism, chromatic isomerism and, 3212^a.
 definition of, 2947⁷.
 of fulgides, 3089^a.
 of imines, 1267².
 of salts, electrochem. relation of free radicals to, 2486^a.
 in triphenylmethane and azo compds., 1257^a.
 of unsatd. ketones, 1662¹.
Halogen acids. See *Hydrogen halides*.
Halogenation, 2478^a.
 of acyclic satd. hydrocarbons, 2472^a.
 nitration and, 2191¹.
Halogen compounds, detection of volatile, 3072¹.
 double decompns. of siloxene with, 2313⁷.
 org., poly-, partial dehalogenation of, 2930^a.
 org., reaction with Al, 2929^a.
 polarity effects in aromatic, 474^a.
 reaction of org., with alkali metal sulfides, 967^a.
 reaction with Na vapor, velocity of, and light phenomena accompanying, 3221⁷.
Halogen hydrides. See *Hydrogen halides*.
Halogen ions. See *Halide ions*.
Halogens, absorption by mercurous salts, 787^a.
 atom, mobility of, 818^a.
 atoms, reactivity of, in halogenated malonyl derivs., 1696^a.
 book: *Chemie für Techniker*, 3135^a.
 detection of loosely bound, 1831^a.
 detn. of, 449^a.
 detn. of, in org. substances, 2465^a.
 effect of, on reactivity of the *meso*-position of the anthracene nucleus, 2489⁷.
 effect of substituted, on properties of org. compds., 3396^a.
 elec. moment of, 1797^a.
 isotopes of, and infra-red reflection spectra, 1371^a.
 labile nature in org. compds., 2027^a, 2320^a.
 mixts. with air, condensation nuclei produced by illumination of, 3429^a.
 photochem. study of, 780^a.
 reaction with cyanide ion, 3195^a.
 with nitrobenzaldehyde phenylhydrazones, 2938^a.
 with pyrrole, 278^a.
 with satd. aliphatic ketones in dil. aq. soln., kinetics of, 1366^a.

- simultaneous prepn. of, demonstration app. for, 2283^a.
 spectrum of, 2299^a, 2451^a, 3211^a.
 viscosities of liquid, 1215^a.
- Hamamelitannic acid**, prepn. of, 260^a.

 acetylcholine influence on, effect of narcotics on, 1312^a.
 action of, effect of osmotic pressure on, 2073^a.
 adrenalemia effect on, 1886^a.
 adrenaline action on, electrolytes and, 3117^a.
 adrenaline action on perfused, 1455^a.
 alc. and, 3114^a.
 alc. concn. in, after intravenous injection, 3539^a.
 antagonism between insulin and adrenaline action on, 447^a.
 arginase content of, of fishes, 673^a.
 arrhythmia perpetua, iodine hyperthyroidism and, 2528^a.
 aromatic acid ester and salt action on, 127^a.
 arspenamine action on, 1907^a.
 aseptic perfusion of mammalian, 1876^a.
 atropine effect on, 355^a.
 atropine effect on auriculo-ventricular cond., 351^a.
- auriculoventricular condition following injection of histamine, 2085^a.
 autonomic rhythm of turtle, 3528^a.
 beat, chem. regulation by liver, 2233^a.
 beat of *Petromyscus* and of frog under influence of emanation of diffusible K, 140^a.
 benzyzin and benzyphos effect on, 3127^a.
 blood serum influence on isolated, 1901^a.
 bromide effect on isolated, 1312^a.
 calcium ion effect on, 1600^a.
 calcium mobilization in, 2522^a.
 calcium salt action on, 132^a.
 cation effect on isolated auricles, intensification through concn. at Keith node, 3542^a.
 chem. condition of, effect of vagus stimulation on, 1295^a.
 chem. regulation of, influence of liver on, 1589^a.
 chloral hydrate effect on, 1906^a.
 chronaxie of isolated turtle, effect of pH on, 3542^a.
 contractile activity of myocardium of chick embryos, effect of salts of Ca and K on, 1900^a.
 coronary obstruction, digitalis action in presence of, 2084^a.
 of crab, effect of poisons of *Adamsia palliata* on, 3543^a.
 decompensation, alkali excretion into urine in, 105^a.
 amino acid content of blood in, 331^a.
 buffering possibility of serum in, 1736^a.
 in diet for anemia treatment, 2692^a.
 digitalis action on, 345^a, 1011^a, 3123^a.
 diseases of, blood fat in, 237^a.
 blood fibrin in, 1303^a.
 cholesterol concn. of blood in, 1305^a.
 creatinine content of urine in, 104^a.
 novasurol action in, 1598^a.
 novasurol in treatment of edema due to, 2375^a.
 quindine action in treatment of, 136^a.
 xanthoproteic reaction in, 3305^a.
 drug activity on, influence of temp. on, 2704^a.
 edema due to failure of, use of CuCl₂ in, 1897^a.
 effect of emanation and Ca on action of, 349^a.
 effect of potassium cyanide and of Cu on isolated, of frog, 540^a.
 effect produced by K content of exts. of supra-renal cortex on, 2708^a.
 effect of radium emanation and Ca on, 1011^a.
 elec. conduction in auricle of perfused, influence of H ion concn. on, 1303^a.
 ergotamine action on, 1012^a, 1155^a.
 ether effects on, 2710^a.
 ethylene influence on isolated, 1455^a.
 excitability of frog, perfused with glucose-bicarbonate solns., 1904^a.
 fat content of, in phlorhizin glucosuria, 3304^a.
 fibrillations, combined effect of quindine sulfate and KCl in, 1455^a.
 fluid from ventricles, compn. of, Donnan equil. and, 1295^a.
 formaldehyde effect on surviving, 1908^a.
 frequency in *Limax*, temp. characteristic for, 2984^a.
 functional condition of, influence of chem. agents on, 1012^a.
 function, radioactivity and, 2240^a.
 glycogen in, in diabetes, 1451^a, 2529^a.
 glucolysis in, action of insulin on, 1905^a.
 glucoside from squill which affects, P 380^a.
 gum acacia action on frog, 340^a.

- histamine effect on, 1455⁷.
 hydrastinine effect on autonomic innervation of, 1905⁸.
 hydrogen-ion concn. and, 1578⁸.
 inhibition, death due to, 3321¹.
 inhibitory app., atropine effect on, 3321¹.
 insufficiency, blood Ca content in, 2080⁴.
 insulin action on isolated, 3115⁸, 3545⁸.
 insulin effect on, 1598².
 insulin effect on refractory period of, 1909⁹.
 ion action on, 2704⁸.
 irradiation of, 1911¹.
 irritability and balance of ions, 127⁴.
 lobeline action on, 1905².
 lobeline effect on autonomic innervation of, 1905².
 -lung prepn., effect of insulin on blood sugar in, 1600⁴.
 magnesium effect on, 1602³.
 malformation of physico-chem. properties and relative circulatory phenomena in, 3507⁴.
 metabolism of frog, method for study of, 88⁹.
 muscle, compn. in diff. diseases, 2850⁸.
 muscles, acidity of cells of, 2983².
 myocardial weakness, Ca in, 2708⁶.
 myogenic and neurogenic qualities of, 1734¹.
 -nerve action, humoral transfer of, 862¹, 1301⁹, 3304⁸.
 nerve action of, hormone transmission of, 2522².
 nitrogen metabolism of, secretin action on, 351².
 ouabain effect on cond. in, 1455⁸.
 oxidase reaction in surviving prepn. of, of toads, 3496³.
 oxygen consumption by isolated frog, effect of Ca and K on, 2229³.
 ozone action on, 3116^{2,4}.
 pharmacol. modifications in dynamics of frog, 2534⁷.
 pharmacology of frog, 2533⁷.
 pilocarpine-HCl action on, 132².
 potassium action on, effect of Ca on, 1901⁷.
 potassium effect on isolated, of frog larva, 541¹.
 quinidine action on amphibian, 128⁴.
 quinidine effect on, 3123⁸.
 quinidine in therapy of, 1163³.
 quinidine sulfate in irregularities of, 3113⁸.
 reanimation of, with adrenaline in strongly chloroformed dogs, 3320⁷.
 relation between pulse rate and systolic and diastolic pressures as modified by pharmacol. agents, 3325².
 rhythm of silkworm, temp. characteristic for, 2537².
 sinus hormone of frog, 2522¹.
 size of, relation to O content of arterial blood, 3109³.
 sparteine action on, 3125^{8,8}, 3323^{1,2}.
 squill action on, 3317⁸.
 strontium chloride effect on, 1905⁷.
 strontium effect on, 3546⁸.
 thyroid action on isolated, of frog, 1312⁷, 1900⁴.
 thyroid gland action on, of cold-blooded animals, 2230².
 toxicity of acetanilide and caffeine on frog, 3128².
 transplanted, in amphibia, pharmacology of, 540⁷.
 vitamin^a deficiency and, 1445⁷.
 vol. changes in, measurement of, 2507⁸.
Heart extract, effect on exptl. tuberculosis, 3537¹.
Hearths, construction of, 1117¹.
 linings for metallurgical furnace, P 2116⁸.
 refractory materials for, 1039⁴.
Heat. (See also *Body temperature; Calorimetry; Conduction, thermal; Conductivity, thermal; Heat of activation; etc.; Insulation; Nernst heat theorem; Radiation; Thermodynamics.*)
 absorption by boilers, 1621⁵.
 atomic motion and, 2798⁸.
 balance, automatic control of, 1796⁸.
 in blast furnace, 2798^{1,2}.
 detn. from CO₂ and O in flue gas, 2403⁸.
 of foundry furnace, 2624⁸.
 for low-grade fuels, 718⁸.
 of metallurgical app., 3431¹.
 open-hearth, 2013⁸.
 of sugar mill, effect of steam generation on, 3610⁸.
 books: *Wärme und Wärmewirtschaft*, 1744³; *Reduktions-Tabelle für Heizwert und Volumen von Gasen*, 2447¹; *Die Wärmeübergang an strömendes Wasser in vertikalen Röhren*, 3552².
 capacities of org. compds., 2903².
 capacity of aq. solns. of HCl and NH₃, 1651¹.
 capacity of solid aliphatic crystals, 1651¹.

 flame from, in gas furnace, 1765⁴.
 flame propagation in mixts. contg., 1197⁵.
 flame propagation in mixts. of air with, limits for, 731⁷, 1777¹.
 flames in Cl and in O, effect of salts on elec. cond. of, 926⁸.
 formation by colon bacillus, 2222³.
 formation in elec. steam generator, 1099⁹.
 formation of atomic, by excited Hg atom, 607⁴.
 formic acid from, and CO₂, 30⁸.
 generator, P 564⁴.
 heat of combustion of, 1526⁹.
 heat of dissoc. of, 1814⁵.
 heat of oxidation of, 3202⁹.
 inflammability of mixts. with air, effect of trichloroethylene on limits of, 3595⁵.
 inflammability of mixts. with air, influence of noninflammable vapors of org. liquids on limits of, 2274³.
 internal pressure of, 3394⁷.
 ionization by α -particles in, 1657³.
 ionization in, products of, 1987².
 ionization of, 209⁷.
 by electron impact as interpreted by positive-ray analysis, 3062².
 in nebulae, 775¹.
 by slow-moving electrons, 1990⁴, 3422¹.
 ions, mobility in air, 776⁸.
 ions of diff. types in, 604².
 isotherms of, 1074¹, 3184⁴.
 liberation from org. compds., 2472⁸.
 light diffusion by, 212⁹.
 liquefying cycle and cryostat, 2147⁷.
 liquid, cohesion forces of, 3186¹.
 liquid, container for, P 2264¹.
 magnetic properties of, 2289⁹.
 magnetic susceptibility of, 2295⁴.
 manuf. of, 392³, 562¹, 1034¹, P 1330⁷, P 1113⁹, P 2392⁸, P 2730⁸, 2873⁴, 2990⁴, P 3355⁴.
 manuf. of, for NH₃ synthesis, 1931⁷, P 3569⁷, P 3570⁷.
 app. for, P 3355⁴.
 electrolytically, 2170¹, P 2303⁹, 3432⁹.
 electrolytically and applications of, 3432⁹.
 electrolytically, app. for, P 613¹, P 785⁴, P 1101¹, P 1824⁴, 2455⁹, P 2786⁴, P 2917⁴, P 3067⁴, P 3435⁴.
 electrolytically, effect of absorption of CO₂ on cond. of electrolyte in, 2170¹.
 electrolytically, electrode for, P 15⁹, P 1229⁹.
 by Fe-steam process, app. for, P 3570⁹.
 in Italy, 1180¹.
 valve-controlling app. for, P 3137⁴.
 from water, P 3570⁹.
 methane formation from CO or CO₂ and, 1083¹.
 mixts. with He and with CO₂, thermal sepn. of, 2582⁹.
 mixt. with Cl, activation in diff. spectral regions, 2604⁵.
 mixt. with Kr, secondary β -rays produced in, by X-rays, 933¹.
 mixt. with N for NH₃ synthesis, 875⁴.
 mixt. with N, purification of, P 1034⁹.
 mol. vol. of, 2894⁴.
 mol., distance between optical centers of atoms in, 1973³.
 mol., quantum theory of formation of, 1655⁹.
 overvoltage of Pb cell, 1228⁹.
 overvoltage of, on alloys, 919³.
 at As cathodes, 770⁸.
 effect of colloids on, 919³.
 effect of surface condition on, 1820⁷.
 overvoltage of Zn, 434⁷.
 overvoltage on smooth Pb and Ni, effect of pressure on, 599¹.
 oxidation by KMnO₄, 767⁸.
 oxidation (catalytic) of, effect of water and of CO₂ on, 767².
 palladium and, 2902¹.
 particles from radium C, 3213⁴.
 particles, giving off of, assoc. between absorption of α -rays by light nuclei and, 3213².
 particles, measurement of relative brightnesses of scintillations of, 3213⁵.
 particles, optical distinction between α -particles and, 775⁴.
 Paschen-Back effect in, 2297⁸.
 from petroleum dehydrogenation, utilization of, 2126¹.
 prepn. of pure, 2314².
 in producer gas for Zn distn. furnaces, 2556⁴.
 purification for NH₃ synthesis, P 382⁴, P 707⁷.
 reactions in a C'O flame, 3428¹.
 reactions in blast furnaces and gas producers, 3183⁹.
 reactions with C compds. induced electrically, P 1101⁴.
 reaction with BzCl in presence of Ni, 1981⁴.
 with CO₂ in corona, 2595⁴.
 with CO₂ on surface of Pt, 3411¹.
 with CO₂ on surface of W, 3198⁷.
 with Cl, controlling, P 1667⁹.
 with Cl in light, 3222³, 3429².
 with C₂H₄ in presence of metallic Cu, 1981¹.
 with Fe oxides, 1086¹.
 with metallic halides, 1643⁷.
 with N, equil. const. for, 1220².
 with N in presence of Hg vapor, 1663⁹.
 with N, O, Cl, Br, I, C and HgO, thermodynamics of, 433⁴.
 with N₂O, kinetics of, 429⁹.
 with O, acceleration by an O carrier and by a. c., 1649⁷.
 with O in presence of Cl, 2301¹.
 with O in presence of Ag and Au, 1082¹.
 with O, with C and N, with Cl, with N,

- and with CO_2 , 924⁹.
 with S, 439⁷.
 reducing action of, adsorbed in silica gel, 1516⁸.
 reduction of CuS by, 947⁷.
 of Fe_2O_3 and Fe ores by, 3451¹.
 of metal oxides by, app. for, P 589⁹.
 of NiO and Fe_2O_3 by, 448⁹.
 of TiCl_4 with, 1386⁹.
 refractivity of, effect of ultra-violet light on, 1224⁸.
 rotational heat of, 1089⁴.
 sepn. from air, app. for, P 3177⁷.
 from CO , P 3355³.
 from coke-oven gas, 2403².
 from gas mixts., P 167¹, P 3355³.
 soly. of mixt. of N and, in liquid NH_3 , 2551³.
 specific heat at const. vol. of, 206⁸.
 specific heat of, 2444⁸.
 specific heat of, temp. dependency of, at low temps., 3056¹.
 specific heat (rotational) of, 1372¹.
 spectra of explosions of gases contg. C, N, O and, 1348⁷.
 spectrum of, 436⁶, 438⁶, 778⁷, 779¹, 934⁴, 1096¹, 1662⁷, 1817⁸, 1988⁷, 1990², 2166⁸, 2451¹, 2781⁸, 2908⁸, 2912⁹, 2913⁷, 2914³, 3064³, 3220⁹, 3428².
 spectrum of, Balmer lines from, in certain gases, 1990¹.
 system: Cr-, 2593¹.
 system: Fe- O_2 , 1086².
 tetratomic mol. of, in dark space, 2449⁴.
 thermal properties of, 571³.
 thermal slip of, 1073⁷.
 thermal study of, 757⁸.
 vapor-pressure and sp. heat data on, 433³.
 from volcanoes and from rocks, 2797⁸.
 in zinc cathodes, 2303³.
- Hydrogen, analysis.** (See also "combustion" under *Analysis*.)
 detn., 224⁶, 795⁴, 3229⁹.
 detn., app. for, 885³.
 detn. in air, app. for, 2428².
 in gas mixts., 224⁶, 2180¹.
 in org. substances, 2180⁴, 2610⁶, 2921⁷.
 detn. of carbon monoxide, 1235⁶.
 of nitrogen, 1034⁴.
 of oxygen, 2577⁸.
 of oxygen and N, 3443⁷.
- Hydrogen arsenide.** See *Arsine*.
Hydrogenase, action in the cell, 3094¹.
Hydrogenation. (See also *Reduction*.), P 382⁴, 2570⁸.
 of acetylene and C, 2873⁴.
 app. for, 1957³.
 of aromatic and heterocyclic compds. with Pt catalyst, 824³.
 of azines, 3478³.
 by Bergius process, 2403¹.
 of carbonyl compds., 58³.
 catalysts for, P 187⁸, P 583⁸, P 709⁹, P 905¹, P 2866⁹, P 3028⁷.
 adsorption as index of activity of, 1981³.
 effect of thiophene on, 2771¹.
 nobel metals as, 3053⁷.
 reactivation of, 1804⁴.
 reactivation of, app. for, P 2866⁹.
 treating, P 1786⁹.
 catalysts in, effect of mixed, 740⁴.
 catalytic activity of Pt in, 924⁸, 1215⁴.
 catalytic, at low pressure, 2028⁷.
 catalytic, at surface of metals, 3055⁴.
 catalytic, mechanism of, 1566⁷.
 catalytic, of ethylene compds., velocity of, 1401⁶.
 of coal, 1188¹, 1487⁸, 1767⁸, 2119⁹, 2122⁹, 2401⁸, 3156⁴.
 of coal and lignite, 3155⁷.
 of coal and of lignite semi-coke, 1768³.
 of cod-liver oil, stability of vitamin A towards, 95⁸.
 continuous process of, 1634⁴.
 development of, 362⁷.
 effect on vitamin content of cod-liver oil, 1726³.
 electrolytic cells for, 2170³.
 energies of, of methylene blue and Lauth's violet, 2770⁶.
 by formic acid with a catalyzer, 2334⁴.
 of fuels, 1187⁷.
 of gas oil, 1344⁸.
 with hydriodic acid, 1212².
 of hydrocarbon oils, P 169¹.
 of inorg. substances, 1995⁴.
 irreversible reduction and, 204⁸.
 kinetics of, 1634⁸.
 of lignite, etc., 390⁴.
 of lignite tar oils, 1486⁹.
 of liquid org. compds., review of, 58⁹.
 of marine oils, 740⁸.

 corrosion of Fe by, 1398³.
 detection of, 1828⁸.
 detn. of, P 25⁴, 794⁵.
 in blood, 664⁷.
 • in foods, 1917⁹.
 in gases, P 2005².
 in water, 2383⁷.
 effect of petroleum-refining agents on, dissolved in naphtha, 395².
 effect on copper, 1689³.
 effect on yield in catalytic oxidation of NH₃, 1328².
 electron arrangement in, 6⁹.
 emanations in bitumen beds, 1551¹.
 excretion through respiratory system following intravenous injection of colloidal S or of Challes water, 351⁴.
 flame propagation in mixts. CH₄ + H₂S, H₂ + H₂S, C₂H₂ + H₂S, 1197¹.
 flame propagation in mixts. of air with, limits for, 731⁷.
 formation of, by *B. aertrycke*, influence of carbohydrates on, 311⁵.
 by bacteria, class demonstration on, 2968⁴.
 by bacteria of the colon group, 2357⁹.
 by yeast, 864¹.
 generation of, 1998³.
 generator for, P 3041³.
 internal pressure of, 3394⁷.
 liquid, elec. cond. of solns. in, 1519⁹.
 reactions in, 3226¹.
 as source of lab. supply of gas, 3182⁹.
 in mercuric chloride intoxication, 3321¹.
 mols., structure of, 1985⁴.
 from petroleum, 2875⁷.
 physiol. actions of, 1739².
 prepn. in lab., 3228⁴.
 prepn. of, electrolytically, 3415⁶.
 reactions in liquid, and prepn. of dry, 787¹.
 reaction with C₂H₂, 34¹, 463⁶.
 with I in ether soln., effect of H₂O on, 3195⁴.
 with PbO₂ and with PbCl₂ in MeOH, 2788⁷.
 with mercuric salts, 3228⁵.
 reagent for protection against, 2990⁹.
 recovery from coke-oven gases, 165², 2739².
 relation to mercaptans in b. p., 2312⁹.
 removal and recovery from gases, P 877⁴.
 removal from gas, P 1035⁹, P 1770⁹.
 activity of Fe oxides in, 1190¹.
 activity of mass for, 1189⁹.
 charcoal for, P 156⁶.
 sulfuric acid reduction to, 791⁴.
 toxicity of, 2875⁹.
 toxicology of, 2095².
 viscosity of soln. in CHCl₃, 1215².
Hydrohydrastinine, benzyl-, and hydrochloride, 2959².
Hydrolysis. (See also *Enzymes*; *Saponification*.)
 electrometric study of, 706¹.
 of esters derived from strong acids, effect of H ion on, 3413³.
 of salts of tautomeric acids and bases, 1797⁷.
 velocities of, of org. compds., 1804³, 236⁹, 237¹.
 velocity of, of peptides, as related to chem. constitution, 1128⁷, 1129¹.
Hydromagnesite, crystal structure of, 424⁹.
 magnesia from, P 2393¹.
Hydromagnesium halides, 3227⁴.
Hydromelonic acid, and salts, 3228¹.
Hydrometers, P 1211⁹, P 1357².
 graduation of, to indicate % EtOH, 912⁹.
 recording, P 21¹.
 for storage batteries, P 1993³.
 temp. corrections for, in H₂SO₄ and in petroleum oils, 912¹.
 for tomato preserves, etc., P 3135².
Hydronitric acid. See *Hydrazoic acid*.
Hydrooxasacrolene, 2500⁴.
Hydrophilia, muscular, H-ion concn. and, 1886².
Hydrophobia. See *Rabies*.
Hydrophysostigmol, methyl ether*, and pic rate, 2048⁴.
Hydroquinidine, sulfonation of, 1425⁶.
Hydroquinine, sulfonation of, 1425⁶.
Hydroquinol, addn. compds. with aliphatic amines, 255⁹.
 addn. compds. with bipyridinium compds., 2053⁴.
 as antioxidant in autoxidation of acrolein, 1126¹, 1127³.
 bis(chloroformate), 3269⁴.
 bis-*p*-nitrobenzoate, 260⁴.
 compd. with enzyme, affinity const. of, 3495⁶.
 eutectic point with trichloroacetic acid, 3200¹.
 film on water, failure to form, 1974⁹.
 heat of soln. of, 1982⁹.
 manuf. of, P 1710, P 2210².
 mol. assoc. of, 3052⁷.
 oxidation of, in presence of aliphatic amines, 259¹.
 oxidation of, relation of O₂, OH ions, Mn salts and oxidase of lucerne leaves to, 661⁷.

- reaction with EtOCl, 2032³.
with CHI₃, 2487².
with Pt, 2590⁴.
- systems: benzohydrol-, azobenzene-, succinic acid-, cinnamic acid-, dimethyl oxalate-, 1703⁷, 1704^{1,2}.
- Hydroquinol, 2-bromo-6-phenylazoxy-**, monobenzoate, 44⁵.

 Indoline-[$\Delta^{1,2}(1')$] - naphthalene-1',3-dione, 4'-anilino-, 2338¹.
 2-Indolol, 3-(γ -dimethylaminopropyl)-6-ethoxy-2,3-dihydro-1-methyl-, 1140², 1427¹.
 —, 3-mercapto-(?), 2337².
 3-Indolol. See *Indoxyl*.
 2(3)-Indolone. See *Oxindole*.
 2(2)-Indolone. See *Pseudoindoxyl* and also *Indoxyl*.

Indoloquinoline, $C_{12}H_{10}N_2$ 

2,3 - γ - Indoloquinoline, 2,3,9,10 - tetramethoxy - 6 - phenyl -, methosulfate, 2956^a.

6,7 - ϵ - Indoloquinoline, 7,8-diphenyl-, and derivs., 2956^a.

Indoloquinoxaline (indophenazine),

—, **2,3 - dimethoxy-**, methohydroxide, 2956^a.

and salts, 2956^a.

—, **2,3-dimethoxy-10-methyl-**, methohydroxide, and its isomer, 2957^a.

—, **8-nitro-10-phenyl-**, 646^b.

Indonaphthol - 13 - α -thiosulfonic acid, 11-dimethylamino-2-hydroxy - 6-sulfo-*, dipotassium salt, 513^a.

Indone, 2,8-diphenyl-, prepn. of, 2208^a.

—, **2-ethyl-3-phenyl-**, prepn. of, 2208^a.

—, **2,3' - methylenebis[3-phenylhydrazino-]**, 3486^a.

—, **2-methyl-3-phenyl-**, prepn. of, 2208^a.

—, **perchloro-**, addn. compds. of, 1258^a.

Indophenazines. See *Indoloquinoxaline*.

Indophenin, constitution of, 1277^a.

Indophenol, formation of, from CaOCl_2 and PhNH_2 , 1133^b.

—, **3-bromo-**, as indicator, 2038^a.

—, **2-chloro-**, as indicator, 2038^a.

—, **2,2' - dibromo - 5,2' - dihydroxy-2,5'-dimethyl-**, and triacetate, 2649^a.

—, **3',5'-dichloro-**, 2038^a.

—, **3',5'-dichloro - 2(and 3) - methyl-**, 2038^a.

—, **5,2' - dihydroxy-2,5'-dimethyl-**, 2649^a.

—, **1 - naphthol - 2 - sodium sulfonate-***, as indicator, 2650^a.

—, **2,3,5'-trichloro-**, 2038^a.

Indophenol blue, book: *Indophenolblausynthese*, 1719^a.

formation in presence of diff. colloids, 3496^a.

Indophenols, P 300^a.

Indophenol - 1 - thiosulfonic acid, 3'-chloro-3-dimethylamino-*, and sodium salt, 513^a.

—, **3-dimethylamino-***, and sodium salt, 513^a.

Inderhodinium compounds*, 3488^a.

Indoxyl, reaction with anthraquinonealdehyde, and its detn., 2951^a.

Inductance, comparison with capacity, 3210^a.

Induction furnace. See *Furnace, electric*.

Industry. (See also *Chemical industry*; "in-

dustrial" under *Hygiene*; *Research*; *Waste*.)

book: *Profitable Science in*, 1607^a.

chem. warfare and, 865^a.

chemistry and, 549^a.

engineering education and, 2714^a.

 detn. of, 2465^o.
 reaction with BaO, 915^o.

Iron sulfides, cast articles of, P 235^a.

FeS, 982^a.

as catalyzer for $C_2H_4-H_2S$ reaction, 4637.
colloidal, pharmacol. action of, 859^a,
1599^a, 3111^a.

crystal structure of, 2620^a.

sulfur tension of, 1513^a.

FeS₂, crystal structure of, 1359^a.

"Irrebolin," effect on sugar oxidation, 1160^a.

Irritability, sucrose effect on, of muscle, 2230^a.
temp. effect on, in *Helix pomatia*, 141^a.

Irritating substances, pharmacology of, 3325^a.

Iscamine blue, effect on malignant growths, 678^a.

Isarit, 1476^a.

Isatan, 7-methyl-, 1706^a.

Isatic acid, 5-nitro-, oxime, 65^a.

—, 5-nitro-*N*-phenyl-, 646^a.

Isatide, constitution and synthesis of, 2204^a.

Isatin (2-hydroxy-3-pseudoindolone). (See also *Pseudoisatin*.)

absorption of ultra-violet light by, 1663^a.

absorption spectrum of, 2043^a.

condensation with phenols, 2196^a.

derivs., isomerism of, 2951^a.

3-phenyl-2,4(1,3)-quinazolinone from, 2823^a.

reaction with ketonic acids of the cholic acid group, 2517.

silver deriv., reaction with BzCl, 2050^a.

Isatin, 4-chloro-5,7-diiodo-, sodium salt, 1422^a.

—, *o,o*-diacyldiphenyl-, prepn. of, and derivs., P 991^a.

—, iodo-, absorption spectrum of, 2048^a.

Isatinic acid. See *Isatic acid*.

Isatinphenylhydroxylamine*, reaction with SOCl₂, 2824^a.

Isatinrhodamine*, 2197^a.

Isatogen, rearrangement of derivs., 646^a.

—, 6-nitro-2-phenyl-, labile addn. product with Ac₂O, 646^a.

Isatoid, 2050^a.

Isatol, 2050^a.

β-, 2951^a.

Ishikawaite, 2005^a, 2008^a.

Isinglass, hydroxylysine content of, 2348^a.

Islands of Langerhans. See *Pancreas*.

Isoagglutination. See *Agglutination*.

Isoagglutinins. See *Agglutinins*.

Isoamyl alcohol, dehydrogenation of, Cu as catalyst for, 1367^a.

dielec. const. of, in C₆H₆, 3206^a.

system: isoamyl ether-H₂O-, 1693^a.

system: H₂O-, mutual soly. of, 2292^a.

effect on pptn. of colloids by electrolytes, 761^a.

Isoamylaluminium iodide*, 2929^a.

Isoamyl ether, system: isoamyl alc.-H₂O-, 1693^a.

Isoamyl nitrite, consts., 2927^a.

Iso-barbaloin, detection of, 3145^a.

Isobarbituric acid (5-hydroxy-2,4(1,3)-pyrimidinedione).

oxidation of, 3089^a.

reaction with PhNHNH₂, 2055^a.

—, 1,3-dimethyl-, 1249^a.

—, 3-methyl-, 1249^a.

1-Isobenzazole. See *Pseudoindole*.

2-Isobenzazole. See *Pseudoisindole*.

Isobenzofuran,

—, 1,2-dibenzoyl-, 6660^a.

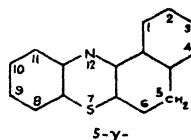

—, 1,2-dihydro-. See *Phthalan*.

—, 1,2-dihydro-1-keto-. See *Phthalide*.

1,2-Isobenzofurandione. See *Phthalic anhydride*.

1-Isobenzofuranone. See *Phthalide*.

5-γ-Isobenzophenothiazine,

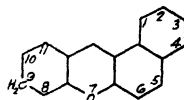

5-γ-Isobenzophenothiazine-2-sulfonic acid, 9-dimethylamino-6-hydroxy-5-keto-, potassium salt, 513^a.

5-γ-Isobenzophenothiazine, 9-diethylamino-6-hydroxy-, 513^a.

—, 9-dimethylamino-6-hydroxy-, 513^a.

9-α-Isobenzoxanthene,

9-α-Isobenzoxanthene, dibromo-12-(2,4-dihydroxyphenyl)-, 1568^a.

—, 12-(2,4-dihydroxyphenyl)-, 1568^a.

Isobis - β - naphthalenesulfoxide - β - naphthoquinone*, 3088^a.

Isoborneol, *d*- and *l*-, esters, 2657^a.

effect on bile secretion, 2243^a.

esters, mixt. of, and camphene, P 3093^a.

fatty acid derivs., P 3491^a.

oxidation with O₂, 2654^a.

prepn. and optical rotation of, 3267^a.

2-Isobornylamine, 269^a.

Isobornylane, 269^a.

—, 2-benzamido-, 269^a.

—, 2-nitro-, 269^a.

—, 3-nitro-, 269^a.

2-Isobornylanol, 269^a.

3-Isobornylanone. See *Isobornylone*.

Isobornyl chloride*, 2818^a.

tert-Isobornylol. See *2-Isobornylanol*.

Isobornylone, and semicarbazone, 269^a.

Isobutyl alcohol, dehydration and dehydrogenation of, over ZnO catalyst, 2185^a.

dehydration of, 1401^a.

dehydrogenation of, Cu as catalyst for, 1367^a.

dielec. const. of, in C₆H₆, 3206^a.

effect on parotid secretion, 2847^a.

elec. resistance of thin layers, on paper, 3056^a.

internal pressure of, 3394^a.

miscibility of mixts. of water, EtOH and, 2769^a.

reaction with Bz₂O₂, 2194^a.

reactivity of hydroxyl-hydrogen atom, 1244^a.

Isobutylamine, and hydrochloride, 3478^a.

hydrochloride, elec. cond. in MeOH and EtOH, 2440^a.

—, *N*-benzal-, reaction with Br, 2645^a.

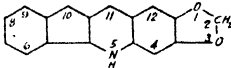

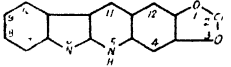

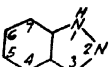

—, *N*-isobutylidene-, reaction with Br, 2645^a.

Isobutyl group, effect on the esterification const., 3252^a.

Isobutyraldehyde, acetals, 2474^a.

acetals, prepn. of, 1694^a.

- azine, hydrogenation of, 3478³.
condensation reactions of, 2807².
isobutylhydrazone, 3478³.
Isobutyranilide, β -chloro- α -hydroxy-, derivs., 264².
—, β , β -dichloro- α -hydroxy-, 264⁵.
—, α , α' , α'' -dithiobis-, 816¹.
—, α -hydroxy-, salicylate, 264².
Isobutyric acid, chlorination of, 440³.
hydroxylamine salt, 2928⁷.
—, β , β' -diformyl-, and *p*-nitrophenylhydrazones, 1129⁵.
—, α , β -dihydroxy-, *dl*-, and derivs., 2189⁴.
Isobutyryl bromide, reaction with Mg, 2640².
Isobutyryl chloride, decompn. of, 2032⁹, 3082².
Isocadinene, 489¹.
Isocaffuric acid (tetrahydro - 4 - hydroxy-2,5-diketo - N,1 - dimethyl-4-imidazolecarboxamide).
phys. consts., 2811⁵.
Isocamphenilone, constitution, 2946¹.
Isocaproamide, α -acetamido-, 2052².
Isocaproic acid, boiling p. and esterification const. of, 3251⁹.
ethyl and Pr esters, fission by pancreatic enzyme, 2214¹.
—, α -amino-. See *Leucine*.
—, α -methyl-, boiling p. and esterification const. of, 3252¹.
Isocaprophenone, behavior in animal body, 1899⁷.
3-Isocarboline. See *1,9-Isopyridindole*.
Isocarbostryl (1-isoquinolinol or 1(2)-150-quinolone).
—, 3-chloro-2-homopiperonyl-, 2958⁹.
—, 3-chloro-2-homopiperonyl-6,7-dimethoxy-, 2959¹.
—, 3,4-dihydro-6,7-dimethoxy-2-veratryl-, 2669¹.
—, 3,4-dihydro-2-phenethyl-, 2958⁷.
—, 2-(2,3-dimethoxybenzyl)-3,4-dihydro-6,7-dimethoxy-, 2668⁷.
—, 2-(2,3-dimethoxybenzyl)-6,7-dimethoxy-, 2668⁸.
—, 6,7-dimethoxy-2-veratryl-, 2669².
—, 6-ethoxy-3,4-dihydro-7-methoxy-, 2959⁵.
—, 7-ethoxy-3,4-dihydro-6-methoxy-, 2959⁵.
Isochroman (3,4-dihydro 2,1-benzopyran).
1-Isochropancarboxylic acid, 4-hydroxy-3-keto-1,4-diphenyl-, and methyl ester, 2660⁶.
Isochromes, logarithmic, method of, 430².
Isocinchomeric acid, diphenyl ester, 2954².
Isocitric acid, in blackberry, 1150⁷.
Isocodeine, reaction with SOCl₂, 2828⁸.
Isocorybulbine, constitution, 2959⁴.
Isocoumaranone. See *2,1-Benzopyrone*.
Iso-o-cresolphthalein, tetrachloro-, 1268¹.
Isocrotonamide, hydrolysis of, 3253⁴.
Isocrotonic acid, and isomer, 1625⁴.
—, α -ethyl- β -methyl-, 1697⁴.
prepn. of aliphatic, 3083⁴.
spectra of, 777⁹.
Isocyanic acid, diphenyl-*p*-tolylmethyl ester, 642⁵.
esters, 240⁷.
esters, addn. compds. with dimethyl-*l*-etene, 2189¹.
phenyl ester, 3085⁵.
Isocyanides. See *Isonitriles*.
Isocyanilic acid, and derivs., 2807⁸.
—, diacetyl-, 2807⁹.
—, dibenzoyl-, 2807⁸.
Isocyanine, antiseptic action of compds. of series, 530⁷.
Isodesoxybenzoin, benzal-, 826².
Isodialuric acid (1,6-dihydro - 6 - hydroxy-2,4,5 - pyrimidinetrione).
reaction with PhNHNH₂, 2055¹.
—, 1,3-dimethyl-, 1249⁸.
—, 3-methyl-, 1249⁸.
Isodicyclopentadiene dizonide*, 2659⁸.
6-Iso-5,10-dioxoloindenoquinoline,

—, 5-methyl-10-phenyl-, and salts, 2956².
Isodioxoloquinindoline,

—, 5-methyl-, 2956⁴.
 γ - **Isodurylanilide**, α^2 -phenylimino-, 483¹.
 α - **Isodurylic acid** (3,4,5 - trimethylbenzoic acid).
—, α^4 -phenylimino-, 483¹.
Isoelectric point, theory of, 920⁷.
Isogeugol, benzoate, 260².
fattening action of, 1152⁹.
formate, 47⁸.
oxidation of, electrochem., 2195⁹.
reaction with HCOOH, 646⁵.
—, methyl-, reaction with HCOOH, 646⁵.
Isogadoleic acid, and silver salt, 2930⁹.
Isoharmyline, diveratro-. See *5-Isos-2,3- γ -indoloquinoline*, 2,3,9,10 tetramethoxy-.
Isohemagglutination. See *Hemagglutination*.
Isohemolysins. See *Hemolysins*.
 Δ^1 -1-**Isohexenic acid***, 1428².
Isohumulinic acid, and derivs., 1428⁸, 1429¹.
Isolindazole (1,2 - benzodiazole; benzopyrazole),

(See also *Indazole*. The two compounds are desmotropic and derivs. of both are referred by some to *Indazole* only.)
—, 1-acetyl-, 508⁸.
derivs., 509⁴.
—, 1-acetyl-*l*-bromo-, 509⁷.
—, 1-acetyl-3-phenyl-, 510¹.
—, 1-allyl-5-methyl-, and picrate, 511⁹.
—, 1-benzoyl-, 509⁷.

- , **3-bromo-1,5-dimethyl-**, 512⁷.
 —, **1-ethyl-5-methyl-**, and picrate, 511⁴.
 —, **1-formyl-5-methyl-**, 509⁹.
 —, **3-iodo-1-methyl-**, 512⁴.
 —, **1-isobutyl-**, 509⁸.
 —, **1-isovaleryl-**, 509⁸.
 —, **1-methyl-4-nitro-**, 3092⁴.
 —, **3-methyl-1-propionyl-**, 509⁹.
 —, **4-nitro-1-p-nitrophenyl-**, melting p. of, 3092³.
 —, **4-nitro-1-o (and p)-tolyl-**, 3092³.
 —, **4-nitro-1-(2,4-xylyl)-**, 3092³.

Isoindazolium compounds, 1 - benzyl - 2,3-dimethyl-2- iodide, 512³.
 2 - benzyl-1,3-dimethyl-2- iodide, 512³.
 3 - bromo - 1,2,5 - trimethyl-2- iodide, 512⁷.
 3,5-dibromo-1,2-dimethyl-2- bromide, 512³.
 5,7-dibromo-1,2-dimethyl-2- bromide, 512³.
 3-iodo-1,2-dimethyl-2- iodide, 512⁴.

3-Isoindazolol, and -HCl, 2050^{1,4}.
 —, **1-acetyl-**, and acetyl deriv., 508⁸.

3(2)-Isoindazolone. See *3(1) - Indazolone*.
Isoindigotin, 2204⁶.
 indin and, 2336⁹.

—, **7,7'-dimethyl-**, 1706³.

—, **7-methyl-**, 1706³.

Isoindigotindisulfonic acid, **7,7' - dimethyl-**, salts, 1706³.

—, **7-methyl-**, salts, 1706³.

Isoindole (*2-benzazole*, see also *Pseudoisindole*).

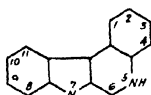

1,3-Isoindoledione. See *Phthalimide*.

Isoindolenine. See *Pseudoisindole*.

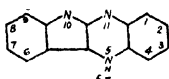

1(8) - Isoindolone. See *Phthalimidine*.

5 - Iso - 2,3 - γ - indoloquinoline,

—, **2,3,9,10 - tetramethoxy - 5 - methyl-6-phenyl-**, and methiodide, 2956⁷.

Isoindoloquinoxaline,

5(or 11) - Isoindoloquinoxaline, **2,3 - dimethoxy-5(or 11)-methyl-**, and derivs., 2956⁹.

Isoindophenazine. See *Isoindoloquinoxaline*.

Isoleucine, ionization consts. for, 662⁹.

Isochenin, 974¹, 1853⁹, 2813³, 1443⁴.

constitution of, 974¹.

Isochelamidine, and -HCl, 2828³.

Isochelaneline, and derivs., 2828³.

Isoemthol, hydrogenation of, P 3566⁴.

Isomerism. (See also *Allotropy*.)

of chalcone derivs., 1571⁷.

chromatic, relation to auxochromism and halochromism, 3212⁹.

chromo-, of Ag salts of acyl derivs. of hydroxyurethans, 969⁸, 3258⁴.

cis-trans-, in terpene series, 824¹.

cis-, *trans-*, method of differentiating between, 1698¹.

cis-trans-, of the stilbazoles, 1573⁸.

cis-, *trans-*, phenylmethane series, search for, 3267⁴.

—, 488¹, 2334¹, 2641⁴.

effect on color of azo dyes, 1778⁹.

by electronic rearrangement, 3422⁴.

enol-keto-, 1565⁴.

in the isatin series, 2951⁹.

of olefins, 2322⁹.

of oximes, 489⁸, 2039⁷, 2650³.

of oximes, strain theory and, 1125⁴.

of picrates of aromatic bases, 257⁹.

polymorphism and, 1419⁴.

in the pyrazole series, 2048⁹, 2952⁹.

stereo-, of azo dyes, 2936⁴.

disinfectant action and, 2512⁸.

of hydrazones, 477¹.

new type (dibenzalerythritol), 2932⁹.

of o-nitrobenzyl methyl ketoxime, 2938¹.

of octahydroacridine derivs., 522¹.

of org. N compds., 508², 509³, 510³.

sp. inductive capacity and ethylenic, 3057⁹.

tautomerism, addn. reactions correlated with, 1408⁴.

of amidines, 1706⁴.

of 2-aminopyridine, 69⁴.

of cyclopropane derivs., 247³, 1410⁸.

of dyads, 2324⁴.

of dyads (mobility of oximes), 2937⁴.

of o-hydroxytriarylcarbinols containing C₆H₅, 2945¹.

of β-keto esters and β-diketones, 2033⁸.

measurement of progress of, 1226⁴.

mobility of the hydroxyl group in an open-chain triad system, 978³.

of phenols, 47¹.

of 2-phenyl-1(2) - benzofuranone derivs., 1276⁴, 2044⁴.

of pyridone, 68⁷.

ring-chain, 268¹, 985⁷, 1697², 2329¹.

three-carbon system, 1695⁵, 2032⁹.

Isomerization. See *Rearrangements*.

Isomers, effects on animals and on plants, 125⁷.

epimeric forms, reaction velocity and equil. between, 1649⁸.

equil. of, effect of solvent on, 2036¹.
 soly. of, 3405⁹.

"**Isometabolic point**," 2220³.

Isomorphism, atoms and, 2429⁴.

• criterion of, 3447⁴.

among cubic compds. of Pt, Pb, Se and Sn, 940⁴.

of double selenates, 941⁵.

of lithium and Mg fluorides, 2890⁶.

pseudo-, 3448³.

of sesquioxides, 3301⁷.

of stannous and Pb oxides, 1644¹.

between trivalent Ti and rare earth metals, 2582¹.

of thorium compds. with those of quadrivalent Ce, 425⁷.

of zirconium sulfate with Ce(SO₄)₂·4H₂O, 2892⁴.

Isomorphogenism, of metals of rare earths with those of Ca group, 1529⁸.

Iso - β - naphthalenesulfonyl - 3,4 - dihydroxynaphthalene, derivs., 3088⁴.

Isonicotinecarpine, and derivs., 1709⁷.

Isonicotinamide, 2954¹.

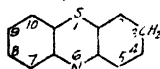

Isonicotinic acid (*4 - pyridinecarboxylic acid*), phenyl ester, and its hydrochloride, 2954¹.

—, **3-amino-2,6-dimethyl-**, and salts, 2955¹.

Isonicotinic anhydride, 2954¹.

Isonitriles (The individual isonitriles are entered as isocyno derivatives under their respective parent compounds.)

- detection in "aljol," 2619^o.
 reaction with aldehydes and ketones in presence of org. acids, 263^o.
 reaction with naphthols and phenols, 828^o.
Iso-nitrogen dioxide. See *Nitrogen oxides*.
Isositroso group, reaction with α -ketoaldehydes, 285^o.
Iso - oxo - dicyclopentadiene dioxonide*, 2659^o.
Isoparaffins, vapor tension of, 889^o.
Isopelletierine, 1280^o.
 —, **dihydro-**, 1281^o.
 —, **methyl-**, transformations of, 1280^o.
Isopentane. See *Butane, 2-methyl-*.
Isophenolphthalein, and derivs., 271^o, 272^o.
 and diacetate, 272^o.
 —, **tetrabromo-**, and derivs., 272^o.
 —, **tetraiodo-**, and diacetate, 272^o.
2,3 - Isophenosafuranine*, salts, 2330^o.
3-Isophenothiazine,

- , **9 - dimethylamino - 3 - methylimino-,**
 3-methochloride—see *Methylene blue*.
3 - Isophenothiazone, 9 - dimethylamino-,
 513^o.
3-Isophenoxazine,

- 3-imino-, and* perchlorate,** 1857^o.
3 - Isophenoxazone, 4 - acetamido-9-chloro-,
 2340^o.
 —, **4 - acetamido - 9 - chloro-2,10-dimethyl-,** 2340^o.
 —, **4 - acetamido-2,5,7,10-tetramethyl-,**
 2340^o.
 —, **4-amino-9-bromo-,** 2340^o.
 —, **4-amino-9-chloro-,** 2340^o.
 —, **4-amino-9-chloro-2,10-dimethyl-,**
 2340^o.
 —, **4-amino - 5,7 - dichloro-2,10-di-methyl-,** 2340^o.
 —, **4 - amino - 2,5,7,10 - tetramethyl-,**
 2340^o.
 —, **4-amino-5,7,9-tribromo-,** 2340^o.
 —, **4-amino-5,7,9-trichloro-,** 2340^o.
 —, **9-chloro-4-salicylalaminio-,** 2340^o.
3 - Isophenoxaz - 3 - one, 7,7 - dibromo-9-hydroxy-4,8-dimethyl-, 2649^o.
 —, **9 - hydroxy - 4,8 - dimethyl-, and acetate,** 2649^o.
Isophorone, in acetone oil, 3087^o.
 —, **dihydro-*,** in acetone oil, 3087^o.
Isophthalic acid, dimethyl ester, SnCl₄ addn. compd., 51^o.
 —, **4,6 - bis(3-chloro-*p*-toluyl)-, and dimethyl ester,** 62^o.
 —, **4,6 - bis(5-chloro-*o*-toluyl)-, and dimethyl ester,** 62^o.
 —, **4,6 - bis(tetrahydro - 2 - naphthoyl)-,** 63^o.
 —, **4,6 - bis(5,6,7,8 - tetrahydro-2-naphthoyl-) (?) ,** 1275^o.
 —, **4,6-dicarbamyl-, disodium salt,** 1274^o.
 —, **4,6 - di-1-naphthoyl-, and dimethyl ester,** 62^o.
 —, **hexahydro-. See 1,3 - Cyclohexene-dicarboxylic acid.**

- , **2,4,6-trihydroxy-, esters, methylation of,** 646^o.
 —, **2,4,6-trimethoxy-, esters,** 646^o.
Isophthalyl alcohol, 2-hydroxy-5-methoxy-, 977^o.

Isopilocarpidine, and salts, 2052^o, 2053^o.
Isopilocarpine, methylchloroplatinate, isomerism of, 1281^o.
Isopral, 704^o.
 disinfectant action and toxicity of, 3864^o.
 effect on motor action of parasympathetic stimulants of intestine, 2088^o.
Isoprene (2-methyl-1,3-butadiene).
 cancer-producing substance from, 121^o, 3113^o.
 formation of, theory of, 3485^o.
 rubber and, 908^o.
 synthesis of C.F., 2930^o.
Isopropyl alcohol. (For derivatives see under 2-Propanol, etc.)
 as alc. substitute, 703^o.
 contraction on dissolving in C₆H₆, 3195^o.
 dehydration and dehydrogenation of, 2185^o.
 dehydration of, 1401^o.
 elec. resistance of thin layers of, on paper, 3056^o.
 mixt. with EtOH, phys.-chem. properties of, 2289^o.
 purification of, P 523^o, P 3272^o.
 reactivity of hydroxyl-hydrogen atom, 1244^o.
 refractive index of, 1125^o.
 specific heat and heat of fusion of, 2903^o.
Isopropylamine, N-aryl-, in dye and explosive industries, P 3492^o
Isopropyl chloride. See Propane, 2-chloro-
Isopropyl group, effect on the esterification const., 3252^o.
Isopropylidenimine, chlorostannate, 2652^o.
Isopropylstannonic acid. See 2-Propane-stannonic acid.
Isoprotuberberine, 2,3 - methylenedioxyoxy-*, and derivs., 2959^o.
 —, **2,3 - methylenedioxytetrahydro-*, and salts,** 2959^o.
Isopseudocumenol, 6-amino-, 2340^o.
Isopulegol, properties and prepn. of, 2107^o.
Isopurpurin. See Anthrapurpurin.
Isopyridindole,

2,5 -

1,7 -

- 1,9-Isopyridindole, 1-methyl-,** 2956^o.
2,5 - Isopyridindole, 2-methyl-, and methyl sulfate salt, 107^o.
Isopyrrole (isoazole),

- 3 - Isopyrrolecarboxylic acid, 2 - [(3-carboxy-4,5-dimethyl-2-pyrryl)methylene]-4,5-dimethyl-, derivs.,** 3270^o, 3271^o.
4 - Isopyrrolecarboxylic acid, 2 - (4-acetyl-3,5-dimethyl-2-pyrrylmethylene)-3-hydroxy-5-methyl-, ethyl ester, 74^o.
 —, **3,5-dimethyl-2 - (p - dimethylaminobenzal)-, ethyl ester, perchlorate,** 2823^o.
Isopyrrolemethylenemalonie acid, 2' - [4 - (3,6-

dicarboxethyl)-3,5-dimethyl-2-pyr-
rylmethylene]-3,5-dimethyl-, derivs.,
2823^a.

—, 3,5-dimethyl-2-(*p*-dimethylamino-
benzal)-, derivs., 2823^a.
Iso-pyrrolopyridine,

7-Iso-1,7-pyrrolopyridin-3-ol (?), deriv
281^a, 7^a.

Isoquinaldamide, 6,7-dimethoxy-, 2668^a.

—, 2-(2,3-dimethoxybenzyl)-1,2,3,4-
tetrahydro-6,7-dimethoxy-, 2668^a.

Isoquinaldonitrile, 2-benzoyl-1,2-di-
hydro-6,7-dimethoxy-, 2668^a.

—, 1,2-dihydro-6,7-dimethoxy-2-
veratryl-, 2669^a.

—, 2-(2,3-dimethoxybenzoyl)-1,2-di-
hydro-6,7-dimethoxy-, 2668^a.

—, 2-(2,3-dimethoxybenzyl)-1,2-
dihydro-6,7-dimethoxy-, 2668^a.

—, 2-(2,3-dimethoxybenzyl)-1,2,3,4-
tetrahydro-6,7-dimethoxy-, 2668^a.

—, 1,2,3,4-tetrahydro-6,7-dimethoxy-
2-veratryl-, 2669^a.

Isoquinoline (2-benzazine; leucoline),

alkaloids derived from, urinary elimination
of, 1906^a.

ferricyanide, 978¹.

hydrogenation of, 824^a.

prepn. and reduction of, and its derivs.,
2955¹.

—, 1-(*o*-aminobenzyl)-1,2,3,4-tetrahy-
dro-2-methyl-, and salts, 2500^a.
